Please give details of your reasons for support/opposition, or make other comments here:

The SNPlan refers to appendix D as the source of data for assessing development proposals to account for protected and other areas of special biodiversity eg Priority Habitats.
This data does not appear to be 1. Complete eg land to the east of the Plan area not included and 2. Is out of date. Therefore Policy SB 14 has doubtful validity in those respects.

In the Chichester Local Plan survey documents, a wildlife corridor [WC] was identified along the route of the Ham Brook chalk stream. [Strategic Wildlife Corridors LPR December 2018]. This WC was subsequently omitted from the chosen option of the Local Plan review. This WC should be re-instated as shown in the S N Plan Review.

What improvements or modifications would you suggest?

A full and up to date biodiversity survey should be undertaken for the Plan area before the Review Plan is taken to its next step in the approval process.
