## Measuring from plans

---

Within Chichester District, outside of the South Downs National Park (SDNP), plans associated with planning applications may be scaled using the Council's Online Measuring Tool. Where there is a need to measure plans offline and for measuring plans relating to applications within the SDNP there is an alternative free product; FOXIT Reader produced by Foxit Software that allows users to download the PDF version of scaled plans and measure them whether or not they are connected to the internet.

The reader can be downloaded from the off site link called Foxit software Reader. When installing the software we recommend that you select the "Make Default PDF Viewer" and "Run in Browser" options.

Please note that although Chichester District Council has found this software to be robust and usable, we make no formal endorsement of the product and cannot accept any liability for any effect arising from its installation or use on any third party computer. Chichester District Council cannot offer any support and will not be responsible for the use of FOXIT reader on any user's computer. The use of the measuring tool should only be used as a guide or estimate of any measurements taken from the plans. Chichester District Council cannot be held responsible for any inaccurate measurements.

A full manual on all the tools provided by Foxit reader can be downloaded from this page.
