| 16 | Plan Area Infrastructure Needs | 125 |

# Section A – Introduction and Context

## 1. Introduction

- 1.1 The provision of local infrastructure is a very important issue for the development of local communities. The delivery of the right levels and type of infrastructure is essential to support new homes, economic growth and the creation of sustainable communities.
- 1.2 This document supports the objectives outlined in the Chichester Local Plan Review on infrastructure needs within the District, excluding the area within the South Downs National Park (i.e. the Chichester Local Plan Area). The Local Plan Review sets out the necessary social, physical and green infrastructure which will be required to ensure that sustainable communities are created and developed. To help achieve this, the Infrastructure Delivery Plan will identify the strategic infrastructure requirements for the Plan Area, who will provide it and when it is expected to be delivered.
- 1.3 The IDP plays an important role in the preparation and adoption of a reviewed Community Infrastructure Levy (CIL) Charging Schedule for the Chichester Local Plan Area by providing evidence of a need for infrastructure investment and forms the basic justification for setting a levy rate.
- 1.4 The Infrastructure Delivery Plan may also help Town and Parish Councils in the production or review of Neighbourhood Plans.
- 1.5 Infrastructure planning helps to ensure that there is a common understanding between service providers, developers, local communities and the Council as to the local infrastructure needs, and to ensure that infrastructure is properly planned for, funded and provided in time with planned development in the Plan Area. Where possible, the IDP sets out an estimate of likely costs associated with each project/ programme. In the future, this document will be updated and monitored as necessary to reflect changes as infrastructure is provided and new needs identified.
- 1.6 The information which City, Town and Parish Councils provided as part of previous consultations will be included in the Infrastructure Business Plan rather than the IDP. **The IDP focuses on the strategic infrastructure required to support delivery of the Chichester Local Plan Review.**

## 2. What is infrastructure?

- **2.1** Infrastructure is defined in Section 216 (1) of the Planning Act 2008 in relation to the Community Infrastructure Levy as a funding mechanism. The word 'infrastructure' is defined in section 216 (2) of the Planning Act 2008, as including:
- (a) roads and other transport facilities,
- (b) flood defences,
- (c) schools and other educational facilities,
- (d) medical facilities,
- (e) sporting and recreational facilities
- (f) open spaces, and
- (g) affordable housing [...]."
- **2.2** For the purpose of this document, the definition of key infrastructure categories, and the elements within each group, is set out in the table below:

| Category  | Elements relevant in Chichester District |
|-----------|--|
| Transport | Road                                     |
|           | Bus                                      |
|           | Rail networks                            |
|           | Cycling and walking infrastructure       |
| Education | Further and higher education             |
|           | Secondary and primary education          |
|           | Early Years                              |
|           | Special Educational Needs                |
| Health    | Acute care and general hospitals         |

| Category                      | Elements relevant in Chichester District   |
|-------------------------------|--|
|                               | Community and Mental Health facilities   |
|                               | Primary Care facilities i.e. General Practitioner (GP) practices   |
| Social Infrastructure         | Social and Community facilities  |
|                               | Sports and leisure facilities  |
| Green Infrastructure          | Open spaces and parks  |
|                               | Habitats Regulations Assessment mitigation – interventions necessary to mitigate the effects of development on European-designated conservation sites. In Chichester District these sites are mainly protected through payments (provided through Unilateral Undertakings) for management measures, but they can also be protected by the provision of Suitable Alternative Natural Greenspaces (SANGS) provided as on site mitigation as part of this Plan. |
|                               | Flood defences   |
|                               | Rivers and streams (blue corridors)  |
| Public and Community Services | Emergency services (police, fire and rescue, and ambulance)  |
|                               | Libraries  |
|                               | Cemeteries and crematoria  |
|                               | Waste management and disposal  |
| Utility Services              | Wastewater treatment and sewerage  |
|                               | Water supply   |
|                               | Electricity and gas distribution   |
|                               | Telecommunications/Digital infrastructure  |

## 3. The Local Plan

- 3.1 The Chichester Local Plan Review identifies strategic infrastructure provision as one of its key objectives.
- 3.2 Local Plan Policy S12: Infrastructure Provision will require new development to be supported by necessary infrastructure and that it is provided in a timely manner, through developer contributions:

## **Policy S12: Infrastructure Provision**

The Council will work with neighbouring councils, infrastructure providers and stakeholders to ensure that new physical, economic, social, environmental and green infrastructure is provided to support the development provided for in this Plan.

Development and infrastructure provision will be coordinated to ensure that growth is supported by the timely provision of adequate infrastructure, facilities and services. The Infrastructure Delivery Plan will be used to identify the timing, type and number of infrastructure requirements to support the objectives and policies of the Plan as well as the main funding mechanisms and lead agencies responsible for their delivery.

All development will be required to meet all the following criteria:

- 1. Make effective use of existing infrastructure, facilities and services, including opportunities for co-location and multi-functional use of facilities;
- 2. Provide or fund new infrastructure, facilities or services required, both on and off-site, (including full fibre communications infrastructure) as a consequence of the proposal;
- 3. Safeguard the requirements of infrastructure providers, including but not limited to:
  - electronic communications networks (particularly high speed broadband),
  - electricity power lines,
  - high pressure gas mains,
  - educational facilities,
  - · health facilities, and
  - · aquifer protection areas.

- 4. Facilitate accessibility to facilities and services by a range of transport modes; and
- 5. Where appropriate:
  - Phase development to coordinate with the delivery of necessary infrastructure, facilities and services;
  - Provide for the future maintenance of infrastructure, facilities or services provided as a result of the development.

Decisions on the provision of infrastructure should be based on a whole life costs approach.

If infrastructure requirements could render a development unviable, proposals for major development should be supported by an independent viability assessment on terms agreed by the relevant parties including the Council and County Council, and funded by the developer. This will involve an open book approach. Where viability constraints are demonstrated by evidence, the Council will:

- prioritise developer contributions made through CIL for essential and then other infrastructure in accordance with the detailed requirements set out in the Infrastructure Delivery Plan; and/or
- use an appropriate mechanism to defer part of the developer contributions requirement to a later date; and
- as a last resort, refuse planning permission if the development would be unsustainable without inclusion of the unfunded infrastructure requirements taking into account reasonable contributions from elsewhere including CIL.

# 4. Background to the Infrastructure Delivery Plan

- 4.1 Creating sustainable communities is about providing the necessary supporting infrastructure of utility services, transport, schools, open space, community, health, and leisure services. The preparation of this Infrastructure Delivery Plan will help coordinate services as it will identify who will be delivering what and by when.
- 4.2 At the heart of this process is the development of land and buildings that provide the services for places and communities. Where expected development is identified, the capacity of existing services to accommodate growth needs to be captured and any gaps in provision clearly set out.
- 4.3 New development often provides the opportunity to deliver facilities and services that may be lacking in that particular location. Where sufficient capacity does not already exist to meet the need created by new residents or users of a development, the development should contribute what is necessary, either on site or by making a financial contribution towards provision or enhancement elsewhere.
- 4.4 Some elements, such as the delivery of utility infrastructure, will be an integral part of all new development. Other elements, particularly community, recreation and transport contributions will relate to the identified needs that would arise from a development in a particular location. These requirements will be informed by infrastructure planning work and the planning application process.
- 4.5 Some of the key infrastructure services are provided by the private sector within a regulatory framework, overseen on behalf of the Government by independent regulators. Those that are particularly relevant to delivering the Local Plan Review are:
  - Water and sewerage companies overseen by Ofwat (Office of Water Services);
  - Gas and electricity markets overseen by Ofgem (Office of Gas and Electricity Markets);
  - UK communications industries overseen by Ofcom (Office of Communications); and
  - Britain's railways overseen by ORR (Office of Rail Regulation).
- 4.6 The ability of some services to take a long term view on the provision of additional infrastructure is affected by the regulatory framework which commonly reviews a shorter time period than the Local Plan. Where major increases in capacity are required, then costs may need to be spread over more than one cycle of the regulatory framework.

- 4.7 West Sussex County Council is one of the key providers of a number of important services in Chichester District. These include: social services; education; fire and rescue; waste management; library services; and highways and transport. The County Council has developed a Strategic Infrastructure Package (SIP) to enable the provision of County Council services to meet the needs of new strategic development. This also helps to coordinate and align service delivery with the expected levels of development set out in the Chichester Local Plan Review.
- 4.8 Highways England is responsible for operating, maintaining and improving the strategic road network in England on behalf of the Secretary of State for Transport. In the Chichester Local Plan Area, Highways England is responsible for the A27 trunk road.

# Methodology

- 4.9 A pro-forma together with explanatory letter, a draft housing distribution and map of Local Plan area was circulated to all infrastructure and service providers on the Council's contact database. Respondents were asked to provide information on:
  - current capacity or existing levels of use;
  - future capacity (of infrastructure in its current form);
  - improvements that are already planned and what would be needed to accommodate the proposed levels of development in the area covered by the Chichester Local Plan to 2035; and
  - timescale for the improvements to be implemented.

# 5. Community Infrastructure Levy (CIL)

- 5.1 Infrastructure required to mitigate the site specific impacts of a development and make it acceptable in planning terms is secured through a Section 106 agreement and infrastructure required to mitigate the cumulative impact of development is secured by a tariff called the Community Infrastructure Levy (CIL). The local on-site and off-site infrastructure required to service individual sites is achieved by agreements with utility companies directly with developers. The costs incurred in providing this infrastructure are additional to those incurred through the CIL or Planning Obligations
- Planning regulations state that there should be no 'double charging' for infrastructure through CIL and Section 106. Since April 2015 the government restricted the pooling of S106 contributions to 5 applications (with the exception of affordable housing contributions and S278 agreements entered into with Highways England, where the pooling restrictions do not apply).
- 5.3 Planning obligations (despite having been scaled back) play a key role in relation to affordable housing and certain site specific requirements. A Planning Obligations and Affordable Housing Supplementary Planning Document (SDP) shows how S106 planning obligations, planning conditions, and Highways S278 agreements work together as a set of tools to help achieve sustainable development. This SPD will be reviewed, following the Local Plan Review.
- The Council implemented the Community Infrastructure Levy on 1 February 2016, following the adoption of the current Local Plan. The introduction of the CIL was preceded by Viability Assessment evidence, two rounds of public consultation and an independent Examination. A new Viability Assessment is being undertaken and the CIL will be reviewed alongside the Local Plan Review.
- 5.5 Chichester's CIL covers the Local Plan Area. It does not include parts of the district within the South Downs National Park as the South Downs National Park Authority has its own CIL.
- 5.6 The IDP provides evidence of the need for infrastructure investment in the Chichester Local Plan Area and forms the basic justification for a review of the CIL charge. It shows a draft infrastructure funding gap of £324,058,022, which CIL could be put towards, along with other funding sources.

# 6. Format of the Infrastructure Delivery Plan

- 6.1 Section B provides further details on strategic infrastructure provision and funding sources for the various infrastructure categories. It identifies the key issues for the Chichester Local Plan Review area and the strategic infrastructure that may be required to support further development. It should be noted that this section does not include all infrastructure required; it discusses infrastructure needs in broad terms.
- 6.2 Section C sets out the infrastructure delivery schedules for each of the strategic site allocations in the Chichester Local Plan Review, followed by a schedule of general Plan Area-wide infrastructure delivery
- 6.3 Where available, estimated costs are provided which inform the infrastructure funding gap demonstrated in the table overleaf.

## 7. Infrastructure Costs

- 7.1 The table below identifies the draft cost of infrastructure by category and details of S106 funding, showing the total cost of infrastructure still to be funded. The costs shown are estimates derived from the information available at the time of publication.
- 7.2 Other funding sources are likely to be available which will contribute towards the costs of the infrastructure schemes. Where known, these details have been provided in the Infrastructure delivery Schedules in Section C.

| Infrastructure Category                               | Draft Total Cost <sup>1</sup> |
|---|-------------------------------|
| Transport   | 77,620,900                    |
| Education   | 21,200,000 <sup>2 3</sup>     |
| Health  | 175,640,222                   |
| Social Infrastructure                                 | 19,710,000                    |
| Green Infrastructure                                  | 37,014,068                    |
| Habitats Regulations Mitigation                       | 3,369,166                     |
| Public Services                                       | 2,285,230                     |
| Utility Services                                      | 0                             |
| Draft Infrastructure Total                            | £336,839,586                  |
| Less existing S106 funding available <sup>4</sup>     | £2,867,208                    |
| Less anticipated S106 funding (estimate) <sup>5</sup> | £2,141,463                    |
| Less other known funding <sup>6</sup>                 | £7,772,893 (CIL)              |
| Draft gap in infrastructure funding <sup>7</sup>      | £324,058,022                  |

<sup>&</sup>lt;sup>1</sup> The total estimated infrastructure cost (taken from the Infrastructure Delivery Schedules in Section C) has been used to calculate the draft total cost

<sup>&</sup>lt;sup>2</sup> The costs estimates include construction, fees, equipment and ICT but exclude the cost of land purchase, infrastructure costs outside the site boundary and site abnormalities

<sup>&</sup>lt;sup>3</sup> The total estimated cost does not currently include potential expansions of existing primary and secondary schools

<sup>&</sup>lt;sup>4</sup> The amount of S106 received and available to use from development that has commenced

<sup>&</sup>lt;sup>5</sup> The amount of S106 that has been agreed but not yet received from development that has planning permission but has not yet commenced

<sup>&</sup>lt;sup>6</sup> This is CIL funds which have either been received or are committed.

<sup>&</sup>lt;sup>7</sup> As at September 2018

# Section B – Infrastructure Position Statement

# 8. Transport

| Transport elements – Strategic Road Network |  |  |
|---|--|--|
| Lead Organisation(s)                        | Highways England West Sussex County Council (WSCC)   |  |
| Main Sources of Information                 | Peter Brett Associates (PBA) – Chichester Local Plan Transport Study 2018  |  |
| Existing Provision                          | A27 – the east to west trunk road running across the southern part of the Local Plan Review area   |  |
| Future requirements                         | There have been longstanding plans by Highways England to resolve the congestion problems of the A27 corridor, including the Chichester Bypass.  |  |
|   | Following the public response to the publication of options for the six junctions on the A27 Chichester Bypass in July-September 2016, it was clear that there was no preferred option, and accordingly in February 2017, the SOS withdrew the RIS 1 improvements for this section of the A27.   |  |
|   | The Chichester Local Transport Study 2018 undertaken by consultants PBA sets out the necessary strategic transport improvements to deliver the growth identified in the Local Plan Review.   |  |
| Cross Boundary Issues                       | The A27 is the main trunk road along the south coast as such there are cross-boundary issues with the neighbouring District of Arun, Borough of Havant, and South Downs National Park Authority. The impacts of planned development in these neighbouring authorities will need to be taken into account in planning improvements.                 |  |
| Funding Sources                             | Potentially sources of funding include: Coast to Capital Regional Growth Fund, Local Enterprise Partnership, Road Investment Strategy, Housing Infrastructure Fund, government grants and Developer contributions through S106/S278.   |  |
| Key Issues                                  | Highways England is responsible for the A27 trunk road, including the Chichester Bypass.   |  |
|   | The objectives of the Chichester Local Plan review revolve around the Plan Area's economic growth and providing the required levels of new housing as identified in the HEDNA. Major new development in the Plan Area will be necessary to achieve these objectives, which will have an impact on the transport infrastructure, including the A27. |  |
|   | The Council works in partnership with Highways England and West Sussex County Council to pursue  |  |

| common transport goals, which will include potential new road infrastructure on or around the |
|---|
| strategic road network, as well as changing travel behaviours and promoting the use of more   |
| sustainable modes of transport.   |

| Transport Elements – Local Road Network |   |  |
|---|---|--|
| Lead Organisation(s)                    | West Sussex County Council (WSCC)   |  |
| Main Sources of Information             | Peter Brett Associates (PBA) – Chichester Local Plan Transport Study 2018   |  |
|   | Chichester Strategic Infrastructure Package for current planned improvements  |  |
| Existing Provision                      | West Sussex County Council is the designated local highways authority for the District. It has  |  |
|   | responsibility for the provision and maintenance of most of the District's local transport infrastructure.  |  |
| Future requirements                     | There are a number of improvements needed to the local road network as set out in this IDP  |  |
| Cross Boundary Issues                   | Traffic on the A27 and A259, and proposed development in Arun and Havant (Hampshire) along this corridor is a key cross boundary issue. The planning authorities will work jointly to further consider cross boundary transport matters to inform both Local Plans, Transport Assessments and IDPs.   |  |
| Funding Sources                         | WSCC capital programmes   |  |
|   | Local Sustainable Transport Fund (LSTF)   |  |
|   | Single Growth Fund (LTB administered)   |  |
|   | Developer contributions will provide a wide range of new transport infrastructure as part of the development process. Funding can include payment for new access construction, public transport infrastructure such as bus stops and signage, supporting improvements at rail stations, real time information, waiting shelters, pedestrian crossings, cycle infrastructure and junction improvements. Site specific measures will be provided through S106 planning obligations and/or S278/S38 highways agreements. |  |
|   | Infrastructure associated with the overall growth of the area may be funded from the CIL as identified in the regulation 123 list.  |  |
| Key Issues                              | West Sussex County Council has responsibility for the provision and maintenance of most of the district's local transport infrastructure.   |  |
|   | There is high demand for travel in Chichester and many factors contribute to the transport problems. Chichester city and the Manhood Peninsula suffer from road congestion, especially at peak times.   |  |

| Ensuring accessibility to services and determining the best pattern of transport provision are amongst the most challenging spatial issues which the Council and the other service providers need to address.                                  |
|--|
| The Local Plan Review and IDP will assist the District Council and the County Council in identifying road transport infrastructure requirements and how they can be delivered, i.e. through developer contributions and other funding sources. |
| Targeted investment to improve local transport infrastructure, focusing on delivery of improved and better integrated bus and train services, and improved pedestrian and cycling networks.  |
| Implementation of behaviour change measures to reduce the use of the private car (Smarter Choices).  |

| Transport elements – Rail Services |   |  |
|------------------------------------|---|--|
| Lead Organisation(s)               | Southern – train operating company  |  |
|                                    | Network Rail – main infrastructure provider   |  |
| Main Sources of Information        |   |  |
| Existing Provision                 | Rail services along the West Coastway rail line through Chichester District operate between Brighton and Littlehampton to the east, and Portsmouth and Southampton to the west, with occasional services extending to and from the route to Bristol and beyond. Services operate through the District between Portsmouth and Southampton, and along the Arun Valley to Horsham, Crawley, Gatwick Airport and London Victoria.   |  |
|                                    | For communities in the north of the Plan Area, the nearest accessible rail stations are on the line from Havant through Petersfield and Haslemere to London Waterloo. Chichester has five stations at Chichester, Fishbourne, Bosham, Nutbourne and Southbourne.  |  |
| Future requirements                | Committed and proposed improvements are focused on the Brighton Main Line services due to capacity constraints into London, including proposed signalling schemes, platform schemes at Gatwick and Redhill. The Thameslink Programme (due for completion in 2018) will also increase capacity across London, connecting with Crossrail services running east-west across London. These schemes will indirectly benefit services from the Arun Valley and Chichester by providing more |  |

|                       | capacity for other services on the Brighton main Line and expanding journey opportunities.  |
|-----------------------|---|
| Cross Boundary Issues | The Cross Boundary Issues are described above.  |
| Funding Sources       | Funding for improvements to the main rail infrastructure is provided by Network Rail. The train operating companies are responsible for improvements to the stations, as the buildings are leased to the operator by Network Rail as the franchise. Funding for the rolling stock is provided by the train operating companies.   |
| Key Issues            | The existing timetable for West Coastway and Arun Valley services does accommodate conflicting demands, but the nature of the routes means there is little flexibility for change.  |
|                       | The West Coastway infrastructure is mainly a two track railway throughout with limited opportunities for overtaking of differing types of train services. End-to-end journey times along the coast struggle to provide a competitive alternative to the road network. West of Brighton, the only passing places are at Barnham for westbound services and at Worthing and Hove for eastbound services, and this can create reliability problems.  |
|                       | This means there is little opportunity to enhance service levels with the current mix of fast and stopping services. Given demand volumes on the West Coastway relative to the busy radial routes into London, it would be difficult to justify any route enhancements that require significant changes to infrastructure. However, there are local and regional aspirations to expand the role of the West Coastway route, by improving strategic inter-urban journey times and also by increasing accessibility to the network with new stations.   |
|                       | All surface-level level crossings in the County are the subject of an on-going review to see if changes to or closures of certain crossings can be achieved in an attempt to improve rail services whilst maintaining safety, improving air quality and road journey time, and reducing congestion on the road network. However, any changes could have major implications such as delays on certain parts of the network and large-scale re-routing, so would need to be modelled very carefully and further in-depth study work would be required to establish viability of any scheme/proposal. Also if crossings were closed for car traffic, alternative measures would have to be implemented for pedestrians & cyclists. Impact on local shops and services (including emergency access) would also need to be carefully considered and overall appropriate mitigation put in place. |
|                       | The Government will continue to play a strategic role in the future of rail provision in the UK and hence the areas surrounding Chichester. Infrastructure levels, service frequencies and most fares can be determined by the Department for Transport through the franchising process. Network Rail   |

| will be undertaking Route Studies as part of their Long Term Planning Process which will update the |
|---|
| Route Utilisation Strategy process:   |
| http://www.networkrail.co.uk/improvements/planning-policies-and-plans/long-term-planning-           |
| process/route-studies/  |

| Transport elements – Bus Services |   |
|-----------------------------------|---|
| Lead Organisation(s)              | West Sussex County Council  |
|                                   | Stagecoach Bus Company  |
|                                   | Compass Travel  |
| Main Sources of Information       | National strategic and policy initiatives set at Government level   |
| Existing Provision                | The city has one major provider of bus services, Stagecoach South, who run routes to all areas of the District.   |
|                                   | 51 Chichester to Selsey (15 minutes frequency)  |
|                                   | 52/53 Chichester to the Witterings (15 minutes frequency)   |
|                                   | 55 Chichester to Tangmere (20-25 minutes frequency)   |
|                                   | 56 Chichester to Bosham (1 hour 30 minutes frequency)   |
|                                   | 60 Chichester to Midhurst (30 minutes frequency)  |
|                                   | Stagecoach also operates the 700 Coastliner service between Portsmouth and Brighton, this runs every 20 minutes and connects Chichester to Havant, Portsmouth, Bognor Regis, Yapton and Littlehampton. It passes through many of the communities in the East – West Corridor, including Southbourne, Bosham and Fishbourne. |
|                                   | Compass Travel provides services on a contracted basis, often in rural areas where services are not commercially viable.  |
|                                   | A programme of investment to provide Real Time Passenger Information (RTPI) at selected bus stops in Chichester city and at Chichester rail station is underway.  |
|                                   | New low floor accessible buses have been purchased by Stagecoach, and operate on routes into  |

|                       | Chichester, such as 51 from Selsey, 60 to Midhurst, and 700 Coastliner.   |
|-----------------------|---|
| Future requirements   | Stagecoach has been fully engaged in the Southern Gateway project and the provision of identifying suitable stopping facilities for bus passengers. There is a need to find suitable places for buses to  |
|                       | park overnight and to be maintained.  |
| Cross Boundary Issues | The main cross boundary bus routes are the 700 Coastliner linking Chichester to Portsmouth in the west and Brighton in East Sussex to the east. The 60 bus route links Chichester to Midhurst.  |
| Funding Sources       | West Sussex County Council  |
|                       | Developer contributions – site specific measures will be funded through S106.   |
|                       | Infrastructure associated with the overall growth of the area may be funded from CIL.   |
|                       | Government grants (e.g. Local Sustainable Transport Fund).  |
|                       | Bus operators.  |
| Key Issues            | Buses are the most used form of public transport for local journeys. The Government's aim is to drive up standards to provide a better quality service for those who already use buses and an attractive alternative for those who currently drive for short journeys. Working in partnership with the public and private sector, the County and District Councils also aim to increase the move toward bus use and increased passenger satisfaction. |
|                       | Since the deregulation of bus services in 1986 private operators provide the majority of bus services on a commercial basis. This is a key issue as bus operators run routes that are commercially viable. Routes can be withdrawn due to not being financially viable and this raises the question of accessibility and equality.  |
|                       | The County Council can subsidise the provision of 'socially necessary' bus services where these are not likely to be provided commercially. This is subject to budgetary pressures.   |
|                       | The Local Plan has a role to play in encouraging a more sustainable pattern of transport use and encourage new development that is located and designed to minimise the need to travel.   |
|                       | Stagecoach is faced with the problem of crossing the A27, which creates delays thus reducing the service it is able to offer its customers.   |
|                       | <u> </u>  |

| Transport elements - Walkin | g and Cycling   |
|-----------------------------|---|
| Lead Organisation(s)        | West Sussex County Council  |
|                             | Chichester District Council   |
| Main Sources of Information | Local Cycling and Walking Infrastructure Plan (LCWIP)   |
| Existing Provision          | The cycle network in Chichester has evolved over time and is fairly extensive for a city the size of Chichester. The majority of the network is connected and convenient. However, tin places it is disjointed. There are places where it has poor quality surfacing and signage and improvements are needed to encourage and sustain the required volume of sustainable transport trips that the district council wants to encourage.  |
|                             | The National Cycle Network (NCN) route 2 passes through the Plan Area, it runs from Bognor Regis to Emsworth and is predominately an off-carriageway shared cycle/pedestrian path. Along the A259 between Chichester and Emsworth it is a combination of an on-carriageway cycle lane and off-carriageway shared path. From Emsworth the route continues towards Havant. Some sections of the route are relatively disjointed and may not provide the most direct or convenient route for cyclists. |
|                             | An off-road cycle and pedestrian route, Centurion Way, has been created along the former Chichester to Midhurst railway alignment. This links the city with the South Downs National Park.  |
|                             | There are other named cycle routes from Chichester into the surrounding countryside, including the Salterns Way to West Wittering, which makes use of public rights of way and quiet lanes; and the Chichester Ship Canal towpath to Hunston.   |
|                             | To encourage and support the use of the cycle network there are education, skills and information initiatives for children and adults. These include Bikelt, Online Cycle Journey Planners and Bikeability training.  |
|                             | There are many footpaths/public rights of way both within Chichester and connecting to the surrounding countryside such as Chichester Harbour and the South Downs National Park. This includes long distance paths and a network of footpaths, bridleways and byways.   |
| Future requirements         | Chichester District Council is working with authorities across West Sussex to produce a Local Cycling and Walking Infrastructure Plan (LCWIP). DfT funding has been made available and it is intended   |

|                       | that the LSWIP will be adopted by Spring 2020. The aim of the Plan is to develop the cycling and walking network within Chichester City and neighbouring parishes to encourage increased cycling and walking using tools developed by DfT to enhance desire lines to and from strategic destinations. This will enable routes to be prioritised for future investment in order that infrastructure improvements can be brought forward. The CDC LCWIP will complement the WSCC Walking and Cycling Strategy which was adopted in 2017. |
|-----------------------|--|
|                       | Other planned improvements to the network include routes in Summersdale and Barnfield areas of the city. In addition there are a number of improvement schemes including general road and pedestrian surface maintenance and improved pedestrian crossing facilities.  |
|                       | Chichester city:   |
|                       | - Completion of the Chichester cycle network by delivery of strategic cycle routes linking the city centre with Portfield, Parklands, Summersdale and Oving  |
|                       | - Consider a balanced solution for the Northgate Gyratory (subject to further detailed modelling assessment work).   |
|                       | North East of Chichester:  |
|                       | - Introduce cycle route linking Westhampnett to the city centre.   |
|                       | Tangmere:  |
|                       | - Enhanced routes between Chichester and Tangmere and Shopwyke.  |
| Cross Boundary Issues | Cycling and pedestrian links to the South Downs National Park via Centurion Way, and other cycle routes linking Chichester to Havant and Bognor Regis in Arun District.  |
| Funding Sources       | WSCC   |
|                       | Whilst WSCC as Highways Authority has the responsibility to maintain rights of way, the Chichester Harbour Conservancy, through the County Council precepts, also funds maintenance and repair works to rights of way.   |
|                       | Developer contributions - Site specific measures will be funded through S106.  |

|            | Infrastructure associated with the overall growth of the area may be funded from the CIL  |
|------------|---|
|            | Local Sustainable Transport Fund (LSTF) and other Government funding sources  |
|            | Sustrans  |
| Key Issues | A key issue for the Local Plan Review is increasing accessibility. Most trips in urban areas are under 2 miles, a distance that can be easily made on foot or cycled. This also includes enhanced pedestrian facilities and safer, more attractive cycle routes, as well as improving safety, security and new cycle parking and other end of trip facilities.        |
|            | Other issues include: the condition and connectivity of the cycle and pedestrian network, the barrier caused by busy roads – particularly the A27, access to the SDNP, safe crossing facilities, ensuring new routes are safe and attractive to cyclists and pedestrians, preferably traffic free and direct.   |
|            | National and local policy recognises the positive contribution to priorities made by walking and cycling trips, these include improved health, reducing urban congestion and pollution, and bringing economic and social benefits. Increasing the number of trips made by walking and cycling will assist in meeting these priorities.                                |
|            | The Government recognises the importance of improved environment for walkers and cyclists, particularly in giving priority to pedestrians and cyclists in town centres and ensuring the appropriate infrastructure for walking and cycling is built into new developments, with good networks for off-road and leisure cycling.                                       |
|            | The County Council has published a Rights of Way Improvement Plan which sets out a strategic approach to managing public access. The overall aim is to enable the rights of way network to provide for the needs of walkers, cyclists and equestrians and those with mobility difficulties. Its objectives include improving accessibility, connectivity and quality. |
|            | Consideration should also be given to horse riders, both on and off road usage, who contribute significantly within local economies and are very vulnerable road users.   |
|            | The Local Plan Review has an important role to play in taking a spatial approach to improving accessibility and improving the attractiveness of alternative modes of transport to the car. Cycle  |

routes should be coherent, connected, attractive, direct and safe and provide an enjoyable and practical alternative to car use. Commuter routes would take priority over leisure use.

The Local Plan review can also support the West Sussex Transport Plan in seeking Travel Plans from both small and larger development proposals, particularly commercial, including measures to encourage walking and cycling. Cumulative traffic impacts can be evident from both small and large scale development.

# 9. Education

| Education – Early Years Provision |  |
|-----------------------------------|--|

|                     | Thorney Island  • Thorney Island Nursery   |
| Future requirements | There are also 55 registered childminders operating in the area.  It is essential that an appropriate amount of early years and childcare provision is available early in the development of the new community to meet the immediate needs of the residents.  The County Council have a statutory duty to secure sufficient childcare, so far as is reasonably practicable, for working parents, or parents who are studying or training for employment, for children aged 0-14 (or up to 18 for disabled children). |
|                     | Demand for places: The starting point is to calculate the number of children in each age group expected from the new housing. The West Sussex Section 106 planning obligations (2016) has indicated an adjusted population multiplied by average child product for houses of 14 children per year of age per 1,000 persons and for flats of 5 children per year of age per 1,000 persons.  |

|                       | Where there is an outline planning application or an allocated site, it is presumed that the development is a mixture of houses and flats (¾ houses and ¼ flats). The average house size and average persons per household for that District or Borough is used in the calculation, with a 2011 census basis. Using this calculation, gives an average child product of 12 children per year of age, per 1000 homes.   |
|-----------------------|--|
|                       | Where the housing mix is not yet determined, the average occupancy rate used to calculate early years and childcare requirements is 2.28 persons per dwelling. Based on this, a development of 1,000 homes would indicate a population of 2,280 persons. Using a child product of 12 children per year of age per 1,000 persons gives 27 children per year of age (12 x 2.28 = 27.36).   |
|                       | Therefore, based on historic trends in take up data, on average, WSCC assume the need for 50 new early years and childcare places per 1,000 houses   |
|                       | Further information can be found in Appendix 2 of this document: <a href="https://www.westsussex.gov.uk/media/10685/childcare_suff.pdf">https://www.westsussex.gov.uk/media/10685/childcare_suff.pdf</a>   |
| Cross Boundary Issues | There are cross-boundary education issues with the South Downs National Park   |
| Funding Sources       | Early Years Capital Fund   |
|                       | Public sector  |
|                       | Private sector   |
|                       | This may be funded from the CIL as identified in the draft regulation 123 list.  |
| Key Issues            | In September 2017 WSCC implemented the government's initiative to provide 30 hours a week of free childcare for working parents of children aged 3 and 4 years in England. This is in addition to the existing 15 hours of free early education, which is available to all three and four year olds and eligible two year olds. The funding pays for 570 hours per year of flexible early education and care. Demand for this entitlement is growing and as such current sufficiency is being monitored closely. |

| <b>Education – Primary Schools</b> |   |
|------------------------------------|---|
| Lead Organisation(s)               | West Sussex County Council  |
| Main Sources of Information        | Planning School Places 2018   |
| Existing Provision                 | There are 30 primary schools serving the plan area:   |
|                                    | Birdham CE Primary School, Birdham  |

| Funding Sources       | Central government grant   |
|                       | Chichester District Council requires developer contributions towards the cost of education provision for any development which gives rise to increased need if the current capacity of the existing schools exceeds 95%.   |
|                       | New Primary schools at West of Chichester; Southbourne and Tangmere Strategic Site Allocations will be funded through S106.  |
|                       | Infrastructure associated with the overall growth of the area may be funded from the CIL as identified in the draft Regulation 123 list.   |
| Key Issues            | West Sussex County has indicated that at a certain level, large-scale strategic development will require new and additional educational facilities, while other development may require improved   |

| facilities.  |
|--|
| There is considerable pupil movement in the south of the plan area, making detailed planning more difficult. Chichester District adjoins Hampshire and Surrey and has good rail and road links which aid pupil movement across the area and between local authorities. The availability of church schools also attracts children from some distance. |
| Developer contributions from S106 do not reflect the true cost of providing a new school and these are topped up with the basic need grant if available.   |
| <b>Bourne</b> . The Planning Area will continue to operate very close to its overall capacity whilst the large year groups from previous years work their way through the system.  |
| There are a number of housing developments going ahead and planned for across the Planning Area which will be monitored for their effect on the schools and their capacities. There may be the need to create some additional space within the Planning Area at a later date including at secondary.   |
| Chichester The Planning Area will be operating very close to its overall capacity for the foreseeable future with some schools operating over their capacity.  |
| Manhood The current housing developments have added immense pressure to the primary schools in the Planning Area at primary level. The provision of additional capacity is required to meet the needs of the residents.  |

| Main Sources of Information       | Planning School Places 2018   |
| Existing Provision                | There are 6 secondary schools serving the plan area:  |
|                                   | <ul> <li>Bishop Luffa Church of England School, Chichester (academy)</li> <li>Chichester High School (academy)</li> </ul> |

|                       | <ul> <li>The Academy, Selsey (academy)</li> <li>Chichester Free School (Free School)</li> <li>Bourne Community College</li> <li>There is one secondary school within the South Downs National Park where the catchment area extends into the Chichester Local Plan Area:</li> <li>Midhurst Rother College, Midhurst (academy)</li> <li>There are a number of private (fee-paying) secondary schools located in the plan area and beyond.</li> </ul>   |
|-----------------------|---|
| Future requirements   | Currently the secondary schools in the Chichester Planning Area could all accommodate additional pupils either by way of expansion or in the accommodation they already have, especially the high school academy in Chichester which is low on pupil numbers at present.  |
| Cross Boundary Issues | The District adjoins the neighbouring educational authorities of Hampshire and Surrey. There are good rail and road links which aid pupil movement across the area and between local authorities. Secondary schools serving the north of the plan area are located in Horsham District (The Weald, Billingshurst) and Surrey.  In Arun District, St Philip Howard Catholic High School (Barnham) and Ormiston Six Villages Academy may also cater for pupils from the Chichester Local Plan area. |
| Funding Sources       | Central government Basic Need Grant S106 Basic need grant topped up by CIL for school places as identified in the regulation 123 list.  |
| Key Issues            | West Sussex County Council has indicated that at a certain level, large-scale strategic development will require new and additional educational facilities, while other development may require improved facilities. |  | Future requirements         | Given the level of development anticipated in the Local Plan Review expansion of sixth form provision will be required later in the plan period.  At Chichester College there will be a requirement to replace some very sub-standard teaching accommodation and the refurbishment of buildings to accommodate new courses. Motor vehicle is  |

|                       | currently taught off-site at Terminus Road and this needs to be brought back to campus but will         |  |  |  |
|-----------------------|---|--|--|--|
|                       | require significant building works. Sufficient infrastructure will be required to handle an increase in |  |  |  |
|                       | student numbers, which will occur as the demographic increases  |  |  |  |
| Cross Boundary Issues | Transport links – bus and rail  |  |  |  |
| Funding Sources       | The College receives its funding from the Education and Skills Funding Agency (ESFA), commercial        |  |  |  |
|                       | income and grants.  |  |  |  |
| Key Issues            | Key issues for the college are as follows:  |  |  |  |
|                       | Suitable and sufficient infrastructure to support the College requirements. The river Lavant is prone   |  |  |  |
|                       | to flooding. Dependable transport to and from areas of student recruitment. Affordable car parking      |  |  |  |
|                       | costs in local car parks. Traffic congestion from the A27 impacts on the smooth access of vehicles to   |  |  |  |
|                       | and from the College site.  |  |  |  |

| Education – Special Schools |   |
|-----------------------------|---|
| Lead Organisation(s)        | West Sussex County Council  |
| Main Sources of Information |   |
| Existing Provision          | There are 3 special schools serving the Plan area:  |
|                             | <ul> <li>Fordwater School - ages 2 to 19</li> </ul>   |
|                             | <ul> <li>Littlegreen School (within the South Downs National Park) - ages 7 to 14</li> </ul>  |
|                             | St Anthony's School - ages 4 to 16  |
| Future requirements         |   |
| Cross Boundary Issues       | Littlegreen School is in Compton within the South Downs National Park   |
| Funding Sources             | Central government grant  |
|                             | Funds may be available from the CIL, as identified in the draft regulation 123 list.  |
| Key Issues                  | West Sussex County has indicated that large-scale strategic development may require new and additional educational facilities, while other development may require improved facilities. |

| Education – Higher Education |  |  |
|------------------------------|--|--|
| Lead Organisation(s)         | University of Chichester   |  |
| Main Sources of Information  | University of Chichester Strategic Plan 2018-25, Estate Strategy 2018-25                       |  |
| Existing Provision           | Total number of students 5541, Undergraduate total 4651, Postgraduate total 890                |  |
| Future requirements          | As new undergraduate and postgraduate courses are developed at the University in the next five |  |

|                       | years, there will be a requirement for new academic building provision at the Bishop Otter Campus. This will likely be located along the University's eastern boundary, associated with the construction of the north east link road into the University from Graylingwell Drive and the realignment and reorganisation of the University's main car park. The provision of future academic courses may necessitate some sensitive and appropriate redevelopment/repurposing of buildings, both academic and residential situated in the Conservation Area. The University also requires new student accommodation either on the campus or close to it. The University is aware that water pressure to the University Campus is at times less than adequate necessitating the use of storage tanks to meet demand. The issue can be overcome by using water storage, however, the adequacy of the water supply infrastructure to the area should be explored with the statutory undertaker, in this case Portsmouth Water. |  |
|-----------------------|--|--|
| Cross Boundary Issues | Transport Links to the University Campus at Bognor Regis   |  |
| Funding Sources       | Student Fees, Student Accommodation Fees, Financial Institutions.  |  |
| Key Issues            | Availability of land for potential expansion - constraints on the University from the recently extended Conservation Area. Shortage of available and suitable student accommodation on or close to the University campus. Poor Water Supply pressure, sub- optimal fast rail links to London.  |  |

|  | (modifica) with some ageing built for purpose premis   |                                       |                   |        |  |

The CCG does not have direct capital funding for Primary Care services. There are limited and scarce funds available that have to be applied for at a regional / national level. Capital funding may become available through the Sussex and East Surrey Sustainability and Transformation Partnership (STP). Whilst projects for health provision at Southern Gateway and west of city centre are on the prioritised list, there is no guarantee of receipt of funding given the significant shortfall in capital funding across all NHS estate, including hospital, community and mental health, as well as primary care.

Criteria such as new developments and developer contributions are a key factor in decision making, as the funding available needs to be directed to area of need (and funding is scarce). The key question from central NHS funds is "what funding has been secured from housing development" when applying for any central capital investment.

The funding for new builds or Premises extensions/infrastructure comes from materially 2 sources, linked on the whole to new housing development growth.

- i. S.106 funds (or CIL equivalent)
- ii. CCG revenue allocation

Revenue funds from the NHS are used to run and maintain services that continually have a higher demand than the resource available. Health funds are provided and used for the existing population of the area and thus housing growth infrastructure costs are sourced and necessary from housing developments.

Revenue funds for Health organisations are limited and challenging currently. Many NHS bodies did not meet the requirement to break even financially, and in 2016/17 Coastal West Sussex CCG was one of those bodies. As such, funding for the foreseeable future will be exceedingly limited, as there remains a requirement to payback any financial gaps and at the same time there is a requirement still to make year on year efficiency savings (cash releasing).

NHS/Local Improvement Finance Trust (LIFT)/Third Party Development - not yet clearly defined. However, this funding will be prioritised to address condition and capacity of existing infrastructure to deliver existing patient needs, not growth.

|            | Infrastructure related to the overall growth of the area may be funded from the CIL as identified in the draft Regulation 123 list. This includes a minimum of £1.75m towards facilities at or serving the Whitehouse Farm development at the West of Chichester Strategic Development Location.                 |
|------------|--|
| Key Issues | The estate in Chichester is 'old' and does not readily support the patient numbers. Patient demand is high in Chichester and outlying areas with all four city centre surgeries at or nearing capacity; moreover one surgery has closed its list size which is impacting on capacity at the remaining surgeries. |
|            | The Coastal West Sussex Clinical Commissioning Group is planning to undertake a feasibility study for the Chichester area.   |

| St. Richard's Hospital      |  |
|-----------------------------|--|
| Lead Organisation(s)        | Western Sussex Hospitals NHS Foundation Trust  |
| Main Sources of Information | Western Sussex Hospitals NHS Foundation Trust  |
| Existing Provision          | St Richard's Hospital has 467 beds and provides a full range of acute hospital care, including accident and emergency services, acute medical care, maternity and children's services and a range of surgical specialties.   |
|                             | It also has a purpose built NHS Treatment Centre on site which offers safe, fast, pre-booked day and short stay surgery and diagnostic procedures.   |
|                             | The area served by St Richard's Hospital is around 400 sq miles. It covers the whole of the Chichester Local Plan area. It consists of the coastal areas of Selsey, Chichester Harbour, Littlehampton and Bognor Regis, together with the city of Chichester and the South Downs market towns of Midhurst, Billingshurst, Pulborough, Arundel and Petworth. Patients from East Hampshire also access St. Richard's Hospital.   |
| Future requirements         | Western Sussex Hospitals NHS Foundation Trust is in the process of refreshing its clinical and Estate Strategies to: respond effectively to demographic growth; enhance patient experience and safety; maximise the use of current hospital buildings; and comply with statutory requirements. To do so, the following changes to the estate are likely, but not limited to:  Increase Accident and Emergency capacity, with opportunity to accommodate an Urgent Treatment Centre;  Improved outpatient department; |

| Cross Boundary Issues | <ul> <li>Increase ward capacity;</li> <li>Improved size, capacity and functionality or operating theatres;</li> <li>Improved women and children's services capacity;</li> <li>Enhance diagnostic provision such as imaging capacity;</li> <li>Redesign and rebuild of the sterile services unit.</li> </ul> Arun and Hampshire  |
|-----------------------|---|
| Funding Sources       | In addition to Western Sussex Hospitals NHS Foundation Trust own internal generated capital funding, the Trust will seek to access additional external NHS funding and Community Infrastructure Levy.   |
| Key Issues            | It is essential that there is sufficient acute hospital provision at St. Richard's to meet the needs of the growing population resulting from predicted housing growth in the Chichester Local Plan Area. St. Richard's Hospital will also need to respond to both the housing growth planned by other District and Borough housing areas in the area, as well as to the significant demographic changes expected during the same period. Within the Coastal West Sussex Area, the number of residents aged 65 to 84 is predicted to increase by 39% from 104,000 to 145,000, and for those over 85 predicted to increase by 114% from 20,000 to 42,000 over the plan period    |
|                       | Both housing growth and an ageing population are likely to have a significant impact on St Richard's Hospital. The impact of the housing growth will depend upon the demographic makeup of the new residents, as younger households will have different health needs to that of older ones. If however, for illustrative purposes, there were a net increase in bed requirements of 2% a year, this would equate to an additional 175 beds or approximately 7 new wards by 2034 together with the associated clinical support functions. Affordable housing for keyworkers would also be a critical component for ensuring sufficiency of staffing to meet this type of growth. |
|                       | The hospital site is also relatively constrained by the surrounding residential and student accommodation. Therefore, working with partners taking a whole system approach will be crucial to meeting the anticipated increase in demand.   |

## 11. Social Infrastructure

| Sports, Leisure and Playing I | Pitch Facilities   |
|-------------------------------|--|
| Lead Organisation(s)          | Chichester District Council  |
|                               |  |
|                               | Sport England  |
|                               | Private Sector   |

|                               | Chichester Open Space, Indoor Sports and Playing Pitch Strategy 2018                                 |
| Existing Provision            | There are a wide range of sport and recreation facilities across the Plan Area including health and  |
|                               | fitness clubs, sports halls, swimming pools, synthetic turf pitches and bowls facilities.            |
|                               | There are three Council owned leisure centres in Chichester, Southbourne and Midhurst which are      |
|                               | managed by Sport and Leisure Management Limited (trading as Everyone Active). They offer a           |
|                               | range of sporting activities and their sports development team offer support to clubs and teams      |
|                               | across the district and also run a variety of sports courses and events throughout the year.         |
| Future requirements           | Football   |
|                               | The Playing Pitch Strategy has identified a future need for the equivalent of 2-3 full size floodlit |
|                               | Artificial Grass Football Pitches. Possible sites:   |
|                               | Bishop Luffa School (3G football & rugby share)  |
|                               | Oaklands Park stadia pitch (3G football)   |
|                               | Chichester High School/Southern Gateway (3G football)  |
|                               | Chichester College (9v9)   |
|                               | Bourne Community College (school/football)   |
|                               | Other opportunities include:   |
|                               | Enhancements to facilities at Tangmere   |
|                               | On-site provision at Southern Gateway  |
|                               | Enhancements to off-site provision at Southbourne  |
|                               | Cricket  |
|                               | Replacement cricket pitch at Graylingwell Park   |
|                               | Reinstatement of cricket ground at Oaklands Park   |
|                               | Rugby  |
|                               | Access to another 2-3 rugby pitches  |

|                       | <ul> <li>Hockey</li> <li>Access to two additional sand based Artificial Grass Pitches as a hub site for Hockey in</li> </ul>   |
|-----------------------|--|
|                       | Chichester City.   |
| Cross Boundary Issues |  |
| Funding Sources       | Chichester District Council  |
|                       | Government grants  |
|                       | Developer contributions through S106 for site specific requirements.   |
|                       | Infrastructure related to the overall growth of the area may be funded from the CIL as identified in the draft Regulation 123 list.  |
|                       | External funding (e.g. Trusts; private provision, Lottery funding, Governing Body funding)   |
| Key Issues            | CDC needs to ensure that it has sufficient indoor and outdoor leisure activities and premises to cater for both residents and visitor requirements in the future. It is likely that demand for leisure facilities will increase in the future so it is important that this demand is met.  |
|                       | The recommendations of the Open Space Study, Indoor Sports and Playing Pitch Strategy (2018) have been taken into account in the preparation of the Chichester Local Plan Review.  |
|                       | It is proposed through the Local Plan Review that developers will be required to contribute towards the provision of open space, sports and recreation facilities and provide facilities on larger development sites. The Council will work with towns and parishes preparing Neighbourhood Plans to identify suitable sites for the provision of sport and leisure facilities where particular deficiencies and local needs have been identified. |

| Community Facilities        |   |
|-----------------------------|---|
| Lead Organisation(s)        | Chichester District Council, in consultation with Parish Councils   |
| Main Sources of Information | Chichester District Council annual Community Facilities Audit;  |
|                             | Chichester District Council Assessing Need and Demand for indoor sports facilities, June 2018   |
| Existing Provision          | Within the Plan Area there are numerous community buildings in community ownership, providing a wide range of local facilities and accommodating an even wider range of local groups and organisations. |

|                       | Many of these facilities were built historically when community sizes were smaller, and accommodating increased demand from development requires expansion or adaption.   |
|-----------------------|---|
| Future requirements   | The Community Facilities Audit maps the planned improvements to many of the buildings by their respective owners, although often these will be responsive to housing developments.  |
|                       | With larger developments, CDC would look to ensure appropriate provision within the site for the cohesion and sustainability that offers to new communities.  |
| Cross Boundary Issues |   |
| Funding Sources       | Developer contributions through S106 where provision is necessary to make the development acceptable in planning terms.   |
|                       | Infrastructure related to the overall growth of the area may be funded from the CIL as identified in the draft Regulation 123 list.   |
|                       | Chichester District Council   |
|                       | External funding (national funders e.g. Lottery, Trusts and other funders)  |
|                       | Local fundraising – recognising the benefits to existing residents  |
| Key Issues            | CDC needs to ensure that adequate provision is made for community assembly and social activity to cater for the needs of future residents. Housing development creates additional demand, and consultation with the providers helps to establish the extent to which existing facilities can accommodate, or accommodate with some enhancement, or identify that new facilities need to be created. The annual Community Facilities Audit was devised to provide a database of this information to inform planning consultations. |
|                       | The District Council will work with parishes preparing Neighbourhood Plans to identify opportunities for the enhancement of existing provision or new facilities.   |

## 12. Green Infrastructure

| Green Infrastructure (GI)   |   |
|-----------------------------|---|
| Lead Organisation(s)        | Chichester District Council   |
|                             | West Sussex County Council  |
|                             | Natural England   |
|                             | Chichester Harbour Conservancy  |
|                             | South Downs National Park Authority   |
| Main Sources of Information | Open Space, Indoor Sports and Playing Pitch Strategy Study 2018   |
|                             | Natural England Green Infrastructure Guidance   |
|                             | South East River Basin Management Plan  |

|                             | Chichester AONB Landscape Character Assessment, 2005 and CDC Landscape Capacity Assessments (2009 and 2011) – a review of which is to be published later in 2018. |
|                             | WSCC Landscape Studies  |
|                             | South Downs National Park key objectives and emerging Local Plan  |
| Existing Provision          | Chichester Harbour Area of Outstanding Natural Beauty     South Downs National Park   |
|                             | Parks and Gardens   |
|                             | Natural and Semi-Natural Green Space  |
|                             | Amenity Greenspace  |
|                             | Allotments and Community Gardens     Green Corridors  |
|                             | <ul> <li>Green Corridors</li> <li>Beaches and seafront</li> </ul>   |
|                             | Wetland areas, waterways and ditches  |

|                       | <ul> <li>Canals, river corridors, tributaries and valleys of the River Lavant, River Kird and River Ems</li> <li>Public Rights of Way</li> </ul>  |
|-----------------------|---|
| Future requirements   | Potential for improvement/enhancements to areas through Green Infrastructure. Green Infrastructure will be provided through Strategic Development Locations and small scale development at settlement hubs and service villages. This will contribute to existing GI and enhance or improve other areas.  |
| Cross Boundary Issues | SDNP Arun Havant (Hampshire) Waverley (Surrey) Horsham  |
| Funding Sources       | Developer contributions through S106 where provision is necessary on site to make the development acceptable in planning terms.  Infrastructure related to the overall growth of the area may be funded from the CIL as identified in the draft Regulation 123 list.  |
| Key Issues            | Green infrastructure encompasses the full range of natural and historic landscape, including waterways, woodlands, and green corridors, and access to and between these features. It brings many social, economic and environmental benefits, attracting investment, jobs and people. For example, well-designed and integrated green infrastructure can assist with promoting a sense of community and providing opportunities for recreation.                 |
|                       | Natural England promotes green infrastructure as an important component of the infrastructure required to support sustainable growth. It also has an important role in enabling landscapes to become more responsive to climate change, such as absorbing CO2, heat and flood control. It remains important to protect and where possible enhance areas that are important and valued for their nature, flora, fauna, geological and biodiversity conservation. |
|                       | Green infrastructure must be adequately resourced up front to meet capital and on-going revenue needs. Multi-functional land use is key to achieving value for money by planning, creating and managing areas to produce multiple public and environmental benefits, sharing resources between sites and combining investment from different sectors.   |
|                       | The requirement for open space, sport and recreation facilities is likely to continue, not least because the need to build at higher densities will require the continued provision of high quality open space. Enhanced access provision can assist with connecting local communities as well as individuals'  |

| personal health needs.   |
|--|
| GI, in the form of public rights of way, also provide access to services, commuting facilities, and support many local businesses, such as cycle hire shops and equestrian supplies. Public rights of way provide a range of multi-functional benefits (health, economy, reduced pollution, biodiversity). |
| The Local Plan is the delivery mechanism for ensuring GI is provided as part of development, linking with existing GI, enhancing or improving other areas and ensuring mitigation for those areas that where GI will be lost through development.  |
| A Green Infrastructure Strategy will be produced in order to provide a detailed strategy for implementing the delivery of an integrated green infrastructure network.  |

| Mitigation under the Habitats Regulations Assessment |   |
|--|---|
| Lead Organisation(s)                                 | Solent Recreation Mitigation Partnership (including Chichester  |
|  | District Council and Natural England), operating as Bird Aware Solent.                                |
|  |   |
|  | Pagham Harbour Mitigation Partnership (between Chichester District Council and Arun District          |
|  | Council)  |
| Main Sources of Information                          | Bird Aware Solent Website   |
|  | http://www.birdaware.org/   |
|  | Bird Aware Solent Strategy 2018   |
|  | http://www.birdaware.org/strategy   |
|  | Map – Special Protection Areas (SPA) in the Bird Aware Solent region                                  |
|  | http://www.birdaware.org/CHttpHandler.ashx?id=27400&p=0   |
|  | Pagham Harbour Joint Scheme of Mitigation   |
|  | http://chichester.moderngov.co.uk/ielssueDetails.aspx?IId=4976&Opt=3                                  |
| Existing Provision                                   | Policy DM30: Development and Disturbance of Birds in Chichester and Langstone Harbours Special        |
|  | Protection Areas has been written to ensure that impacts from recreational disturbance are mitigated. |
|  | Development that results in net new residential and holiday accommodation within the Chichester       |
|  | Harbour SPA zone of influence (5.6km) can opt to mitigate the impact of additional recreational       |

|                       | disturbance on the SPA through a contribution to the Bird Aware Solent scheme. Similarly developments within the Pagham Harbour zone of influence (3.5km) can opt to contribute to that scheme. Development can also opt to make its own mitigation provision, but this must be funded in perpetuity as the partnership schemes are. Development that falls within both zones will only pay the higher contribution of the two.  Larger developments and those in close proximity to an SPA site boundary may be required to provide additional mitigation measures within the development, site for example provision of a dog walking route within the open space provision. This will be assessed on a case by case basis. |
|-----------------------|---|
| Future requirements   | For both Chichester Harbour and Pagham Harbour contributions will be sought to improve/enhance/link existing green infrastructure to encourage disturbance away from sensitive areas, or creation of new "open spaces". Developers would be expected to provide alternative recreational space.   |
| Cross Boundary Issues | For Chichester and Langstone Harbours this issue is being dealt with through a partnership approach across the Solent authorities.  For Pagham Harbour this issue is being dealt with through a partnership approach between Chichester District Council and Arun District Council.   |
| Funding Sources       | Developer contributions through S106.   |
| Key Issues            | Defined protected habitats should be safeguarded in order to protect the existing biodiversity of the area. Within the Chichester Harbour AONB the Chichester Harbour Conservancy's primary concern is to achieve favourable conservation status of the European sites and species.   |
|                       | CDC and SDNPA have policies in their Local Plans to protect and enhance these areas through development, delivered through small scale Green Infrastructure initiatives.  |
|                       | It remains important to avoid development in sensitive areas that are valued for their ecology. Where this is not possible, development should seek to mitigate any likely adverse effects. This includes development that has an impact on Chichester Harbour and Pagham Harbour Special Protection Areas and the Medmerry Compensatory Habitat.   |

| Flood Defences              |   |
|-----------------------------|---|
| Lead Organisation(s)        | Chichester District Council   |
|                             | West Sussex County Council  |
|                             | Environment Agency  |
| Main Sources of Information | Beachy Head to Selsey Bill Shoreline Management Plan  |
|                             | North Solent Shoreline Management Plan (2010)   |
|                             | Chichester District Strategic Flood Risk Assessment 2018  |
|                             | The Pagham to East Head Coastal Defence Strategy  |
| Existing Provision          | The Manhood 16km coastline is actively protected. This is mostly Chichester District Council's frontage but the Environment Agency manages 5km over the Medmerry and Pagham frontages.  |
| Future requirements         | The Manhood Peninsula Surface Water Management Plan will be undertaken by West Sussex County Council as Lead Local Flood Authority.   |
|                             | The Environment Agency continually monitors the risk of fluvial and coastal flooding to communities in the Manhood Peninsula and produces up to date flood mapping.   |
|                             | A beach management plan in the Selsey/Bracklesham/Wittering is being undertaken by CDC.   |
|                             | The community in Bosham, in partnership with West Sussex County Council, the Environment Agency, Chichester District Council and Chichester Harbour Conservancy aims to build a small section of sea wall as an extension to the existing Trippett Sea Wall; however funding for this has not yet been secured. |
|                             | Works will be required in the next 5+ years to protect Apuldram's STW.  |
| Cross Boundary Issues       | Havant (Hampshire)  |
|                             | Arun  |
| Funding Sources             | Defra's Flood Defence Grant in Aid (FDGiA) is the key source of funding for the Environment Agency's flood and coastal risk management (FCRM) works. However due to partnership funding rules, FDGiA is extremely unlikely to fund 100% of any FCRM schemes in Chichester District.                             |

|            | Contributions will be required from other funding sources, including from the community, for any future works or schemes.  Developer contributions through S106 where provision is necessary to make the development acceptable in planning terms.  |
|------------|---|
|            | Infrastructure related to the overall growth of the area may be funded from the CIL as identified in the draft Regulation 123 list.   |
| Key Issues | Failure to provide adequate flood defences could lead to extensive property damage and possible land loss within Chichester District.   |
|            | The onset of climate change needs to be mitigated for and the implementation of a long term, deliverable strategy will help to achieve this.  |
|            | The Local Plan will provide the policy framework to mitigate against the adverse effects of climate change by locating new development in areas that are less prone to flooding. This will include development on the coast where a lack of adequate seas defences could lead to property damage. |
|            | The Local Plan recognises the benefits of green infrastructure - such as SUDs and permeable surfaces - being incorporated within developments to reduce the possibility of flooding.  |

| Allotments                  |   |
|-----------------------------|---|
| Lead Organisation(s)        | Parish and Town Councils  |
| Main Sources of Information | Open Space, Indoor Sports and Playing Pitch Strategy Study 2018   |
| Existing Provision          | There 14.36 hectares of allotments at present. The Open Space Study 2018 identified a shortfall of 12.92 hectares of allotments across the District.  |
| Future requirements         | Protection of existing allotments through Local Plan policies, with the possible provision of allotments/community orchards through strategic and small Site Allocations and Neighbourhood Plans. |
| Cross Boundary Issues       |   |
| Funding Sources             | CDC   |
|                             | Developer contributions through S106 for on-site provision.   |

|            | Infrastructure related to the overall growth of the area may be funded from the CIL as identified in the draft Regulation 123 list.   |
|------------|---|
| Key Issues | Allotment gardening makes an important contribution to the quality of people's lives. It has an important role to play in creating and maintaining healthy neighbourhoods and sustainable communities.  |
|            | It can provide health benefits improving both physical and mental health, providing a source of recreation and contributing to green and open space provision. Allotments can also help in adapting to and mitigating the adverse impacts of climate change by encouraging the provision of locally sourced food. |
|            | Responsibility for the management of allotments lies with Parish, City and Town Councils.   |

## 13. Public Services

| <b>Emergency Services - Police</b> |   |
|------------------------------------|---|
| Lead Organisation(s)               | Sussex Police   |
| Main Sources of Information        | Sussex Police   |
| Existing Provision                 | <ul> <li>Stations at: <ul> <li>Chichester</li> <li>Selsey</li> <li>Chichester Custody Centre – private Finance Initiative building providing custodial services for West Sussex.</li> </ul> </li> <li>In the South Downs National Park at: <ul> <li>Midhurst</li> <li>Petworth</li> </ul> </li> </ul>   |
| Future requirements                | ESTATE Chichester Police Station Financial support to fill funding gap of £400,000 to deliver the necessary refurbishment works at Chichester Police station. This project will cost £1.3m to deliver and a maximum budget of £900,000 has been secured. This will provide an adequate level of future proofing for the police station and increase capacity of this site by a minimum of 20 staff. |
|                                    | Projected additional personnel requirements Sussex Police calculations project that a minimum of 27 new dedicated or divisional officer and 8 staff roles would be required to mitigate the growth outlined in Chichester over the development plan period. This equates to a minimum cost of £288,886 for training and equipping new officers and staff (not including revenue costs).             |
|                                    | <b>Vehicles</b> The average capital cost of a new vehicle is £17,000 (not including fuel and maintenance). The guideline for the majority of marked vehicles is to replace every four years or £125,000 miles. The condition of vehicles at the end of their police life varies. However, Sussex Police forecast that they will redeem, on average 5% of a vehicles value on disposal.              |
|                                    | The development will require fleet investment far exceeding 4 years therefore Sussex Police would   |

|                       | require at least an 8 year life of provision. This contribution is justified because there is insufficient funding within the police's revenue income to take on the capital cost after just four years, without diverting money from elsewhere. Sussex Police estimate that the 4 year lifetime cost per vehicle is approximately £42,240 including running costs and capital charges. |
|-----------------------|---|
|                       | ANPR Cameras  |
|                       | 1) A27 Chichester bypass 2 x dual lane reading cameras  |
|                       | 2) A286 Chichester to Lavant road 1 x dual lane camera  |
|                       | 3) B2178 Chichester 1 x dual Lane camera  |
|                       | 4) A285 Chichester near Sainsbury's 1 x dual Lane camera  |
|                       | 5) Claypit Lane Chichester 1 x dual Lane camera   |
|                       | 6) A285 Tinwood area 1 x dual lane camera   |
|                       | 7) B2179 West Wittering 1 x dual lane camera  |
|                       | 8) A286 Birdham 1 x dual lane camera  |
|                       | 9) Tangmere Lane 1 x dual lane camera   |
| Cross Boundary Issues | With Surrey and Hampshire   |
| Funding Sources       | Council tax precepts (revenue)  |
|                       | Police Capital Grants – Home Office Grant   |
|                       | Capital receipts from sales   |
|                       | Police Reserves   |
|                       | S106 for infrastructure that is necessary to make the development acceptable in planning terms.   |
|                       | Infrastructure related to the overall growth of the area may be funded from the CIL as identified in the draft Regulation 123 list.   |
| Key Issues            | Sussex Police has a number of Crime Prevention Design Advisors who champion a scheme called   |

| 'Secure by Design'. Through design, the scheme aims to enhance security, reduce crime, create a safe and sustainable community and reduce demands on police resources. Design and access statements that are required for many planning applications should demonstrate how crime prevention measures have been considered.        |
|--|
| There will need to be an increase in IT infrastructure and investment in mobile data to provide a response to an increasing population and more sharing and investment with local authority and other key partner facilities.  |
| Not only does an increase in population affect local policing, it also draws upon other resources based outside of Chichester, such as Roads Policing, Firearms response, Custody provision and the arrangements of a PFI facility. It also means that there is increased demand and that will mean an impact on Community Safety. |

| Emergency Services – Fire ar | Emergency Services – Fire and Rescue Service                                  |  |
|------------------------------|---|--|
| Lead Organisation(s)         | West Sussex County Council is the fire authority with statutory               |  |
|                              | responsibility under the Fire and Rescue Services Act 2004.                   |  |
| Main Sources of Information  | West Sussex Fire and Rescue Integrated Risk Management Plan 2018-2022         |  |
| Existing Provision           | Stations at:  |  |
|                              | Chichester: Service Headquarters, Immediate Response and retained Duty System |  |
|                              | East Wittering – On call Duty System  |  |
|                              | Selsey – On call Duty System  |  |
|                              | In the South Downs National Park at:  |  |
|                              | Midhurst – On call Duty System  |  |
|                              | Petworth – On call Duty System  |  |
|                              | Outside the plan area at:   |  |
|                              | Billingshurst – On call Duty System   |  |
|                              | Dunsfold – Surrey Fire & Rescue Service                                       |  |
|                              | Emsworth – Hampshire Fire & Rescue Service                                    |  |
|                              | Haslemere – Surrey Fire & Rescue Service                                      |  |
|                              |   |  |

|                       | As the Statutory Harbour Authority, the Chichester Harbour Conservancy assists the emergency services on water through the work of its Harbour Patrol Team.  |
|-----------------------|--|
| Future requirements   | West Sussex Fire and Rescue Service has recently formulated their Integrated Risk Management Plan 2018-2022. This plan sets out how WSFRS intends to drive continuous improvement and analyses current and projected future risk. This review may result in the need to relocate or revise the current fire cover provision within the Chichester District. This is at a very early stage, with station locations and crewing arrangements interdependent across the whole county. It is currently too early in the process to predict any further changes at this time.   |
| Cross Boundary Issues | Hampshire Fire & Rescue Service Surrey Fire & Rescue Service   |
| Funding Sources       | Funding for WSFRS currently comes from two main sources:  • Grant funding from government to WSCC  • Council Tax   |
|                       | The way funding is received from government is changing. The County Council will no longer receive money from the revenue support grant, a government grant given to WSCC which can be used to finance revenue expenditure on any service. This grant funding has been gradually declining over the past four years. Instead this element will be determined by the amount of business rates it can collect. Therefore the county needs to be a prosperous place and an attractive place to do business. There is no additional precept for the fire and rescue service on council tax bills in West Sussex. The fire and rescue budget is considered as part of the wider provision of county council services. |
|                       | Developers will also be required to contribute towards works that may be needed to fulfil the fire authority's duty to ensure the provision of an adequate access and supply of water for fire fighting. In addition, Community Infrastructure Levy funding may be required to make a proportionate contribution towards the provision of new fire fighting services or facilities to enable the fire and rescue service to meet its statutory requirements and prescribed standards of fire cover for the area. The costs are based on the additional population coming from the new development.   |
|                       | S106 where provision is necessary to make the development acceptable in planning terms.  |
|                       | Infrastructure related to the overall growth of the area may be funded from the CIL as identified in the draft Regulation 123 list.  |
| Key Issues            | Most of the Local Plan Area is currently classified as a low/medium critical fire risk. Developers will need to continue to liaise with the County Council Highways Department to ensure that suitable   |

| access to a new development is provided.   |
|--|
| There may also be the need to carry out work to ensure that sufficient supplies of water in terms of volume and pressure are available. The developer should provide the infrastructure required to serve a new development. |
| The increase in housing will increase the workload in terms of Community Safety and fire prevention.   |
| The impact of any accompanying infrastructure (eg schools, shops, leisure facilities) will further increase the demand of WSFRS Business Fire Safety team in auditing, fire protection and enforcement.                      |
| Some of the developments are also in rural locations and it would be important to the Fire Service that suitable accompanying provision for firefighting water (hydrant network) be included as part of the plan.            |
| The WSFRS recommend the installation of fire sprinkler systems into new properties, particularly in areas where travel distance from a Fire Station is significant.  |

| Emergency Services – Ambulance |  |
|--------------------------------|--|
| Lead Organisation(s)           | South East Coast Ambulance Service NHS Trust (SECAmb)  |
| Main Sources of Information    | South East Coast Ambulance Service NHS Trust   |
| Existing Provision             | Premises at:   |
| Future de suine e este         | Ambulance Community Response Post Chichester North      Ambulance Community Response Post Chichester North   |
| Future requirements            | In the South Downs National Park at: Midhurst Fire Station, where an Ambulance Community Response Posts is being developed in partnership with the West Sussex Fire & Rescue Service |
| Cross Boundary Issues          | None in terms of premises.   |
| Funding Sources                | Service level agreements with the region's Clinical Commissioning Groups, hospitals and mental health trusts.  |

|            | Infrastructure related to the overall growth of the area may be funded from the CIL as identified in the draft regulation 123 list.  |
|------------|--|
| Key Issues | The Trust responds to 999 calls from the public, urgent calls from health professionals and in Kent and Sussex. The Service:   |
|            | <ul> <li>Covers a geographical area of 3,600 square miles (Brighton &amp; Hove, East Sussex, West Sussex, Kent, Surrey, and North East Hampshire)</li> <li>Serves a resident population of 4.5 million</li> <li>Employs over 3,200 staff working across 70 sites in Kent, Surrey and Sussex.</li> <li>Received 688,714 emergency calls in 2010/11</li> </ul> |
|            | There have been increasing demands on the ambulance service and it is predicted that these will continue to rise, particularly in response to the increasingly ageing population in the region.  |

| Libraries                   |  |
|-----------------------------|--|
| Lead Organisation(s)        | West Sussex County Council   |
| Main Sources of Information | West Sussex County Council   |
| Existing Provision          | There are existing local libraries at; Chichester, Selsey, Southbourne and the Witterings. There is also a mobile library service provision throughout the District.   |
| Future requirements         | Planned provision of new library infrastructure in the District is through shared community space in SDLs. Improvements will be required to Southbourne library and Chichester Library.  |
| Cross Boundary Issues       |  |
| Funding Sources             | West Sussex County Council   |
|                             | Infrastructure related to the overall growth of the area may be funded from the CIL as identified in the Regulation 123 list. Improvements to Southbourne library required as a direct result of the new SDL at Southbourne will be required through S106.   |
| Key Issues                  | The County Council is continuing to explore opportunities for shared provision and use of buildings, expanding the virtual offer (e books and on-line services), the provision of unstaffed collections with self-service terminals in community buildings and a reassessment of the effectiveness of current library locations. In general this will mean a much more flexible approach to providing access to the Library Service than merely expanding or building more libraries. The requirement for infrastructure |

| to support additional developments will need to be equally flexible and creative. Solutions could include funding to support an expansion to the virtual offer, or to enable the creation of partnership opportunities that require conversions and alterations to provide access to the service rather than the physical building of additional space.   |
|---|
| The residential development proposed at the strategic development locations is likely to create additional demand for library provision. A flexible approach is needed whereby this provision is identified as part of a new community centre or school. This approach should be considered for Tangmere, West of Chichester and development in the north east section of the City. If a dual use (school and public) library is felt to be the best solution then provision is best incorporated at the point of design of a new school, rather than retrofitting to an existing school. Depending on the type of housing proposed for Southbourne, it may be appropriate to expand and enhance existing library provision including Southbourne Library and accommodate a Children & Family Centre. |

| Cemeteries & Crematorium    |  |
|-----------------------------|--|
| Lead Organisation(s)        | Chichester District Council Contract Services (Cemeteries)                                     |
|                             |  |
|                             | Dignity (Crematorium)  |
| Main Sources of Information | Chichester District Council  |
| Existing Provision          | Portfield Cemetery has sufficient provision within the existing cemetery for the next 5 years. |
|                             | Church run cemeteries – capacity varies  |
|                             | Petworth Cemetery (in the South Downs National Park) has                                       |
|                             | sufficient provision for the next 100 years.   |
|                             | Chichester Crematorium is run by Dignity, a private company                                    |
| Future requirements         | An extension to Portfield Cemetery   |
| ,                           | Expansion of Chichester Crematorium  |
| Cross Boundary Issues       | Some residents in the western part of Chichester choose to use the new Crematorium at Havant   |
| Funding Sources             | The Council owns the land for the extension, and the neighbouring developer will provide the   |
|                             | boundary fencing.  |
|                             | Cemetery fees for grave spaces.  |

|            | 50% of the costs are met by Chichester City Council (at Portfield)   |
|------------|--|
| Key Issues | The Council is responsible for cemetery provision. Other than the planned extension to Portfield Cemetery, there are no further requirements during the plan period. |

| Waste Planning              |  |  |
|-----------------------------|--|--|
| Lead Organisation(s)        | West Sussex County Council   |  |
| Main Sources of Information | West Sussex County Council and the South Downs National Park Authority Waste Local Plan (adopted April 2014)   |  |
|                             | The Waste Local Plan has been produced in partnership between West Sussex County Council and the South Downs National Park Authority.  |  |
|                             | The West Sussex Waste Local Plan covers the period to 2031 and sets out the vision and strategic objectives for waste planning.  |  |
|                             | The Waste Local Plan was adopted on 11 April 2014 and is now part of the Development Plan for West Sussex and the basis for all planning decisions relating to waste development in the Plan area.   |  |
| Existing Provision          | West Sussex County Council, as Waste Disposal Authority, is responsible for co-ordinating and managing the disposal of municipal waste, which includes household, some commercial waste, and waste deposited at Household Waste Recycling Sites. Infrastructure in the District includes Household Waste Recycling Sites at Westhampnett near Chichester (co-located with a Waste Transfer Station) and at Midhurst. |  |
|                             | Municipal waste in the District is collected by Chichester District Council (the Waste Collection Authority).  |  |
|                             | There is an existing network of waste management sites across the county which handle waste outside the control of the County Council. The Waste Local Plan includes a key diagram indicating the location of the main sites.  |  |
| Future requirements         | Policy W10 of the West Sussex Waste Local Plan Submission is concerned with strategic waste site allocations required to meet future forecast demand for waste treatment and disposal in the County. Along with a few other sites in the County, land at the Fuel Depot, Bognor Road, Chichester is proposed for allocation for a waste management facility. The allocation is supported by a range of               |  |

|                       | development management principles which indicate that the site is suitable, in principle, for the development of proposals for the transfer, recycling, and/or treatment of waste (including the recycling of inert waste).  |
|-----------------------|--|
|                       | The former fuel depot is approximately 4.8 hectares of land outside the defined built-up area. The waste management capacity achieved will depend upon the type of facility and chosen technology. The development principles for the site include height restrictions to protect views of Chichester Cathedral spire and to the South Downs National Park, and no direct access onto the A27. |
| Cross Boundary Issues | The Household Waste Recycling Site will be used by residents in the southern parts of the South Downs National Park.   |
| Funding Sources       | West Sussex County Council   |
|                       | Chichester District Council  |
| Key Issues            | The County Council's Chichester (Westhampnett) Household Waste Recycling Site (co-located with a Waste Transfer Station) was improved in 2005. There is a requirement to improve this site to provide additional capacity to support demands from future housing growth across the area, which has been identified in the Infrastructure Business Plan.  |

# 14. Utility Services

| Nastewater treatment and sewerage |   |  |
|-----------------------------------|---|--|
| Lead Organisation(s)              | Southern Water  |  |
| . ,                               | Thames Water  |  |
| Main Sources of Information       | Southern Water  |  |
|                                   | Thames Water  |  |
|                                   | Chichester Water Quality Group  |  |
|                                   | Position Statement on Wastewater and Delivering Development in the Local Plan.  |  |
| Existing Provision                | Waste water treatment is not constrained in pure engineering or economic terms but constraints exist relating to licencing of discharges to controlled waters, where extra discharge may pose a risk to protected waters, especially Natura 2000 sites (Special Protection Areas and Special Areas of Conservation) and RAMSAR sites. Additional treatment capacity could be provided but may require new technologies. The 5 year funding mechanism provides a suitable method to adapt to new development, giving time for assessment of impacts.   |  |
|                                   | <b>Wastewater sewerage system</b> - Southern Water is the statutory sewerage undertaker for most of West Sussex. There is a sewerage system, which is operated mainly under gravity, throughout Chichester Local Plan Area with limited spare capacity at Tangmere and Chichester (Apuldram) Wastewater Treatment Works (WwTW).   |  |
|                                   | The existing infrastructure capacity is adequate to serve existing development in the Plan Area. The Environment Agency will shortly be issuing a new position statement to prevent environmental harm and safeguard the special water environment of Chichester Harbour, whereby new development outside the Settlement Boundaries of Chichester, Fishbourne and Stockbridge will not drain to the Apuldram WwTW. It is expected that larger scale development will be directed to alternative WwTW catchments, notably Tangmere WwTW via the new sewer pipeline connection once operational. Some minor development could connect to the works as per the 2018 Position Statement on Wastewater and Delivering Development in the Local Plan (Apuldram WwTW). |  |
|                                   | Thames Water is the statutory sewerage undertaker for a small part of the northern area of the  |  |

|                       | District and are is hence a "specific consultation body" in accordance with the Town & Country Planning (Local Planning) Regulations 2012.  |
|-----------------------|---|
| Future requirements   | Southern Water submitted a new Business Plan to Ofwat in 2018 to cover the period 2020 to 2025.   |
|                       | A scheme to upgrade the Tangmere WwTW has been delivered and a new pipeline will soon be operational to enable new development within an expanded catchment area to be connected to the Tangmere WwTW.  |
|                       | Developers are encouraged to contact Southern Water or Thames Water (as appropriate) as early as possible to discuss their development proposals and intended delivery programme to assist with identifying any potential wastewater and water network reinforcement requirements. Where there is capacity constraint the Local Planning Authority will, where appropriate, apply phasing conditions to any approval to ensure that any necessary infrastructure upgrades are delivered ahead of the occupation of the relevant phase of development.   |
| Cross Boundary Issues | During the preparation of Havant's IDP, the capacity of wastewater treatment facilities was investigated. The Thornham WwTW at Southbourne currently serves a small proportion (<5%) of Havant Borough, in and around Emsworth. While it is estimated that there will be sufficient capacity at Budds Farm to treat waste water arising from new development in Havant Borough, the need for some additional capacity at Thornham WwTW for new developments in the Emsworth area shouldn't be ruled out. CDC has undertaken a review of all WwTW serving the Local Plan Area including Thornham and will be discussing the potential for upgrades across the plan area with Southern Water. |
| Funding Sources       | For local infrastructure: Developer charging system has recently changed. An element of the connection charge per property covers the cost on a regional basis of providing infrastructure enhancements to accommodate additional flows.  |
|                       | Charges for connection services are split into two categories:  |
|                       | <b>Network reinforcement charges</b> - the charges for work that is needed on the existing water or sewer network to provide for new development-related growth. These will be recovered through a new 'infrastructure charge'1, which will be fixed for both water and wastewater connections. The new infrastructure charge for wastewater connections on developments >20 houses is £765 per property and <20 houses is £550 per property. Water connections are £200 per property and this charge is waived on water efficient development (achieving 110 l/p/d or less).   |

**Site specific charges** - the charges for all work carried out on the development site and the pipework required to connect the new homes to the existing water main or sewer at a defined point of connection. This includes:

- new water service connections
- new water mains
- new drainage connections
- new sewers
- diversions of existing water mains and sewers that need to be moved on a development site.

Further details can be found in the following link:

https://www.southernwater.co.uk/media/default/PDFs/new-connection-charging-arrangements-18-19.pdf

Strategic infrastructure is financed by Southern Water through the Price Review process. Ofwat – the economic regulator of the water sector in England and Wales ensures that water companies can finance their functions, and regulates the prices customers pay by setting price limits every five years.

#### Key Issues

Southern Water has recently upgraded the existing infrastructure at Tangmere to increase its capacity.

Ultraviolet treatment has been installed and is operational on the storm overflow at Chichester (Apuldram) WwTW. This will offer some limited capacity for development.

In terms of sewerage (i.e. the underground sewer pipes and associated facilities that convey wastewater from individual homes and businesses to the works for treatment), capacity to service individual development sites will need to be assessed on a site by site basis.

Additional wastewater treatment and sewerage capacity would need to be provided to meet demand from new development. Development must be co-ordinated with provision of this infrastructure.

Southern Water can plan and fund additional wastewater treatment capacity through the water industry's periodic price review process. This is carried out by Ofwat, the water industry's economic regulator, every five years. Delivery of additional capacity is therefore achievable, provided Southern Water's investment proposals to Ofwat are necessary to support future development. Strategic development draining to Tangmere WwTW would need to be phased post 2020 to allow time to deliver the transfer pipework to this works.

| In terms of local sewerage infrastructure, the charging system for developers has recently changed. An element of the connection charge per property covers the cost, on a regional basis, of providing infrastructure enhancements to accommodate additional flows. The developer is expected to meet the off-site cost of connecting to the existing network. Charges are offset to recognise the future income from new customers. There is a need for improvements to the existing system, including the maintenance of pipe networks. |
|--|
| Sewerage infrastructure is a particularly significant issue for the proposed strategic sites that are located around Chichester city, if flows are required to be transferred to Tangmere WwTW.  |

| Water supply                |  |
|-----------------------------|--|
| Lead Organisation(s)        | Portsmouth Water   |
|                             | Thames Water   |
| Main Sources of Information | Portsmouth Water   |
|                             | Southern Water   |
|                             | Thames Water   |
| Existing Provision          | <b>Water resources</b> - Portsmouth Water is responsible for the supply of clean drinking water in the southern part of the plan area. Thames Water's water resource serves a small part in the north of the plan area, and Southern Water supplies water to the north eastern parishes in the plan area.  |
|                             | <b>Water distribution system</b> - Per Capita Consumption (PCC) is falling and despite a rising population Portsmouth Water is able to meet current and future demands for housing. The Company is operating within its abstraction licenses and has carried out a wide program of sustainability investigations and environmental improvements. |
|                             | Portsmouth Water's Water Resources Management Plan is based on Government population forecasts and Local Authority housing numbers. There is an integrated distribution system with the ability to transfer water from one part of the Company to another.   |
| Future requirements         | Portsmouth Water has spare capacity and some of this is currently transferred to Southern Water via two bulk supplies. Further housing development, within the Chichester area, is included forecasts but no new resources are needed to meet this growth.   |

|                       | Portsmouth Water will, however, need to develop additional sources, such as Havant Thicket Reservoir, and demand management to meet additional bulk supplies to Southern Water. These bulk supplies are driven by sustainability reductions to Southern Water's licences in the South Hampshire area.   |
|-----------------------|---|
|                       | Individual housing sites will need to be assessed for on and off site mains when the details are known. Funding for these mains is obtained from the developers but the sites around Chichester do not vary much in terms of closeness to trunk mains or storage.   |
| Cross Boundary Issues | Havant Borough Council has allocated this land in its adopted and draft Local Plans, and understands that this is now likely to come forward, following an agreement for Portsmouth Water to supply Southern Water. Please see update here: <a href="https://www.portsmouthwater.co.uk/havant-thicket-reservoir/news/">https://www.portsmouthwater.co.uk/havant-thicket-reservoir/news/</a>   |
| Funding Sources       | Developer contributions for on and off site mains are paid directly to the Water Companies. There is no need for funding through the planning process.  |
| Key Issues            | Portsmouth Water published its Draft Water Resources Management Plan (WRMP 2019) in March 2018 and carried out a twelve week consultation. The new plan also shows falling per capita consumption and stable demand over the planning period. The WRMP 2019 does not include compulsory metering as the area of supply is not 'Seriously Water Stressed'. It does include optional metering and encourages customers to be more water efficient. Portsmouth Water has proposed to reduce leakage by 15% by the introduction of district metering and targeted leak repairs. |
|                       | Portsmouth Water has allowed for investment in the new mains and for new water supplies such as Havant Thicket Reservoir and enhanced ground water supplies.  Further sustainability reductions are not required and the Environment Agency's National Environment Programme has been completed.  |
|                       | Developers need to contact Portsmouth Water regarding water supplies and the potential need for off-site mains reinforcements. These reinforcements will be paid for by the developer rather than the existing customers. Additional funds are collected via 'Infrastructure Charges' to pay for other parts of the supply system.  |
|                       | The water supply in Chichester District is from existing source works, and would be managed through existing reservoirs and storage capacity. The additional bulk supplies do not require any further infrastructure in Chichester District.  |

| Water resources are not a restriction on development in the Chichester area. However, as further details are known about the proposed strategic sites the council liaison should take place with Portsmouth Water to allow the main capacity to be checked.  |
|--|
| Portsmouth Water has not allowed for significant growth in horticultural demand in its Water Resources Management Plan 2019. Horticultural development could require additional main laying but the majority of water will come from onsite facilities such as boreholes and rainwater harvesting. |

| Gas supply                  |  |
|-----------------------------|--|
| Lead Organisation(s)        | Scotia Gas Networks (SGN)  |
|                             | SGN is a gas distribution company that operates over 74,000km of gas mains and services in Scotland and the South of England.  |
|                             | In addition to the National Transmission System owned by National Grid, SGN own the local Transmission System in the area. This system operates between 16Bar and 38Bar and has Pressure reduction installations at Chichester, Birdham, Shripney, Emsworth and Stedham. At these stations the Distribution system of 7 Bar and below take over the role of meeting demand for towns and villages in the local area. |
|                             | Thereafter, the distribution system consists of three pressure tiers: 1. Intermediate pressure, operating between 7 bar* and 2 bar 2. Medium pressure, operating between 2 bar and 75 mbar (mbar); and 3. Low pressure, operating below 75 mbar * 'Bar' is a unit of pressure.   |
| Main Sources of Information | Scotia Gas Networks - For additional information please visit the company website –  |
|                             | www.sgn.co.uk/Our-Services/Our-Services/   |
| Existing Provision          | Scotia Gas Networks confirm that the existing network is adequate to serve existing development.   |
| Future requirements         | If more capacity is required, reinforcement to the network can be carried out to accommodate any level of development.   |
| Cross Boundary Issues       |  |
| Funding Sources             | Developer contributions  |

|            | Ofgem  |
|------------|--|
|            | Scotia Gas Networks- Each connection and associated capacity request will be assessed on its own individual merits. Should any new request require an element of system reinforcement, the system requirements will then be quantified. This will then be subjected to SGN's economic assessment model, using the identified gas demand for the development. Where the costs of the system enhancements are less than the level of investment generated by the load, SGN will fund the cost of these works. Where the opposite is true, then the developer will be required to contribute to the cost. |
| Key Issues | Scotia Gas is responsible for both the transmission and distribution infrastructure in the whole of Chichester but there are some areas where mains gas is not available. There is a requirement for gradual replacement of cast iron gas mains pipes.   |
|            | The timing of any capacity improvement or reinforcement works is dependent upon the rate of development. Due to the nature of this business it is not permitted to invest speculatively but can take account of local development plans when undertaking or carrying out work in the area. Improvements will be provided by the utilities companies as required, although some additional infrastructure required to enable development will be funded by developers through connection charges.   |
|            | The Local Plan identifies the location, scale and timing of development, so this can be incorporated in SGN's strategic design.  |

| Electricity supply          |  |
|-----------------------------|--|
| Lead Organisation(s)        | Southern Energy Power Distribution (SEPD)  |
| Main Sources of Information | Southern Energy Power Distribution   |
| Existing Provision          | Southern Energy Power Distribution confirms that the existing network capacity for the Chichester area is adequate for meeting existing customer's demand.   |
| Future requirements         | Southern Energy Power Distribution has no identified major spending plans. The projected increase in load growth is anticipated to be accommodated from existing capacity. There has been a reduction in loads in recent years, thought to be due to improved energy efficiency and the downturn in the economy. |
| Cross Boundary Issues       |  |

| Funding Sources | Developer contributions   |  |  |  |
|-----------------|---|--|--|--|
|                 | Ofgem   |  |  |  |
|                 | Southern Energy Power Distribution  |  |  |  |
| Key Issues      | Where existing infrastructure is inadequate to support the increased demands from new development, the costs of any necessary upstream reinforcement required would normally be apportioned between the developer and Distribution Network Operator (DNO) in accordance with the current Statement of Charging Methodology agreed with the industry regulator (OFGEM). Maximum timescales in these instances would not normally exceed around 2 years and should not therefore impede delivery of any proposed housing development.   |  |  |  |
|                 | Where overhead lines cross development sites, these will, with the exception of 400kV tower lines, normally be owned and operated by Scottish and Southern Electricity Networks. In order to minimise costs wherever possible, existing overhead lines can remain in place with uses such as open space, parking, garages or public highways generally being permitted in proximity to the overhead lines. Where this is not practicable, or where developers choose to lay out their proposals otherwise, then agreement will be needed as to how these will be dealt with, including agreeing costs and identifying suitable alternative routing for the circuits. The existing customer base should not be burdened by any costs arising from new development proposals. |  |  |  |
|                 | To ensure certainty of delivery of a development site, any anticipated relocation of existing overhead lines should be formally agreed with Scottish and Southern Electricity Networks prior to submission of a planning application.   |  |  |  |

| Telecommunications          |                              |  |  |  |  |  |
|-----------------------------|------------------------------|--|--|--|--|--|
| Lead Organisation(s)        | Mobile Operators Association |  |  |  |  |  |
|                             | Various broadband providers  |  |  |  |  |  |
|                             | West Sussex County Council   |  |  |  |  |  |
|                             | вт                           |  |  |  |  |  |
| Main Sources of Information | Various                      |  |  |  |  |  |

|                       | Internet   |
|-----------------------|--|
| Existing Provision    | Each of the major networks provides standard coverage across the Local Plan Area.  |
|                       |  |
|                       | Broadband via BT's copperwire phone network is available in all areas of the Local Plan Area.  |
| Future requirements   | West Sussex County Council has contracted with BT Telecommunications plc to build the necessary  |
|                       | communications infrastructure to provide improved broadband services. The £30million project is  |
|                       | being funded by West Sussex County Council, the government and BT Telecommunications plc.  |
|                       | West Sussex Gigabit - Pure optical fibre broadband to improve connectivity to public services  |
| Cross Boundary Issues | The street of the street in the street of th |
| Funding Sources       | Mobile telephone services are provided by telecommunications companies as required at their own  |
| Ŭ.                    | cost.  |
|                       |  |
|                       | West Sussex County Council   |
|                       | DT   |
|                       | BT   |
|                       | Central Government   |
| Key Issues            | The mobile network is under expansion with more base stations required as part of the programme to   |
|                       | enhance the infrastructure for the existing mobile generation (3G) and create a new network for 4G.  |
|                       | New base stations are required as each cell can only support a finite number of mobile calls at any  |
|                       | one time. Mobile phone operators publish roll-out plans every year, identifying existing and proposed  |
|                       | base stations in the area; however these do not give a clear indication of long-term requirements.   |
|                       | The companies responsible for telecommunications services will normally be able to provide the   |
|                       | requisite infrastructure to serve new development through exercising their statutory powers and by   |
|                       | agreement with the relevant parties.   |
|                       | The broadband network now covers most households, although at varying speeds, and the  |
|                       | Government is committed to ensuring that everyone can benefit from the new services that   |
|                       | technology such as this can provide.   |
|                       |  |
|                       | Fibre broadband will be rolled out to around 96.5 per cent of West Sussex homes and businesses by  |
|                       | the end of 2018, following a multi-million partnership project between West Sussex County Council  |
|                       | and BT. The Better Connected West Sussex Broadband project builds on BT's on-going commercial  |

fibre deployment across the county, and will have provided broadband infrastructure to over 47,000 premises with superfast speeds of at least 24Mbps the end of the project..

Advanced, high quality communications infrastructure is essential for economic growth. The development of high-speed broadband technology and other communication networks also plays a vital role in enhancing the provision of local community facilities and services. The Local Plan recognises the importance of delivering super-fast broadband to rural areas, and development should facilitate were possible the growth of new and existing telecommunications systems to ensure people have a choice of providers and services.

### 15. Strategic Site Allocations

### Land West of Chichester - Local Plan Review Policy SA1

15.1 This site is allocated for 1,600 dwellings and has been carried forward from the adopted Local Plan. (It is allocated in the adopted Local Plan for residential development of 1,250 dwellings during the plan period to 2029, and it has outline planning permission (phase 1) for 750 homes with a signed S106 agreement). This leaves a further 350 homes to be delivered (phase 2) by 2035 with a range of infrastructure including leisure, green infrastructure, social and community facilities. The development is planned as an extension to the city, taking the form of a new neighbourhood. The table below shows the infrastructure required for the remaining 850 homes.

| Infrastructure | Scheme (what)        | Justification/Rationale | Phasing (when) | Total Estimated     | Sources of funding | Delivery Lead      |
|----------------|----------------------|-------------------------|----------------|---------------------|--------------------|--------------------|
| Category       |                      |                         |                | Infrastructure Cost |                    | (who/whom)         |
| Transport      | Cycling connectivity | Improvements to the     |                |                     | Developer          | Developer          |
|                |                      | existing network,       |                |                     | contributions      |                    |
|                |                      | ensuring good links to  |                |                     | through S106       |                    |
|                |                      | new networks and        |                |                     |                    |                    |
|                |                      | improved connectivity   |                |                     |                    |                    |
|                |                      | across the city linking |                |                     |                    |                    |
|                |                      | strategic sites.        |                |                     |                    |                    |
|                |                      | Enhancements for        |                |                     |                    |                    |
|                |                      | both commuters and      |                |                     |                    |                    |
|                |                      | recreational cyclists   |                |                     |                    |                    |

#### Land West of Tangmere - Local Plan Review Policy SA14

15.2 This site is allocated for 1,300 dwellings. It has been carried forward from the adopted Local Plan but expanded from a residential development of 1,000 to 1,300 homes with a range of green infrastructure, employment, social and community facilities. The development will be planned as an expansion of Tangmere village, enhancing Tangmere's role as a settlement hub and delivering a range of housing types. Local Plan policies SA15 (Tangmere Strategic Employment Land) and DM15 (Horticultural Development) will also place demands on infrastructure within and adjacent to Tangmere parish.

| Education                | Contributions would be required for expansion of primary and secondary schools if feasible and required.                                | At the current time pupil place planning indicates that there would be sufficient space or expansion capacity to accommodate the child product from the strategic allocation of 350 dwellings in the Southern Gateway. This applies to both primary & secondary provision.  It is estimated that 157 additional places may be required for children aged 4-16, but this will be refined at a later date once more detailed |            | Basic Needs Grant<br>CIL | West Sussex County<br>Council |

|                          | A further capacity of 13 Early Years and Childcare places would be required to accommodate the development. Where appropriate, preferably linking to the primary school provision at Southbourne. School based provision could either be run by the school or a private or voluntary provider. | contributions for build costs for a 2FE core & 1FE primary education facility would be required.  It is estimated that 108 additional places may be required for children aged 4-16, but this will be refined at a later date once more detailed information is known. |  | S106 at new<br>Primary School |  |

#### 16. Plan Area Infrastructure Needs

#### **Plan Area Wide Transport Infrastructure Needs**

16.1 Some funding for the A27 junctions package of improvements has already been secured from planning permissions granted to date. This approach is proposed to continue in the Local Plan Review and financial contributions (S106 and S278) are likely to be secured from the Strategic Site Allocations and other locations where substantial housing is identified in the Local Plan Review but is not yet subject to planning permission. The amount of financial contributions sought will be set out in the review of the Planning Obligations and Affordable Housing SPD. Whilst the table below only identifies developer contributions as a source of funding, it is anticipated that other sources of funding will need to be identified to bring forward these schemes.

Please note – costs are indicative and presented at the highest range as set out in the PBA Transport Assessment 2018. These will continue to be discussed with Highways England and West Sussex County Council. The costs do not include a figure for any future maintenance.

| Infrastructure | Scheme (what)                   | Justification/Rationale | Phasing (when) | Total Estimated     | Sources of funding | Delivery Lead    |
|----------------|---------------------------------|-------------------------|----------------|---------------------|--------------------|------------------|

|-------------------------------------|--|---|-------------------|-------------------------------------|--------------------|----------------------------------|
| Early Years and<br>Childcare places | Chichester City —  A further capacity of 25 Early Years and Childcare places would be required to accommodate the development. Contributions towards either expansion of places or new provision would be required.  Loxwood —  A further capacity of 25 Early Years and Childcare places would be required to accommodate the development. Contributions towards either expansion of places or new provision would be required.  Birdham and Donnington —  A further capacity of 13 Early Years and Childcare places across the two parishes would be required to accommodate the development. Contributions towards expansion of places would be required. | At the current time early years and childcare sufficiency planning indicates that there is insufficient space within existing provision to serve this proposed development. |                   |                                     | CIL                | West Sussex<br>County<br>Council |
| Primary                             | Chichester City –  |   |                   |                                     | Basic Needs        | West Sussex                      |

| Education | In order to cater for the combined number of proposed dwellings across the Chichester City area, land for a 1FE expandable to 2FE primary school will be required.  The number of school places will be refined at a later date once more detailed information is  | Grant<br>CIL                | County<br>Council                |
|-----------|--|-----------------------------|----------------------------------|
|           | known.  Western part of Manhood Peninsula — In order to cater for the combined number of proposed dwellings across the western half of the manhood peninsula financial contributions to expand East Wittering primary school by 1 1/2FE including ancillary accommodation requirements.  | Basic Needs<br>Grant<br>CIL | West Sussex<br>County<br>Council |
|           | Chidham & Hambrook/Funtington/Southbourne/Westbourne  In order to cater for the combined number of proposed dwellings across the Bourne area and including Bosham would require land for a new 3FE primary school. Pro- rata financial contributions from all the developments would be sought to mitigate their impact on the overall cost of the provision.                              | Basic Needs<br>Grant<br>CIL | West Sussex<br>County<br>Council |
|           | Westhampnett area - In order to cater for the combined number of proposed dwellings across the eastern area of Chichester additional land (sufficient for a 3FE primary school) to enable a further 1FE expansion of the Tangmere school (related to the Tangmere strategic site allocation) to 3FE primary school will be required.  Pro-rata financial contributions for the building of | Basic Needs<br>Grant<br>CIL | West Sussex<br>County<br>Council |
| Secondary | the additional FE and additional ancillary spaces would be required.  Chichester City area - If all of the proposed sites  | Basic Needs                 | West Sussex                      |
| Education | were to come forward the secondary school  | Grant                       | County                           |

|                        | provision would be full in the Chichester Planning Area, expansion of any of the secondary schools in the area would need to be sought from the academy sponsors/regional schools commissioner. If agreement could not be reached then the local authority would require the district council to identify land for a new 6FE expandable to 8FE secondary school in the Chichester area. Each of the developments would have to ensure that sufficient contributions were made to fulfil the cost of building a new secondary school. It should be noted that the west manhood peninsula shares its catchment area for secondary provision with the Chichester Planning Area.  Broadbridge/ Chidham & Hambrook/Funtington/Southbourne/Westbourne The secondary school serving this planning area is currently undergoing expansion. In order to mitigate the impact from the proposed number of dwellings the school would have to consider expansion by a further 3FE - this would require detailed feasibility studies to be undertaken to |  | B | Basic Needs<br>Grant        | Council  West Sussex County Council |
|------------------------|---|--|---|-----------------------------|-------------------------------------|
|                        | ensure there is sufficient land to accommodate the additional buildings.  |  |   |                             |                                     |
|                        | The secondary school that's serves both east & west of the manhood peninsula currently has capacity to cater for additional pupils from the proposed developments. However it should be noted that it is currently undergoing a rebuild programme following a fire at the site. At this time WSCC is not aware of the final capacity of the school. A financial contributions towards expansion may be required.  |  | C | Basic Needs<br>Grant<br>CIL | West Sussex<br>County<br>Council    |
| Special<br>Educational | Chichester City Area - All of the new primary schools would require a special support centre to   |  |   | Basic Needs<br>Brant        | West Sussex<br>County               |

| Needs                       | be provided as part of the school accommodation. Land and financial costs for the building of a new 9 class base special secondary school would also be required. |   |           |         | CIL  | Council                              |

#### **Plan Area Wide Public Services Needs**

16.7 This includes the strategic site allocations and the parish requirements.

| Infrastructure | Scheme (what)                                       | Justification/Rationale  | Phasing (when)     | Total Estimated     | Sources of funding   | Delivery Lead |
|----------------|---|--|--------------------|---------------------|--|---------------|
| Category       |   |  |                    | Infrastructure Cost |  | (who/whom)    |
| Police         | Refurbishment of existing Chichester Police Station | Financial support to fill funding gap of £400,000 to deliver the necessary refurbishment works at Chichester Police station. This project will cost £1.3m to deliver and a maximum budget of £900,000 has been secured. This will provide an adequate level of future proofing for the | Early 2019 onwards | 1,300,000           | 900,000 has been secured leaving a shortfall of 400,000 which could be funded by other sources including CIL | Police        |

|                           | police station and increase capacity of this site by a minimum of 20 staff.   |            |  |        |
|---------------------------|---|------------|--|--------|
| Additional personnel      | Sussex Police calculations project that a minimum of 27 new dedicated or divisional officer and 8 staff roles would be required to mitigate the growth outlined in Chichester over the development plan period. This equates to a minimum cost of £288,886 for training and equipping new officers and staff (not including revenue costs). | 288,886    |  | Police |
| New police fleet vehicles | The average capital cost of a new vehicle is £17,000 (not including fuel and maintenance). Our guideline for the majority of marked vehicles is to replace every four years or £125,000 miles. The condition of vehicles at the end of their police life varies however Sussex Police forecast that they will redeem,                       | 630,344.00 | Capital funding from various sources including CIL | Police |

| Dolice ANDD         | on average 5% of a vehicles value on disposal.  The development will require fleet investment far exceeding 4 years therefore Sussex Police would require at least an 8 year life of provision. This contribution is justified because there is insufficient funding within the police's revenue income to take on the capital cost after just four years, without diverting money from elsewhere. Sussex Police estimate that the 4 year lifetime cost per vehicle is approximately £42,240 including running costs and capital charges.  £630,344 needed to give 8-year life of provision. |        |     | Delice |
