

Appendix H Noise Assessment

TECHNICAL NOTE

Job Name: Chichester
Job No: 43682
Note No: TECH01
Date: 04/10/2018
Prepared By: Zoe Richardson
Subject: Chichester Local Plan Developments - Noise Impact Assessment

Item	Subject
1.	<p>Introduction</p> <p>This technical note presents the findings of a noise impact assessment undertaken of the likely change in noise levels due to changes in traffic flows as a result of developments included within the preparation of the Chichester Local Plan Review: 2016 – 2035.</p> <p>The objectives of the assessment are to:</p> <ul style="list-style-type: none"> Identify whether the traffic flow increases predicted to occur as a result of developments included within the Local Plan are likely to result in noise impacts sufficient to merit further investigation. The assessment is based on data provided by the Transport consultant (PBA). <p>A short description of the proposed developments included within this assessment is located in Section 1.4 of the '<i>Transport Study of Strategic Development Options and sustainable Transport Measures</i>' produced by PBA.</p> <p>The note forms part of the assessment undertaken for the Chichester Local Plan: Key Policies 2014 - 2019 – Transport Study.</p>
2.	<p>Guidance and Proposed Assessment Criteria</p> <p><u>Design Manual for Roads and Bridges</u></p> <p>The Design Manual for Roads and Bridges (DMRB) is considered as the regulatory standard for the design of a new road or improvements to an existing road. In particular, Volume 11 Section 3 Part 7 (HA 213/11 – Revision 1) sets out the method for assessing noise and vibration associated with road traffic. DMRB provides guidance on the selection of the scheme assessment area, the relevant assessment years and quantifies the noise and vibration impacts generated by changes in road traffic.</p>

TECHNICAL NOTE

Item	Subject												
	<p><u>Significance Criteria</u></p> <p>The assessment of road traffic noise follows the assessment methodology detailed in DMRB HD 213/11.</p> <p>The assessment considers the change in noise levels due to changes in road traffic flows from the proposed developments. The assessment is based on AAWT 18-hour traffic flows. In accordance with the Calculation of Road Traffic Noise (CRTN), roads with flows of < 1,000 have not been included within this assessment.</p> <p>The assessment determines which roads are likely to result in changes in noise levels sufficient to require a detailed assessment. The threshold criteria used for this is a change in magnitude of 3 dB $L_{A10,18 \text{ hr}}$ or more.</p> <p>The Local Plan includes developments which are to be completed between 2014 and 2029. It is assumed that the developments included within the plan are to be gradually completed over the plan period. As such, the assessment criteria is based on the long term change in noise level as defined by DMRB.</p> <p>The impact of the proposed developments on the noise climate of the surrounding area is assessed based on the change in noise levels at noise sensitive receptors due to a change in the volumes of road traffic on the existing road network generated by the Developments.</p> <p>Table 2.1 details the magnitude of impact due to road traffic noise changes arising from operational road traffic noise.</p> <p>Table 2.1: Change in Noise Levels Due to Operational Road Traffic Noise</p> <table border="1" data-bbox="300 1153 1364 1355"> <thead> <tr> <th>Change in Long-term Ambient Noise Level Due to Operational Traffic ($L_{A10,18 \text{ h}}$ dB)</th> <th>Magnitude of Impact</th> </tr> </thead> <tbody> <tr> <td>0</td> <td>No Change</td> </tr> <tr> <td>0.1 to 2.9</td> <td>Negligible</td> </tr> <tr> <td>3 to 4.9</td> <td>Minor</td> </tr> <tr> <td>5 to 9.9</td> <td>Moderate</td> </tr> <tr> <td>10 +</td> <td>Major</td> </tr> </tbody> </table>	Change in Long-term Ambient Noise Level Due to Operational Traffic ($L_{A10,18 \text{ h}}$ dB)	Magnitude of Impact	0	No Change	0.1 to 2.9	Negligible	3 to 4.9	Minor	5 to 9.9	Moderate	10 +	Major
Change in Long-term Ambient Noise Level Due to Operational Traffic ($L_{A10,18 \text{ h}}$ dB)	Magnitude of Impact												
0	No Change												
0.1 to 2.9	Negligible												
3 to 4.9	Minor												
5 to 9.9	Moderate												
10 +	Major												
3.	<p>Assessment</p> <p>The assessment considers the potential noise effects associated with the change in traffic flows in relation to the operational phases of the developments included within the Local Plan. The change in noise level has been calculated at existing noise sensitive receptors located adjacent to the assessed road links.</p> <p>The following scenarios have been modelled:</p> <ul style="list-style-type: none"> • 2035 Do-Minimum (i.e. future year baseline without the developments in place); • 2035 Do-Something (i.e. future year with the developments in place); and • 2035 Do-Something with transport Mitigation (i.e. future year with developments in place and potential mitigation). <p>As per CRTN, roads with flows of <1,000 have not been included within the assessment.</p> <p>The absolute levels detailed in Table 4.1 and 4.2 assume that traffic from the road link under assessment is the dominant sound source. For roads with flows of around 1,000, ambient noise from other roads/sources may also contribute to the ambient sound level</p>												

TECHNICAL NOTE

Item	Subject																																																																																																																																																
	<p>at any receptors and as such the overall change in sound level may be less than indicated in the tables.</p> <p>Existing Road Network</p> <p>Based on the 18-hour Annual Average Weekly Traffic (AAWT) information provided by the project transport consultant, PBA, Figures 1 to 5 present the results of the assessment for a comparison of the 2035 Do-minimum scenario to the 2035 Do-something scenario. Roads have been highlighted where a greater than 3 dB change in LA10, 18 hr noise levels is expected.</p> <p>Table 4.1. presents the calculated absolute noise level for both scenarios. The calculated change in noise level is also detailed along with the subsequent magnitude of impact.</p> <p>Table 4.1: Change in Noise Levels Due to Operational Road Traffic Noise</p> <table border="1"> <thead> <tr> <th rowspan="2">Road Name</th> <th rowspan="2">Link Name</th> <th colspan="2">Calculated Absolute Noise Level (dB)</th> <th rowspan="2">Calculated Change in Noise Level (dB)</th> <th rowspan="2">Magnitude of Impact</th> </tr> <tr> <th>2035 Without Development</th> <th>2035 With Development</th> </tr> </thead> <tbody> <tr><td>Bracklesham Lane</td><td>2626_40190</td><td>51.8</td><td>64.2</td><td>12.5</td><td>Major</td></tr> <tr><td>Moutheys Lane</td><td>3160_40146</td><td>50.7</td><td>60.2</td><td>9.4</td><td>Major</td></tr> <tr><td>Clay Lane</td><td>4647_4746</td><td>54.7</td><td>62.9</td><td>8.2</td><td>Major</td></tr> <tr><td>Clay Lane</td><td>4647_4747</td><td>55.7</td><td>63.1</td><td>7.4</td><td>Major</td></tr> <tr><td>Clay Lane</td><td>3454_4747</td><td>55.7</td><td>63.1</td><td>7.4</td><td>Major</td></tr> <tr><td>Station Road</td><td>2653_2757</td><td>53.5</td><td>60.8</td><td>7.3</td><td>Major</td></tr> <tr><td>Clay Lane</td><td>2757_40146</td><td>55.3</td><td>62.3</td><td>7.0</td><td>Major</td></tr> <tr><td>Clay Lane</td><td>3454_40146</td><td>53.4</td><td>59.7</td><td>6.3</td><td>Major</td></tr> <tr><td>Broad Road</td><td>1854_40168</td><td>51.8</td><td>57.6</td><td>5.8</td><td>Major</td></tr> <tr><td>Bell Lane</td><td>2626_2834</td><td>60.1</td><td>65.5</td><td>5.4</td><td>Major</td></tr> <tr><td>Southbrook Road</td><td>2659_2661</td><td>52.8</td><td>58.1</td><td>5.3</td><td>Major</td></tr> <tr><td>Fishbourne Road (East)</td><td>4746_4845</td><td>58.5</td><td>63.7</td><td>5.3</td><td>Major</td></tr> <tr><td>B2146</td><td>2659_2757</td><td>55.0</td><td>60.0</td><td>5.0</td><td>Major</td></tr> <tr><td>Cheesemans Lane</td><td>1864_40135</td><td>60.0</td><td>64.3</td><td>4.3</td><td>Minor</td></tr> <tr><td>Cheesemans Lane</td><td>1861_40166</td><td>60.3</td><td>64.3</td><td>4.0</td><td>Minor</td></tr> <tr><td>Cheesemans Lane</td><td>1861_40135</td><td>60.6</td><td>64.4</td><td>3.9</td><td>Minor</td></tr> <tr><td>Woodmancote Lane</td><td>1362_40157</td><td>52.8</td><td>56.7</td><td>3.9</td><td>Minor</td></tr> <tr><td>Old Farm Lane / Whitechimney Row / East Street</td><td>1260_40136</td><td>57.2</td><td>60.8</td><td>3.7</td><td>Minor</td></tr> <tr><td>A27</td><td>50223_50225</td><td>59.8</td><td>63.1</td><td>3.6</td><td>Minor</td></tr> <tr><td>Tangmere Road</td><td>50225_50226</td><td>61.6</td><td>65.2</td><td>3.5</td><td>Minor</td></tr> <tr><td>Pound Farm Road</td><td>7348_8002</td><td>56.7</td><td>60.2</td><td>3.5</td><td>Minor</td></tr> <tr><td>Pound Farm Road</td><td>7048_8002</td><td>57.5</td><td>60.6</td><td>3.1</td><td>Minor</td></tr> </tbody> </table>					Road Name	Link Name	Calculated Absolute Noise Level (dB)		Calculated Change in Noise Level (dB)	Magnitude of Impact	2035 Without Development	2035 With Development	Bracklesham Lane	2626_40190	51.8	64.2	12.5	Major	Moutheys Lane	3160_40146	50.7	60.2	9.4	Major	Clay Lane	4647_4746	54.7	62.9	8.2	Major	Clay Lane	4647_4747	55.7	63.1	7.4	Major	Clay Lane	3454_4747	55.7	63.1	7.4	Major	Station Road	2653_2757	53.5	60.8	7.3	Major	Clay Lane	2757_40146	55.3	62.3	7.0	Major	Clay Lane	3454_40146	53.4	59.7	6.3	Major	Broad Road	1854_40168	51.8	57.6	5.8	Major	Bell Lane	2626_2834	60.1	65.5	5.4	Major	Southbrook Road	2659_2661	52.8	58.1	5.3	Major	Fishbourne Road (East)	4746_4845	58.5	63.7	5.3	Major	B2146	2659_2757	55.0	60.0	5.0	Major	Cheesemans Lane	1864_40135	60.0	64.3	4.3	Minor	Cheesemans Lane	1861_40166	60.3	64.3	4.0	Minor	Cheesemans Lane	1861_40135	60.6	64.4	3.9	Minor	Woodmancote Lane	1362_40157	52.8	56.7	3.9	Minor	Old Farm Lane / Whitechimney Row / East Street	1260_40136	57.2	60.8	3.7	Minor	A27	50223_50225	59.8	63.1	3.6	Minor	Tangmere Road	50225_50226	61.6	65.2	3.5	Minor	Pound Farm Road	7348_8002	56.7	60.2	3.5	Minor	Pound Farm Road	7048_8002	57.5	60.6	3.1	Minor

4.	<p>Summary</p> <p>The assessment has demonstrated that a number of existing roads are likely to be above the DMRB threshold and therefore merit further investigation. It should be noted that the number of links exceeding the threshold is significantly reduced with the introduction of transport mitigation measures.</p> <p>For new roads associated with the proposed development there are likely to be changes in noise levels. However, these should be fully assessed during the planning applications to determine the level of impact based on the existing sound climate of the area.</p>
