

Oving Neighbourhood Plan

Plan period 2021 – 2039

Published by Oving Parish Council for Pre-Submission consultation under the Neighbourhood Planning (General) Regulations 2012 as amended.

1. Introduction

This section explains the background to the Neighbourhood Plan

2. The Neighbourhood Area

This section describes the designated area covered by the plan.

3. Planning Policy Context

This section relates the plan to the National Planning Policy Framework and the planning policies of Chichester District Council as the local planning authority.

4. Community Views on Planning Issues

This section explains how the community has been involved in the process of developing the plan.

5. Next Steps

This section describes the process that will be followed to proceed to the referendum stage.

6. Vision, Objectives & Land Use Policies

This is the core of the plan. It includes the Vision and Objectives which were consulted on in the spring of 2021. And it provides details of the policies (in bold type) which are proposed to address the objectives and other related issues.

7. Appendices to the policies and community engagement

8. Maps

9. Evidence base

1. Introduction

In November 2020 Oving Parish Council decided to take advantage of the Localism Act 2011 and make a neighbourhood plan. In developing the plan we have followed the procedure set out in the Neighbourhood Planning (General) Regulations of 2012 (as amended).

The purpose of a neighbourhood plan is to give local communities such as parishes, the opportunity to influence the quality of development in their areas. Many parishes in the district have developed neighbourhood plans.

A steering group was formed of volunteers from the village and hamlets of the parish, from different walks of life, some in employment, some retired, but all sharing a desire to help shape the future of the parish.

As chairman I should like to pay tribute to all members of the group who, drawing on their knowledge of the parish, many of them long term residents, have contributed so richly to the research and decision making that has underpinned the policies of the plan. Our thanks also to Mandy McPhail, webmaster of Oving Parish website and editor of Oving District News.

We have greatly benefited from the encouragement and guidance of Chichester District Council at the different stations along the way.

Stephen Quigley
Vice Chairman, Oving Parish Council
Chairman, Oving Neighbourhood Plan Steering Group

October 28, 2024

Members of the Steering Group

Cllr Katie Akerman	(Shopwhyke)
Colin Buchanan	(Oving village)
Dominic Akers-Douglas	(Shopwhyke)
Cllr Rod Hague	(Oving village)
Mandy McPhail	(Oving village)
Cllr Simon Oakley	(County Councillor)
Stephen Quigley (chairman)	(Merston)
John Pitts	(Woodhorn)
Clive Sayer	(Oving village)
Paul Kopecek	(Merston) For part of the time
Cllr Victor Davey	(Drayton) For part of the time

2.The Neighbourhood Area

A neighbourhood plan has to cover a defined geographic area. It can be a whole parish or just part of one. It can cover part of an adjoining parish. Oving Parish Council considered the option of just one part of the parish but decided at its meeting on February 11, 2021 the best result would be obtained by covering the whole parish. Accordingly the parish council applied to the District Council with arguments in support for the whole area of the parish to be designated the Neighbourhood Area. This designation was registered on March 8, 2021. See Evidence Base.

Profile of the parish

Oving parish consists of the villages of Oving and Merston and the hamlets of Drayton, Colworth, Woodhorn and Shopwhyke. It occupies 14 square kilometres. It is bounded in the north and west by the A27 trunk road. The southern part is traversed by the A259.

At the March 2021 national census it had a population of 1717 with a mean age of 37 years and eight months.

There have been a number of major new developments in the last 20 years in the centre of Oving village and at Shopwhyke.

The parish is situated in a coastal plain that in places is subject to flooding. A feature of Oving village is that it is surrounded by green space. The landscape is characterised by large open arable fields with straight drainage ditch systems, and a low density of hedgerows and hedgerow trees.

Gravel extraction in the western part has left a number of lakes inaccessible to the public. Many parts of the parish enjoy views of Chichester Cathedral and the South Downs. Part of the parish boundary is the WWII airfield at Tangmere.

The area is crossed by the line of the former Chichester to Arundel Canal, the Chichester Flood Relief Channel and the railway line between Chichester, Brighton, Portsmouth, Southampton and London. Access to the railway stations at Chichester and Barnham is poor.

The parish's economy has been predominantly farming and salad based horticulture using polytunnels. But this is changing. In some places farm buildings have been converted into business units hosting SMEs and a range of services including a veterinary surgery. There is a multi storey crop research facility in the south west of the parish. The Environment Agency has a depot and office at Shopwhyke.

The parish's assets include a modern village hall, a public house converted from a period cottage, two 13th century churches, one in regular use, the other closed but maintained by the Churches Conservation Trust. The parish's principal green space is the recreation

ground on the east side of the village. There are also open green spaces at Shopwyke as part of Shopwyke Lakes and New Fields developments. Also at Shopwyke there are several playground provisions as well as the recently opened community hub at Longacre House.

Oving village is located on the north east side of the parish. It has three main streets, the High Street that serves as the main road running through the village, Church Lane that is bordered in places by belts of trees and hedges, and Gribble Lane that is adjacent to open fields with views of Chichester Cathedral and the South Downs. The village's principal open spaces are the 19th century graveyard along Church Lane and the recreation ground to the east of the village.

Drayton is located to the west of the parish and is split in half by the railway line. There is a small cluster of one and two storey houses on the road to Oving village and other houses with long driveways along Drayton Lane. Also on Drayton Lane are the offices and buildings of West Sussex Highways. The hamlet has water features with ponds to the west of Drayton and ditches to the east.

Woodhorn is in the east of the parish off Oving Road. It lies within the Low South Downs Farmland character area. The business centre hosts around 20 SMEs. Buildings are spread along Woodhorn Lane and the cul de sac leading to Woodhorn Farm. Both lanes are bordered with rich vegetation, hedgerows and trees. There is a railway crossing that gives access to Reeds farm and a footpath south of the hamlet runs along the railway line towards Aldingbourne.

Colworth is a small hamlet to the north east of the parish. There are several houses spread along the rural road, some facing on to the street road, others concealed by vegetation. The rest of the houses are set along a cul de sac street with irregular set backs and building plots. The rural street is bordered with low flint walls and hedgerows. There are two farms and a public footpath crosses the northern boundary.

Shopwyke lies to the north west of the parish bordering Chichester but separated by the A27. The oldest part in the east has a group of houses along a cul de sac with no pavements, bordered by green verges with irregular building lines. There is a cluster of listed buildings and there are very large recent developments to the west including linear developments along Shopwyke Road, on both north and south sides. These developments have a very different character from the older part. There is a long established day/boarding preparatory school with a nursery department for boys and girls.

Merston village is located to the south west of the parish. Houses include converted barns and other farm buildings and a number of red brick former farm houses with small frontages. There is a pond and a Grade I listed church. There are open views of the countryside and part of the Chichester to Arundel canal. Public footpaths lead towards Colworth. The village lies in the flood risk zones 2 and 3. At the north west a high rise employment building dominates the flat landscape and creates a negative impact.

The parish is served by three bus services: the 85 providing a regular if infrequent service directly from Oving village to Chichester, Tangmere and Arundel, the 700 is a frequent service along the A259 to Chichester and Bognor Regis and the 500 runs through from Littlehampton to Chichester via Tangmere and Shopwyke.

There is one maintained cycle path, alongside the A259 from Merston to Chichester and another to Tangmere. There is a bridleway along Green Lane to North Mundham.

There are primary schools at Portfield, Westhampnett and Tangmere. The parish is within reach of five secondary schools, three in Chichester, one in Westergate and one in Barnham. There is a private preparatory school at Shopwyke that takes children from 3 to 14.

The nearest doctor's surgery is at Tangmere.

Planning issues as perceived by the community

Three issues threaten the future of the parish and which the neighbourhood plan is designed to address:

The design of new major developments needs to be in sympathy with the rural and historical character of the parish. Recent developments have been urban, threatening the separation from Chichester city.

The growing population of the Shopwyke hamlet will in the next few years greatly increase the population of the parish. The result is creating two parishes within a parish, the new and the old, with too little physical and, though increasing, communal connectivity between them.

The road network, consisting in many places of narrow winding lanes with narrow if any verges, is quite inadequate to cope with the increasing amount of traffic, cars, vans and lorries, and is poorly maintained. There is increasing risk to residents whose houses have no frontage. Access from the parish to arterial roads is slow and unsafe. There is no network of footpaths or cycle paths.

Planning issues outside the scope of the plan

The key issue is the A27 and waste water treatment and the need for improvements to both to support recent and any additional strategic allocations. The allocation of 600 on site AL8, for example, is being tested against highways modelling of traffic on the A27 and improvements in waste water treatment.

3. Planning Policy Context

The parish lies within the Chichester Local Planning Authority (LPA) in the county of West Sussex.

National Planning Policy

The National Planning Policy Framework (NPPF) is an important guide in the preparation of local plans and neighbourhood plans. A revised Framework was published in December 2023 and the following paragraphs are considered especially relevant:

- Neighbourhood Planning (§28 - §30)
- Rural Housing (§82 - §84)
- Promoting health and safe communities (§173)
- Local Green Space (§105 - §107)
- Promoting sustainable transport (§108)
- Achieving well-designed places (§132)
- Planning and flood risk (§165)
- Conserving and enhancing the natural environment (§180)
- Conserving and enhancing the historic environment (§195)

Strategic Planning Policy

The Neighbourhood Plan must be in general conformity with the strategic policies of the LPA. The current local plan was adopted in 2015 and has a plan period of 2014 to 2029. A new local plan was submitted for independent examination in May 2024. The plan period of the new local plan is 2021 to 2039 and further details can be found at <https://www.chichester.gov.uk/article/35375/Chichester-Local-Plan-2021-2039>. Within the Neighbourhood Area, there has been no strategic change in direction brought forward by the new local plan.

There are other made neighbourhood plans in the vicinity, namely Tangmere and Boxgrove, and one is in the process of being prepared at North Mundham.

Sustainability Appraisal & the Habitats Regulations (to be revised)

The LPA were asked for a screening opinion on January 18, 2022 on whether the draft Oving Neighbourhood Plan was in accordance with the Environmental Assessment of Plans & Programmes Regulations 2004 including the Conservation of Habitats and Species Regulations 2010. At the time the LPA were unable to give an opinion having had no response from Natural England. Natural England's position was that they needed to wait until the Regulation 14 process to see the Neighbourhood Plan policies.

4. Community Views on Planning Issues

A requirement of a neighbourhood plan is that it should be based on successful engagement with the community. To date we have done much to satisfy this requirement. We have kept residents informed about the purpose of the plan and how we have gone about making it. We have used the channels of the parish newsletter, the Oving District News (ODN), the parish website www.ovingcommunity.org, leaflet drops and parish

notice boards. In April 2021 we did our first consultation which was on the draft vision and objectives.

In October/ November 2022 we conducted a five week Testing the Water exercise (see Appendix) which gave residents an opportunity via the website, two open events and hard copy of the plan to inspect the policies and give their feedback. Some policies were amended to incorporate recommendations for change.

In broad terms we want any new housing to be sympathetic in design and style to the existing built environment. We want provision to be made for affordable housing to meet local needs. And we want to have infrastructure funds used to improve connectivity across the parish with new networks of footpaths and cycle ways.

5. Next steps

Once the consultation exercise is complete, we will review the comments made and prepare a final version of the Plan. We submit the plan to the District Council that then appoints an independent examiner to assess whether we have successfully engaged with the community in preparing the plan and whether it meets what are known as the basic conditions. These are:

- Is the plan in compliance with national planning policy?
- Is the plan in general conformity with local planning policy?
- Does the plan promote the principles of sustainable development?
- Has the process of making the plan met the requirements of European law?

If the examiner is satisfied that we have successfully engaged with the community and considers the plan meets the above conditions, then the District Council arranges for the plan to go to a referendum of the local electorate.

If a simple majority of the turnout votes in favour of the plan, then the plan becomes a statutory part of the development plan for the area and will carry significant weight in how planning applications are decided.

6. Vision, Objectives and Land Use Policies

Vision statement

In the period of the emerging local plan, Oving parish will be a resilient, thriving, well knit community. It will be an agreeable place to live for adults and children, families, people in work, the retired and elderly. It will have a separate and distinct identity with a clear gap with other settlements and no annexation to Chichester.

Its character and fragile beauty will be preserved from excessive development. Its historic assets and its high quality farmland will be safeguarded.

Its infrastructure will include access to schooling, medical facilities, adult social care and local retail. It will be sustainable with good public transport, efficient and safe road traffic management and a network of cycle paths and footpaths providing access to all parts of the parish and Chichester, Tangmere and Bersted.

There will be protected green open space, trees and verges with wild flowers. Its housing will include a mix of market and affordable housing, developer and self built, with good size individual or communal gardens.

It will have a strong rural economy based on farming, horticulture, services and other types of business, supported by gigabit broadband and a multi use business hub. It will have the ambition to create higher value jobs in for example technology to match expensive new housing.

It will play its part in seeking to combat climate change: in housing design using renewable energy, low emissions, air/ ground source heat pumps, in private transport using electrically and other non fossil fuel powered vehicles, in community behaviour eg single use plastic, and waste recycling. By these and other means it will progress to a carbon neutral parish.

Oving parish will work with neighbouring parishes to achieve mutually beneficial outcomes.

Objectives

Development policies to support:

Housing

Example: Proposals for new housing must deliver a range of house types, sizes and tenures. Developers should demonstrate how the proposal will meet local needs. Housing will be required to meet or exceed the energy efficiency standards set out by central government or Chichester District Council.

Environment and heritage

Example: New development should not increase the risk of flooding elsewhere and wherever possible, reduce overall flood risk.

Example: Local heritage, landscape, buildings and history to be respected. The unique setting of the Oving Conservation Area is to be preserved and development proposals that would negatively impact on its setting will be refused.

Any designated wildlife corridors that pass through the parish linking the South Downs National Park to the SSSI of both Pagham and Chichester Harbours will be protected and

enhanced where possible. Development that would lead to increased pressure on these corridors from recreational use will be refused.

Employment and enterprise

Example: Development proposals to upgrade or extend existing employment sites or start new business ventures eg in light engineering and technology, and small companies attracting young people, will be supported provided that the impact on the amenities of surrounding properties, landscape and wildlife heritage is acceptable and subject to the other policies in the plan.

Leisure and community

Example: Proposals for establishment of new medical facilities or access by bus to improved existing facilities eg at Tangmere, will be supported within the parish settlement boundary subject to the other policies in the plan.

Example: Community facilities that support the social integration of major new developments will be supported.

Example: Depending on population size, provision of walk-to local shop/ café will be supported.

Getting about

Example: Support will be given to proposals that improve and extend the existing footpath and cycle path network subject to compliance with other development plan policies. The loss of existing footpaths and cycle paths will be resisted. Access to Chichester by cycle and electric bike should be supported.

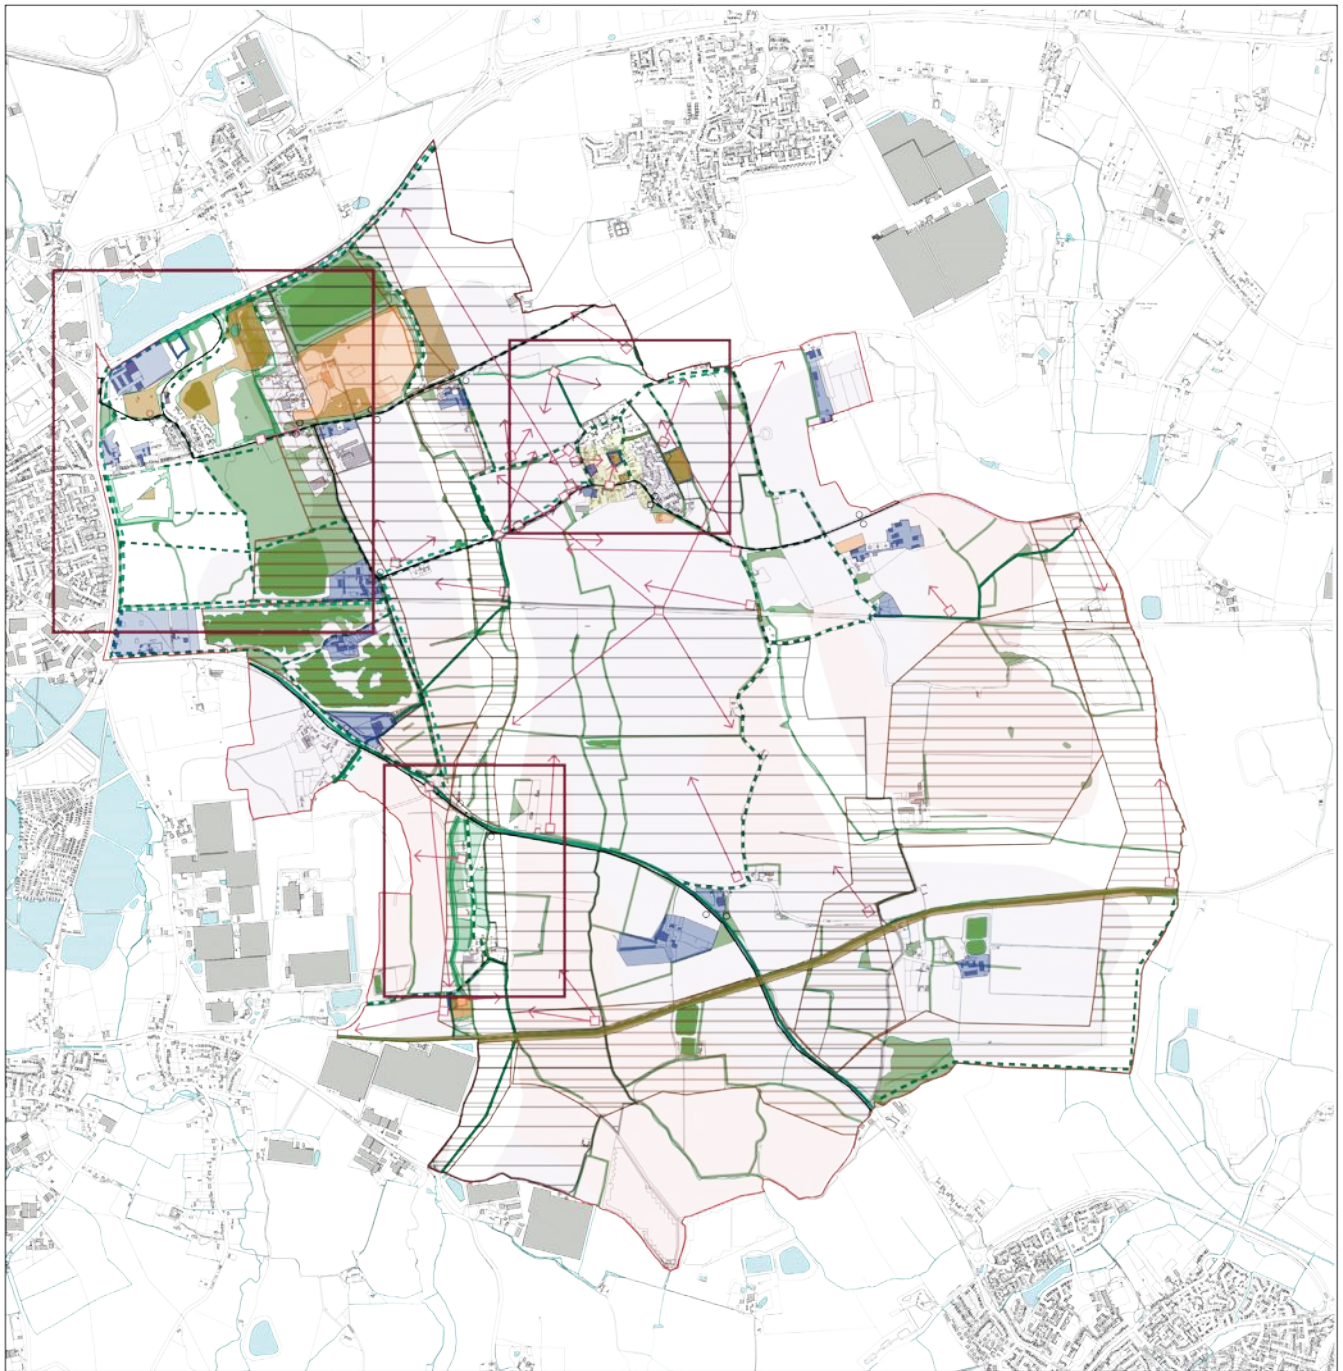

The extension of bus services will be supported to enable a genuine alternative to private car use for the mostly rural nature of the parish. The significant housing proposals will be expected to facilitate this extension or re routed bus routes via an initial funding scheme to be incorporated into S106 or equivalent negotiations.

Climate change

Example. Proposals for energy-generating infrastructure using renewable or low carbon energy sources to serve individual properties or groups of properties will be supported.

Mitigation of the impact of climate change such as effective ditch maintenance and improvement as well as increased shading through tree planting will be supported.

OV1 Employment

A. Development proposals that enhance the operational effectiveness, efficiency and appearance of existing employment sites and facilities, or redevelop existing employment sites to provide modern commercial premises and flexible workspace will be supported provided:

- I. any harmful impacts on residential development and public amenities are avoided or successfully minimised;**
- II. it can be demonstrated that any harmful impacts on environment, wildlife, landscape and/ or any heritage assets are clearly outweighed by the economic benefits in line with the designated status of the asset;**
- III. the proposals have sought to maximise the use zero carbon energy performance on all new buildings wherever possible;**

B. Proposals that will result in the overall loss of employment floorspace will be resisted unless it can be demonstrated that any replacement will achieve a higher employment density and offer a wider range of higher skilled local employment.

C. New Employment sites will be in conformity with the design guide AECOM Oving Design Guidelines and Codes Final Report January 2022 (ODGC)

■ OV1 Employment

Introduction/ objective

Oving Parish has 13 employment sites of which the largest is the Glenmore Business Park. The Bartholomews crop research facility on the Chichester Food Park is the next largest. Drayton House, Littlemead business centre, Shopwyke industrial centre, Woodhorn and Madam Green Farm are the other principal areas of economic activity. A new site is being developed on the former WWII fuel depot accessed via new traffic lights. The remaining sites are characterised by mostly low density, inefficient use of land with low tech, and low value economic activity.

The parish is mainly rural with a significant number of people employed in agriculture and horticulture.

As an overriding principle, priority will be given to building critical mass in the better managed and located centres and not creating new economic space.

Supporting text

If the businesses accommodation and use of land is supportive there would be scope for a progressive rural economy, eg light engineering, machinery maintenance, technology, waste management, veterinary services and other businesses that drive improved productivity, value and average wage growth.

The aim of this policy is to ensure there is no overall loss of existing business or commercial facilities in the parish and, as a result, no corresponding loss of local employment. The policy is intended to act as a catalyst for the regeneration of existing employment land which might serve a more sustainable and higher wage local economy by encouraging a higher employment density. This in turn will reduce the pressure to find new employment land on the edge of the urban area.

The policy encourages existing business locations to develop further through a combination of support for a change of use of existing buildings and increasing employment density. The policy reflects the district wide evidence of the changing employment practice that is evident in many areas across the country.

Paragraph 11.38 of the Chichester Housing and Economic Needs Assessment (Jan 2018) confirms “changing operating practices and increasing levels of automation have meant that there is a changing relationship between manufacturing jobs and industrial floorspace: the amount of floorspace required per manufacturing worker (i.e. the employment density) has been increasing, influenced by productivity improvements.”

The policy supports proposals that enhance the operational site efficiency and provide an attractive place to work, park and access, especially by cycle. In terms of landscape sensitivity, it is also acknowledged that locations that are less sensitive in the landscape are more likely to be near major roads. This includes the area along the A259, from Bartholomews Agri Food Ltd at the Chichester Food Park to the junction with the A27 Chichester by-pass.

In its contribution to the CDC 2018 edition of Housing and Economic Needs Assessment Oxford Economics has indicated a maximum need for 32 additional hectares of space for glass houses/ polytunnels and services in the period to 2035 across the district.

The provisions of policy OV13 should be applied to proposals for buildings and structures over three storeys.

Local Planning Policy Context

Policy OV1 accords with Chichester Local Plan 2014-2029 policies 3, 26 and 38 in respect of protecting and enhancing existing employment sites and facilities. This is demonstrated through the requirement that the enhancement or redevelopment of existing facilities does not have harmful impacts including those on wildlife and landscape. Additionally, proposals that lead to the loss of employment facility floorspace will have to provide new or replacement facilities. This accordence also extends to the emerging Chichester Local Plan 2021-2039 policy E2.

References

Chichester Housing and Economic Development Needs Assessment (January 2018)
West Sussex 2018-2023 Economic Growth Plan

OV2 New Local Services

Proposals for the development of a village shop (Class F2(a)) and/ or a hall or meeting place for the principal use of the local community (Class F2(b)) will be supported, provided:

I The scheme meets the specification agreed by the local planning authority and Parish Council for the facility, comprising a building and ancillary outdoor operational space;

II. A safe and convenient form of highway access is provided

III. Safe pedestrian and cycle access is made to serve the scheme;

IV. The landscape scheme improves the effectiveness of any existing mature vegetation on the site boundaries to screen the scheme from the open countryside and protect the amenity of neighbouring properties.

This policy provides for the development of a village shop and community hub. There is more than one potential location that may be suited to this use, and hence a criteria-based approach has been adopted.

Local Planning Policy Context

Policy OV2 accords with the emerging Chichester Local Plan 2021-2039 policy E17 by supporting the development of a village shop and/or hall or meeting place. OV2 also sets a number of requirements including safe pedestrian and cycle access which reflects policy E17.

References

Appendix OV2 New Local Services

OV3 Community Facilities

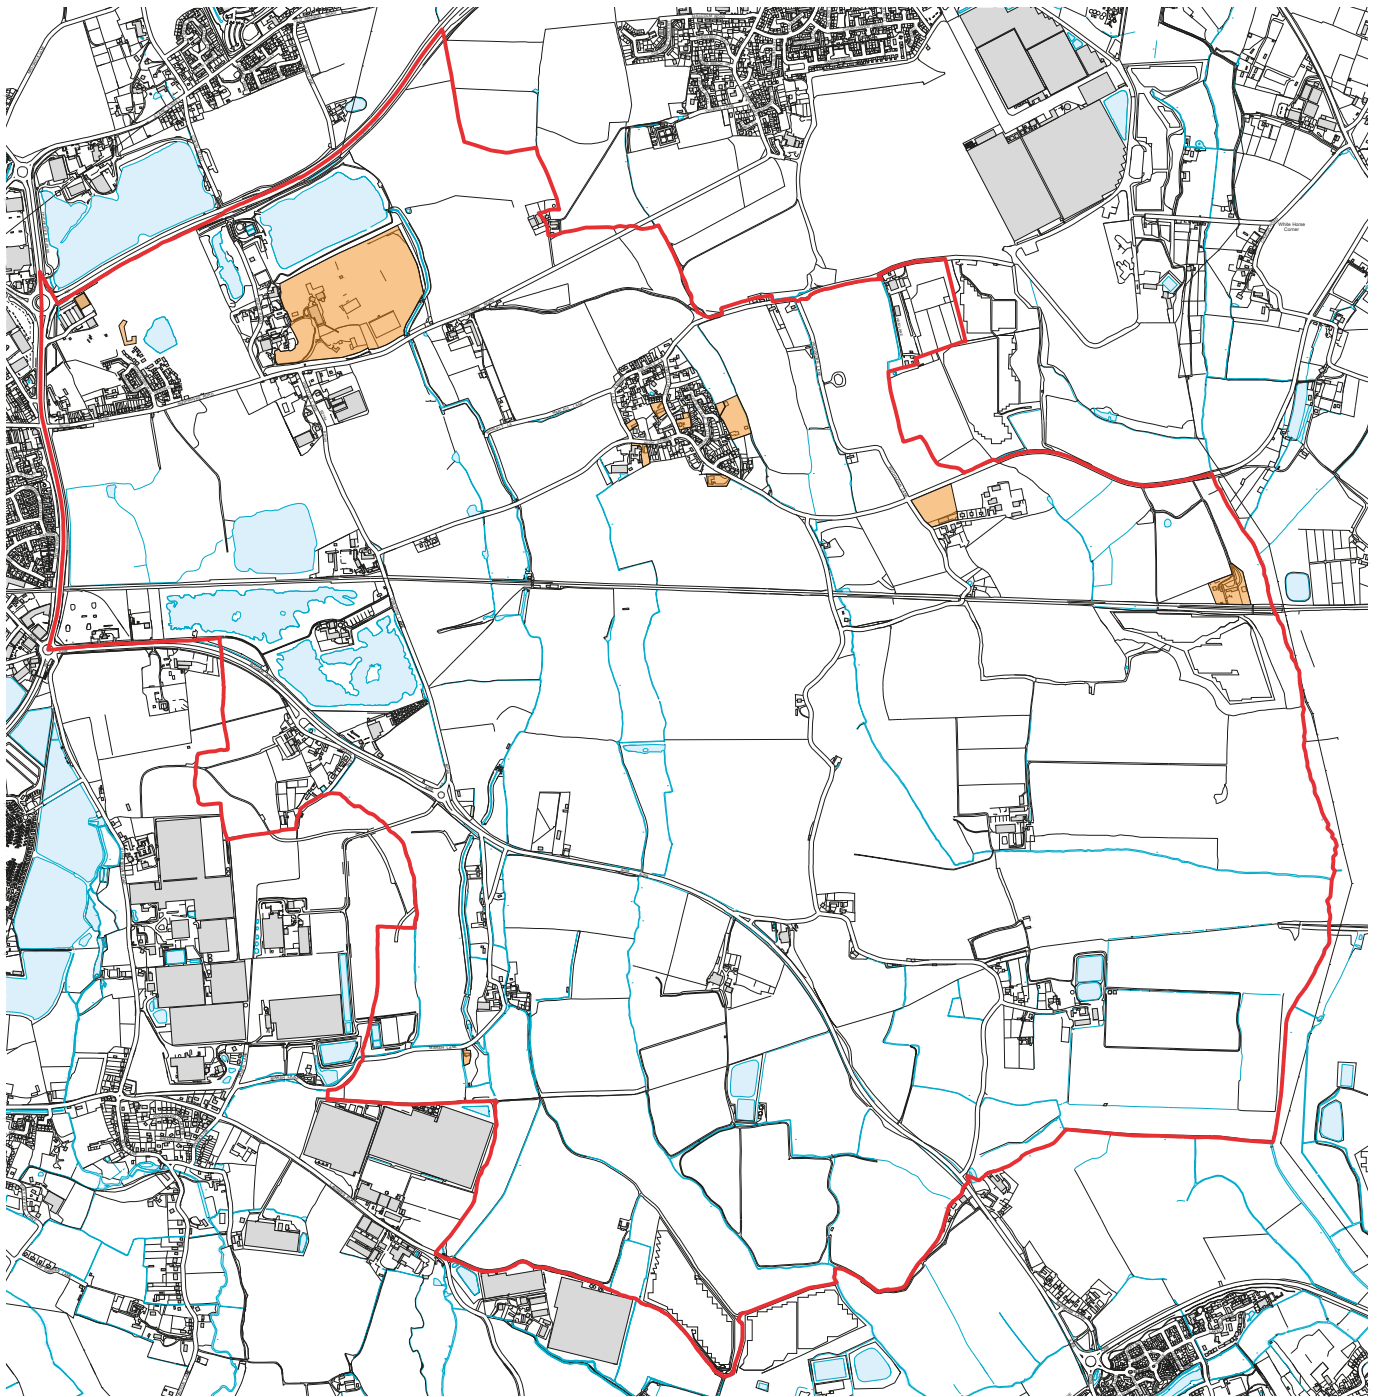

A The Neighbourhood Plan identifies the following community facilities, as shown on the Policies Map:

- i. Oving Jubilee Hall**
- ii. Gribble Inn pub**
- iii. Flip out centre**
- iv. Westbourne House School sports facilities**
- v. Decoy Farm tourist accommodation**
- vi. Pavilion, Shopwyke**
- vii. Retail facilities, Longacres House**
- viii. Shopwyke Lakes/ New Fields**
 - **Bikeshop/Café**
 - **Play ground**
 - **Playground**
 - **Playground**
- ix. Community Garden and Telephone Kiosk Book swap**
- x. St Andrew's Church and Burial Ground**
- xi. Diamond Jubilee Park**
- xii. St Giles Church, Merston**
- xiii. Oving Cow Shed**

B. Development proposals which would affect the use of these community facilities will be determined against the provisions of Policy 38 (Local and Community facilities) and Policy 54 (Open Space, Sport and Recreation) of the CLP or successor policies.

C. Proposals to change the use of part of a community facility that is surplus to requirements to provide a village shop or community hub will be supported where they will support the overall viability and importance of the community facility concerned.

D. The comprehensive masterplan for any strategic allocation within the parish to the east of Chichester will be expected to demonstrate that the masterplan layout locates the required social infrastructure including a local shop/café/community hub in such a way to ensure that the existing settlement of Oving and the hamlets can access that infrastructure safely and securely.

OV3 Community Facilities

Local Planning Policy Context

Policy OV3 accords with Chichester Local Plan 2014-2029 policies 38 and 54 in seeking to prevent the loss of a number of identified community facilities in the parish. This accordance also extends to the emerging Chichester Local Plan 2021-2039 policy P17.

See Appendix OV3 Community Facilities

Fundamental Value of the Landscape

OV4 Green Infrastructure Network

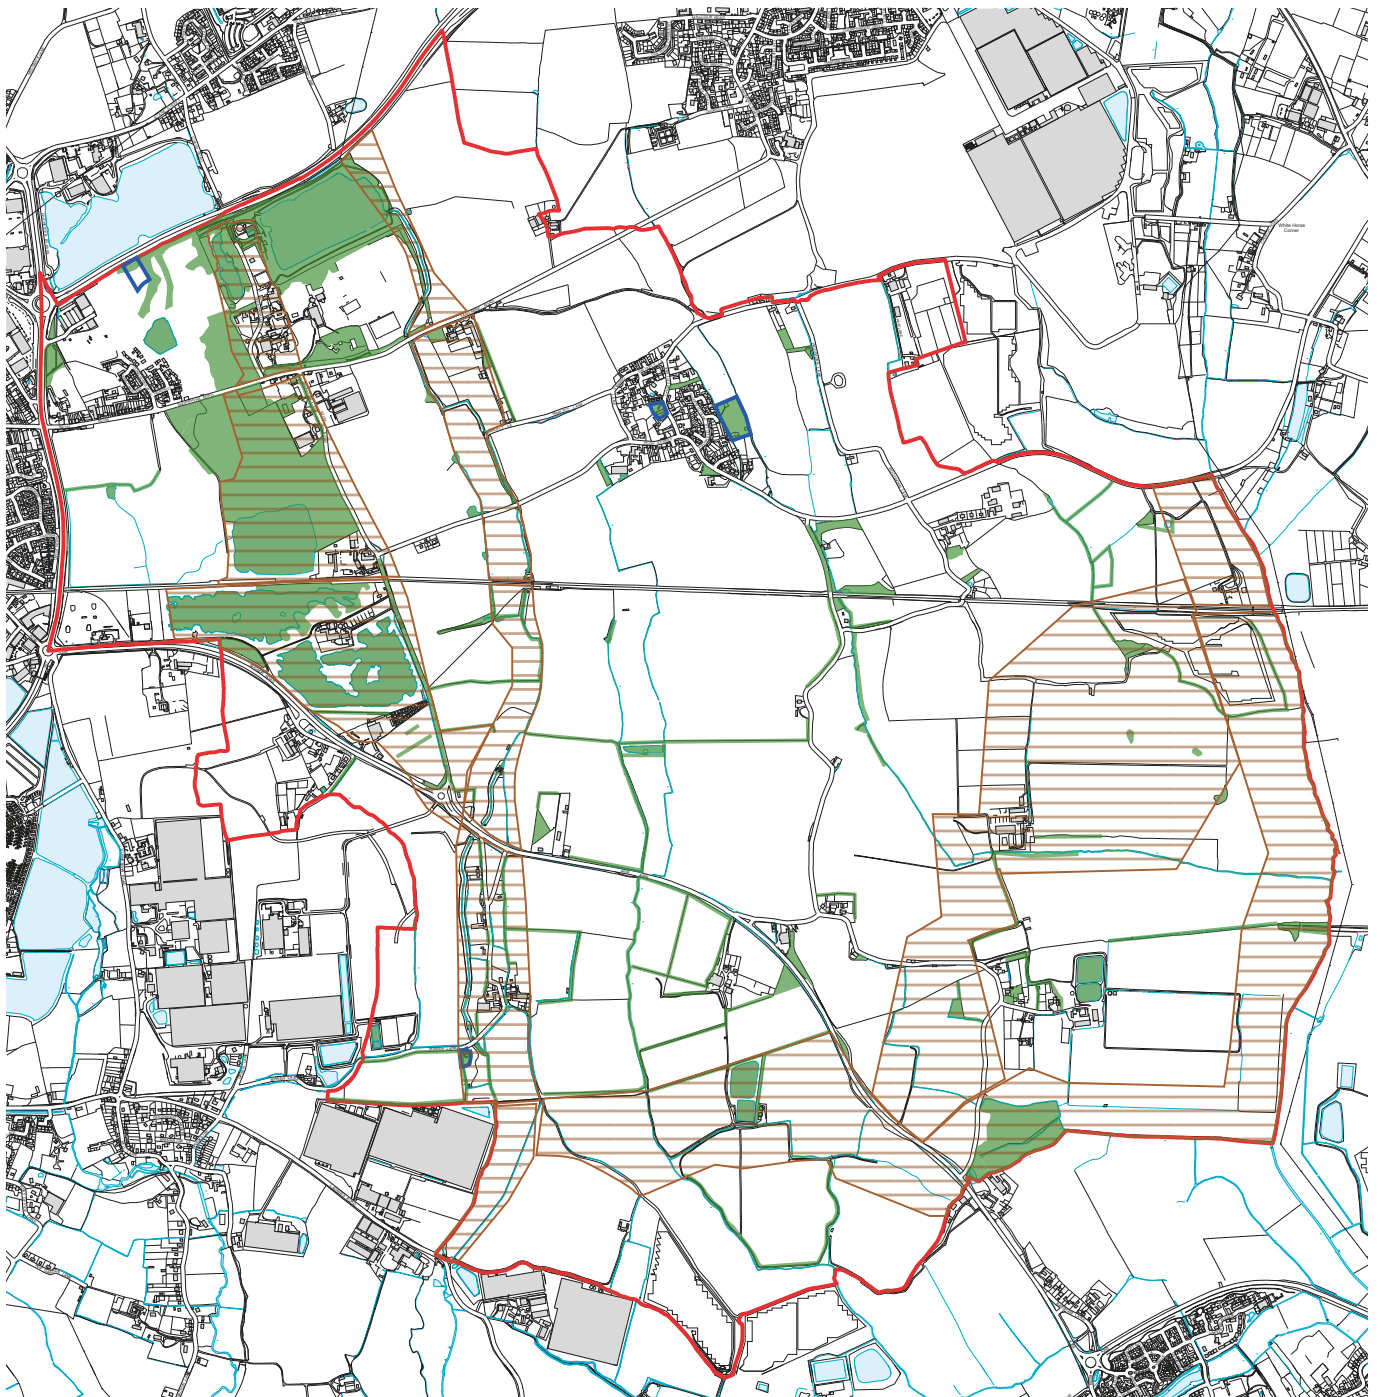

A. The parish contains a variety of green and blue infrastructure that provides an environmental support system for the community and wildlife. The Neighbourhood Plan designates this as a Network, as shown on the Policies Map, which comprises land with known biodiversity value, including defined wildlife corridors, priority habitats, water vole networks, bat and barn owl habitats, woodlands, significant hedgerows and lines of trees, streams and other water bodies as well as amenity space.

B. Development proposals that lie within or adjoining the Network are required, where relevant, to have full regard to creating, maintaining and improving the Network, including delivering a net gain to general biodiversity value and wildlife connectivity, in the design of their layouts, landscaping schemes and public open space and play provisions.

C. Proposals that will harm or lead to the loss of land lying within the Network and that will undermine its integrity will not be supported. Development proposals that will lead to the extension of the Network will be supported, provided they are consistent with all other relevant policies of the development plan.

D. The Policies Map shows those parts of the designated Network that are known or likely to have biodiversity value either as habitat areas; as hedgerows or lines of trees; or as streams and rivers. When calculating Biodiversity Net Gain requirements using DEFRA's latest metric, development proposals located within or adjoining that part of the Network should anticipate achieving at least a medium distinctiveness multiplier score.

E. Biodiversity should be provided on-site within the Neighbourhood Plan area wherever possible. Off-site measures will only be considered where it can be demonstrated that, after following the mitigation hierarchy, all reasonable opportunities to achieve measurable net gains on-site have been exhausted or where greater gains can be delivered off-site through maximising local place making and nature improvement opportunities.

OV4 Green Infrastructure Network
 OV4 Wildlife Corridor
 OV4 Playing Fields, Graveyards and Cemeteries

Background

Wildlife corridors have been identified as key habitats for nesting, foraging and transportation routes for wildlife. The LPA is in the process of determining wildlife corridors running through the parish from Westhampnett to Pagham Harbour.

Supporting text

This policy will support the development of a nature recovery plan to increase biodiversity, connectivity and functionality to protect Schedule 1 species and European Protected Species.

The recovery plan would seek to provide a suitable habitat to accommodate the effects of climate change and the resultant changes in species movements. The main objectives should include:

- a) enhancing and improving woodland and riparian zones (ditch habitats);
 - b) addressing and reducing the effects of night-time lighting issues;
 - c) improving the connectivity of these habitats along the corridor;
 - d) increasing the buffer zones around these corridors to protect against the harmful effect of human interaction and development on nature
- in order to create a habitat to increase the prevalence of Schedule 1 and European protected species, but particularly protecting and increasing already identified species along these corridors including but not limited to otters, bats (list species), water voles, door mice and hen harriers.

The plan would include a programme of small discrete stages for habitat creation or improvement over a ten year period as follows:

- a) Complete baseline survey data (static surveys, ornithological surveys, bat tagging survey, photographic evidence to feed into Sussex Biodiversity Record Centre)
- b) Develop an enhancement and management plan consisting of the improvement of connectivity between habitats; water management plan to include junction ponds and coir rolls to increase wetland habitat, especially during periods of drought; enhancement of buffer zones through increased planting.

There would also need to be a system using baseline data as above and continual recording (survey, static cameras and photograph evidence) to maintain and monitor these habitats and the wildlife that lives in them.

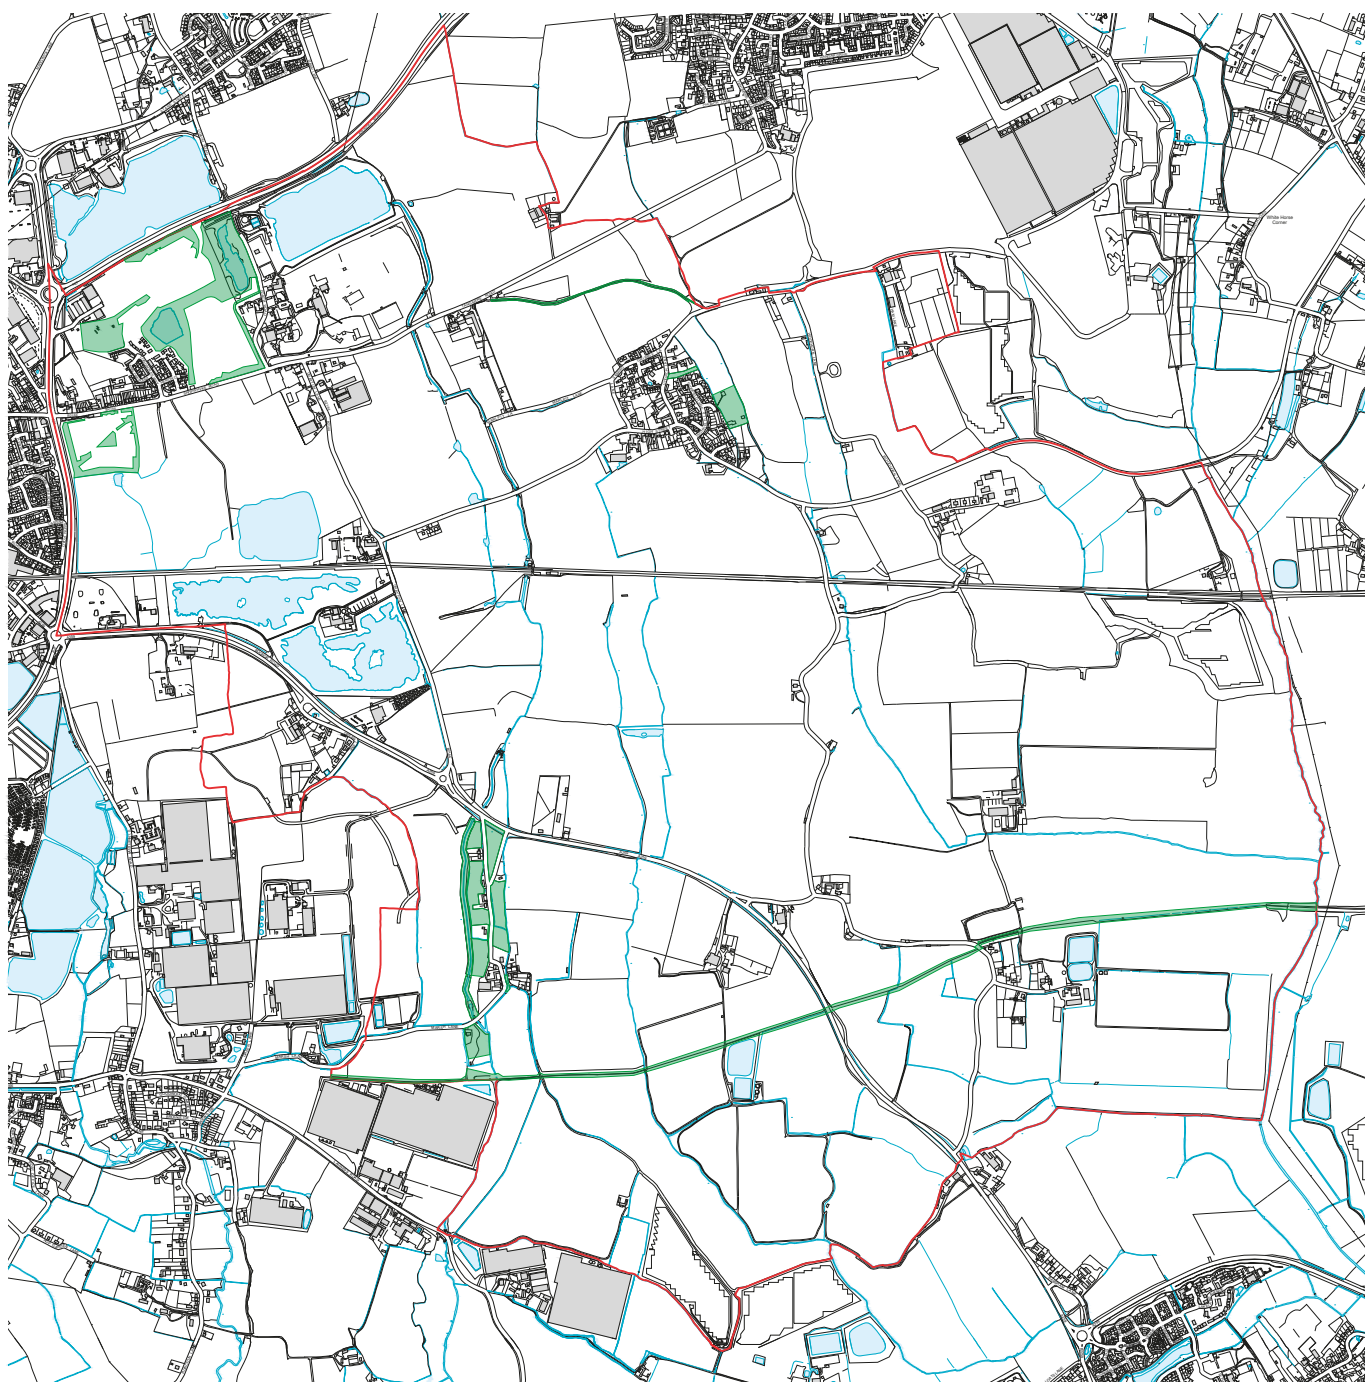

Local Planning Policy Context

Policy OV4 accords with Chichester Local Plan 2014-2029 policies 49 and 52 in requiring proposals, where relevant, to enhance and extend the green infrastructure network, as identified on the Policies Map. This accordence also extends to the emerging Chichester Local Plan 2021-2039 policies NE4, NE5, NE8, P14 and P15. The wildlife corridor element of OV4 anticipates the identification and adoption of wildlife corridors in policy NE4 of the emerging Local Plan.

OV5 Local Green Spaces

The Neighbourhood Plan designates the following Local Green Spaces, as shown on the Policies Map:

- **Diamond Jubilee Park in Oving Villag**
- **Cemetery off Church Lane, Oving**
- **Narrow pasture land either side of Marsh Lane, Merston**
- **Land to east of (grade 1 listed) Church of St Giles, Merston**
- **Route of former Chichester/ Arundel canal in Merston and Colworth**
- **Green Spaces within the Shopwyke Lakes and Redrow estates**
- **The old road route from Church Lane to Woodfield house**

Introduction/ purpose

The NPPF states that “the designation of land as Local Green Space through local and neighbourhood plans allows communities to identify and protect green areas of particular importance to them.” In addition: The Local Green Space designation should only be used where the green space is:

- (a) in reasonably close proximity to the community it serves;
- (b) demonstrably special to a local community and holds a particular local significance, for example because of its beauty, historic significance, recreational value (including as a playing field), tranquillity or richness of its wildlife; and is
- (c) local in character and not an extensive tract of land.

A designation has the policy effect of the equivalence of the Green Belt in terms of the definition of ‘inappropriate development’, consistent with paragraph 103 and 147 of the NPPF and of the ‘very special circumstances’ tests in the NPPF when determining planning applications located within a designated Local Green Space.

Background

Oving Parish Council engaged consultants *terra firma* in June 2021 to undertake a parish study to establish if there were areas that could be proposed for designation that met the NPPF criteria. The study concluded that there were eight such areas and these are accordingly included in the Oving Neighbourhood Plan. See Appendix OV5 and associated LGS Analysis Sheets.

Local Planning Policy Context

Policy OV5 accords with Chichester Local Plan 2014-2029 policy 54 and emerging Chichester Local Plan 2021-2039 policies P14 and P15. OV3 goes a step further by formally designating the identified spaces as Local Green Spaces.

References

The Terra Firma Consultancy Limited reports on Local Green Space and Oving Landscape Capacity (December 2021)

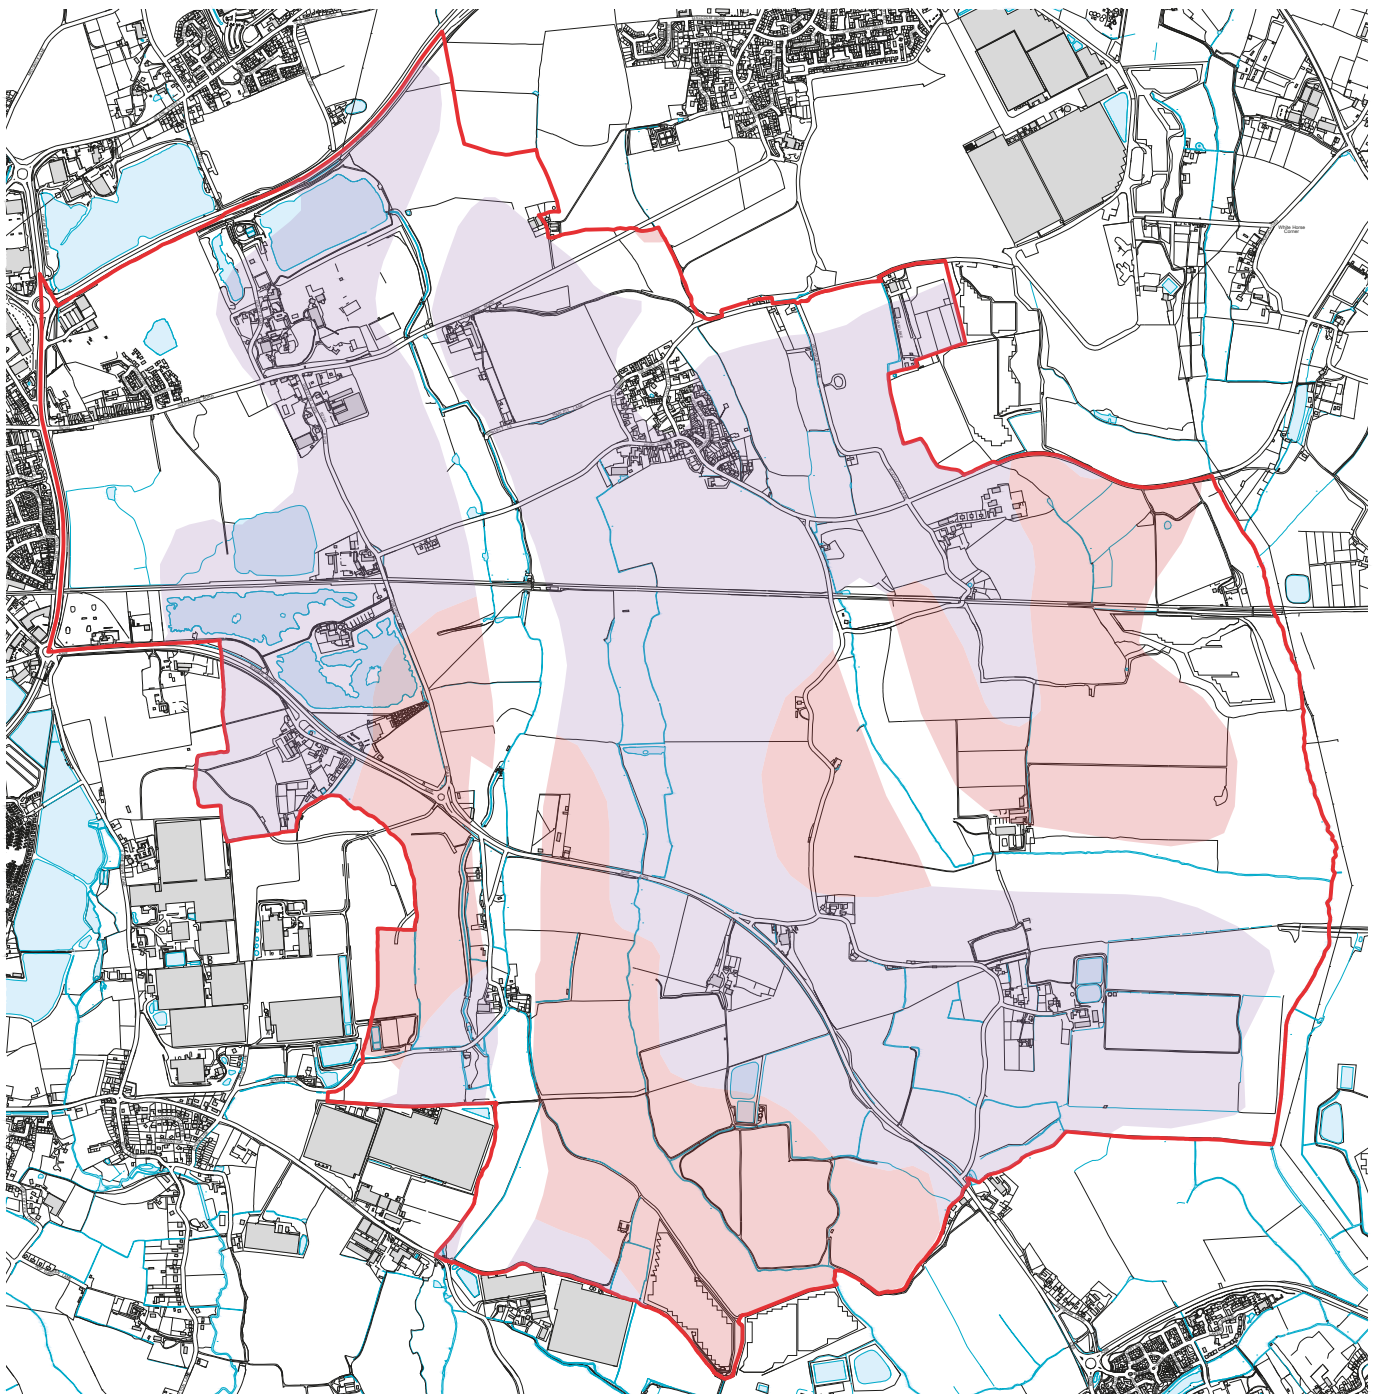

See Appendix OV5

OV6 Grade 1 & 2 Agricultural Land

Development proposals which would diminish the capacity of soil classed as Grade I or Grade II, as shown on the Policies Map, will not be supported, unless:

I They are for the purpose of delivering a policy compliant scheme for either a New Local Service (Policy OV2), a Green Network Infrastructure improvement (Policy OV4), or an Active Travel Network improvement (Policy OV9) or:

II It can be demonstrated that there is no land of a lower agricultural land classification within the Parish or any adjoining Parish that is suitable for the development proposed.

Introduction

The policy seeks to protect one of the rarest soil types in the country and go beyond seeking to preserve the Best and most Versatile (BMV) soil as set out in the emerging Local Plan.

Supporting text

NPPF para 180
CDC LPR 2021-2039 Policy NE2

Local Planning Policy Context

Policy OV6 accords with Chichester Local Plan 2014-2029 policy 48 and emerging Chichester Local Plan 2021-2039 policy NE2 in seeking to guide development away from the most valuable agricultural land (Grade I or II).

Aesthetic Value of the Landscape

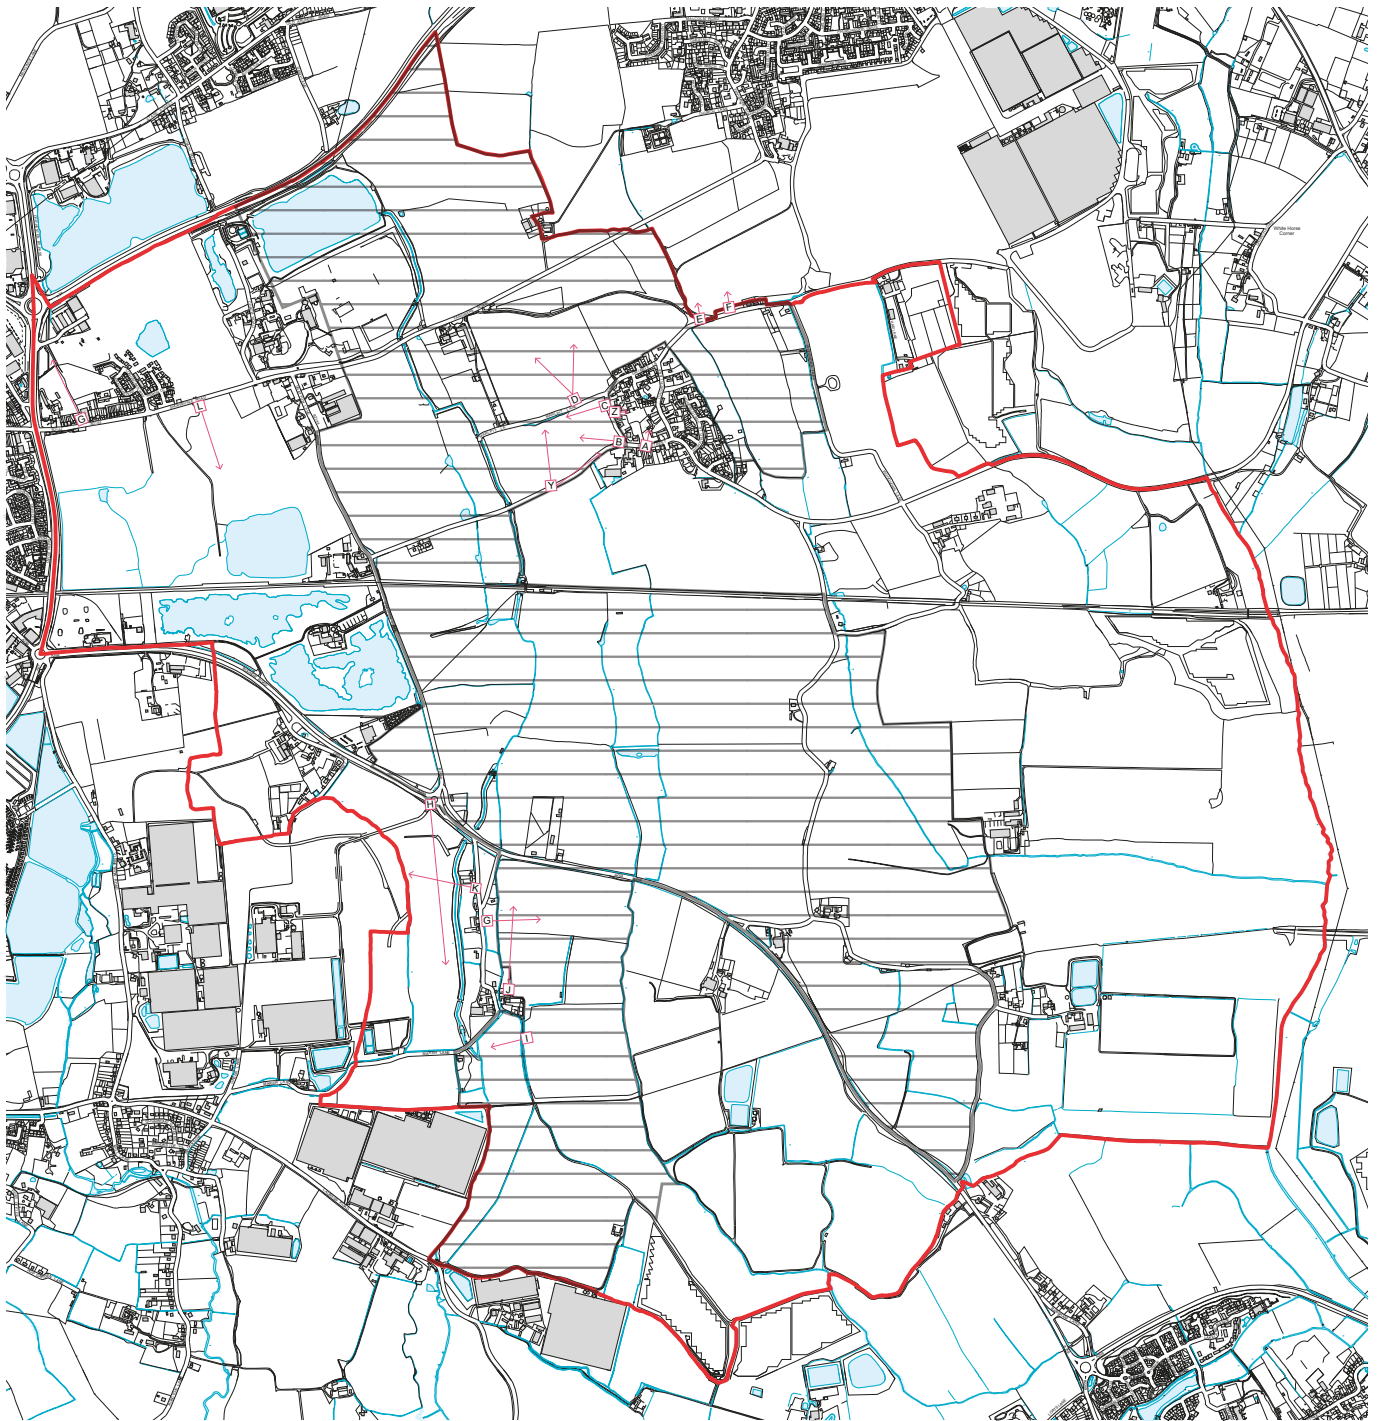

OV7 Valued Landscapes

A. The Neighbourhood Plan defines several Landscape Gaps, as shown on the Policies Map, for the spatial purpose of preventing the visual coalescence of settlements within and adjoining the Parish:

- i. Shopwyke and Oving**
- ii. Tangmere and Shopwyke**
- iii. Tangmere and Oving**
- iv. Bersted and Chichester**
- v. Runcton and Bersted**
- vi. Bersted and Oving**

Development proposals that lie within a defined Local Gap must be located and designed in such a way as to prevent the visual coalescence of the settlements.

B. The Neighbourhood Plan identifies Important Views, as illustrated in the Design Code and as shown on the Policies Map. Development proposals that are located within or immediately adjoining an Important View will only be supported if it can be demonstrated that the key features of the view can continue to be enjoyed including views of Chichester Cathedral, views to and from South Downs National Park, areas of landscape and the juxtaposition of the village edge and surrounding countryside.

OV7 Landscape Gaps
 OV7 Important Views

Local Planning Policy Context

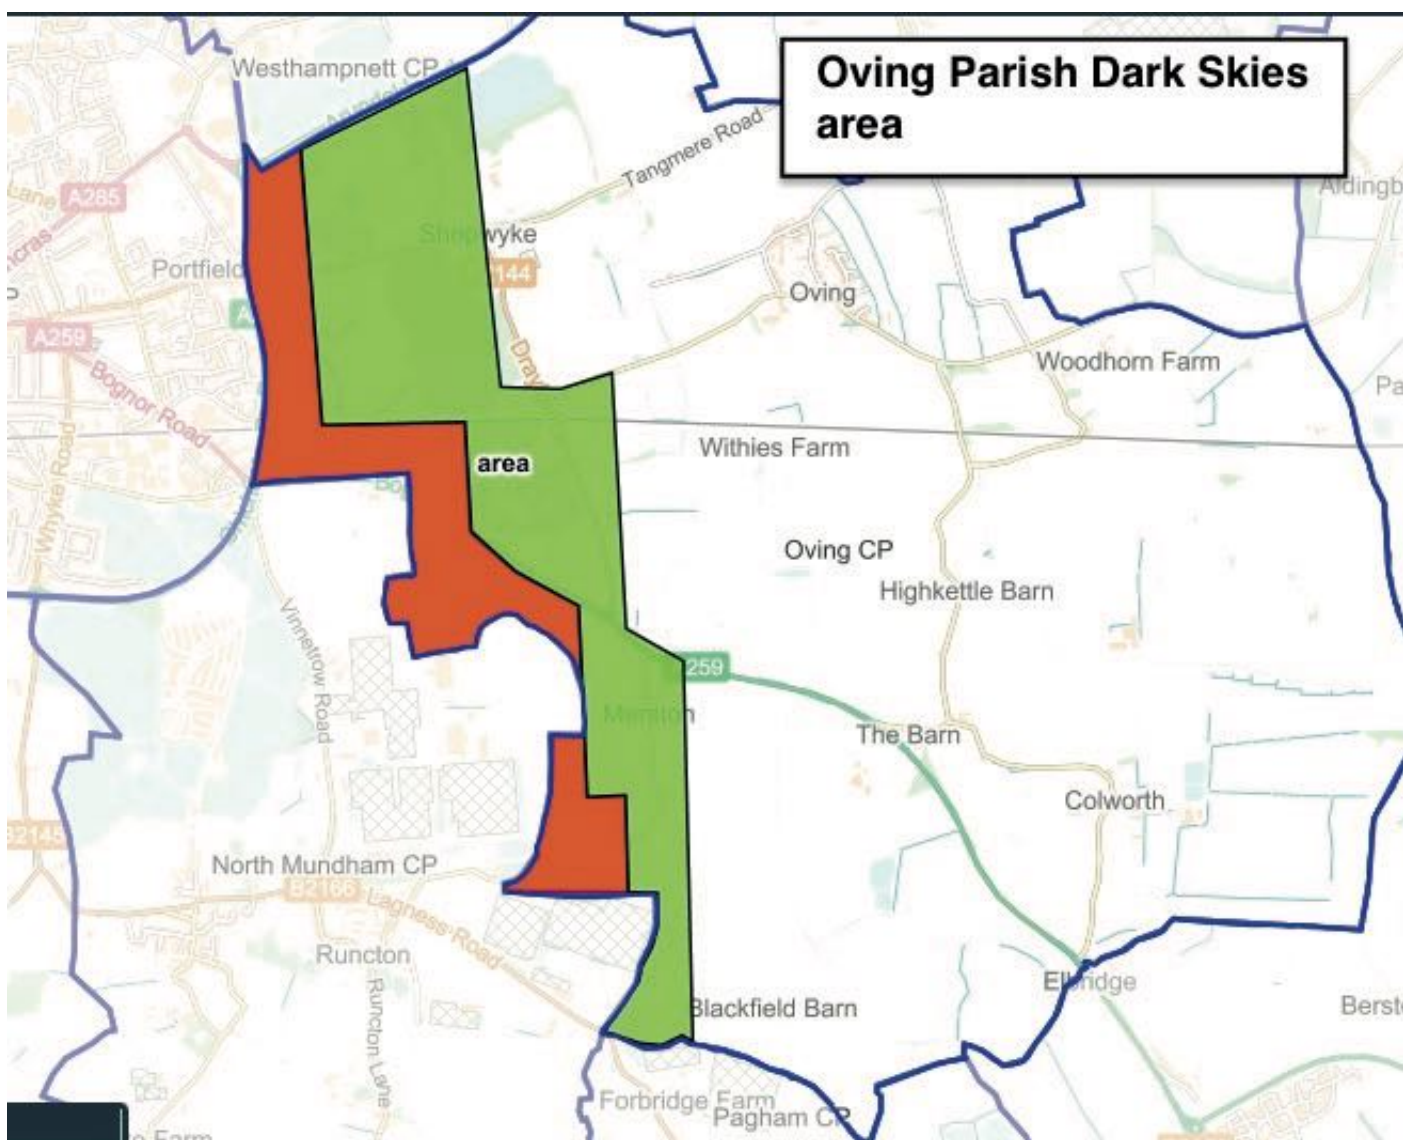

Policy OV7 accords with Chichester Local Plan 2014-2029 policy 48 and emerging Chichester Local Plan 2021-2039 policy NE2 in seeking to prevent adverse impact on Important Views identified within the parish. OV7 also accords with emerging Chichester Local Plan 2021-2039 policy NE3 which offers neighbourhood plans scope to identify the boundaries of Landscape Gaps.

Reference: Hankinson Duckett Associates. Oving West Sussex Landscape Gap Assessment for Oving Parish Council. September 2024

OV8 Dark Skies

A All development proposals should be designed to minimise the occurrence of light pollution. The Parish Council will expect such schemes to employ energy efficient forms of lighting that also reduce light scatter and comply with the current guidelines established for rural areas by the Institute of Lighting Professionals (ILP).

B. Proposals for all development will be expected to demonstrate how it is intended to prevent light pollution. Information on these measures must be submitted with applications, and where a development would potentially have an impact on light levels in the area, an appropriate lighting scheme will be secured by planning condition.

Supporting text

Half of Oving village and the hamlets have never had street lighting installed. As a result, the undeveloped parts of the parish enjoy relatively low light levels. These enable residents to appreciate the night sky and the darkened landscape and to control, to a large extent, the amount of light that illuminates their properties at night. Low light levels are an important benefit to wildlife because there is minimal disturbance to the regular patterns of nocturnal insects, birds and mammals.

The darkest skies are those farthest from Chichester city, the glasshouses areas in the Horticultural Development Area and the A27 and A259 corridors. The rest of the parish is relatively dark (1-4 nano watts/cm²/sr).

It is important that lighting in new developments is strictly controlled especially when it would affect the quality of listed buildings or Conservation Area, the wildlife corridors or the setting of the South Downs National Park, an International Dark Sky Reserve.

There are three common sources of light pollution. The first is glow which emanates from settlements. Sky glow from Chichester and Tangmere is visible in the parish. The second is glare, which is caused by bright light viewed against darkness. The third is light intrusion which is light spilling beyond the property being lit. This is most pronounced from glasshouses where there is not light cover at night.

The use of energy efficient lighting, cowls and careful directional lighting can achieve considerable benefits. Particular care is required in the design of lighting for some types of development, for example community buildings and sports pitches, which otherwise can cause considerable pollution far beyond their immediate boundaries.

Local Planning Policy Context

Policy OV8 accords with emerging Chichester Local Plan 2021-2039 policies NE20 and NE21 in requiring development proposals to consider the impact of their lighting schemes on light pollution.

Getting About

OV9 Active and Sustainable Travel Network

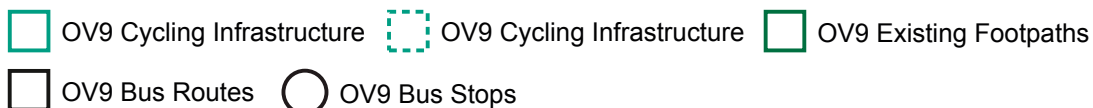

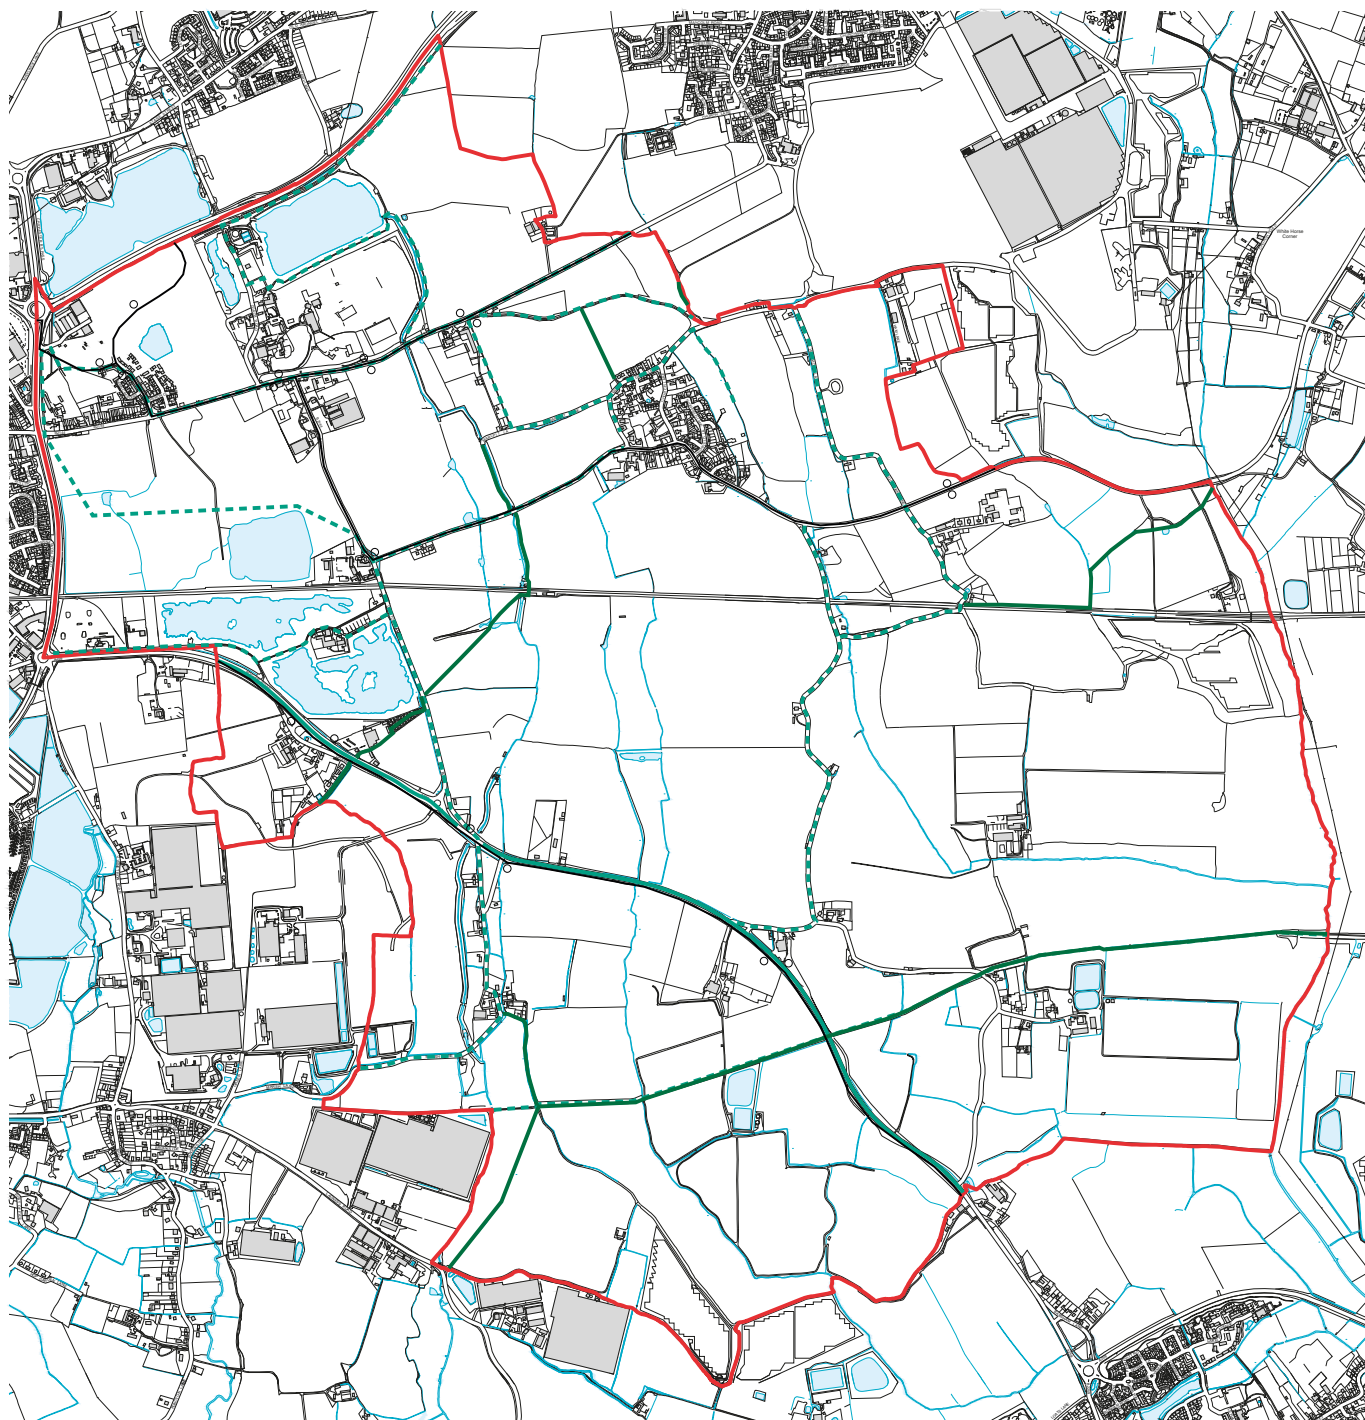

A. The Neighbourhood Plan identifies an Active and Sustainable Travel Network, as shown on the Policies Map, for the purpose of supporting active and sustainable travel in the Parish. It divides the defined Network into strategic and local routes.

B. Development proposals on land that lies within or adjacent to the Network should retain, and where practicable, enhance the functionality of the Network by virtue of their layout, means of access and landscape treatment. Proposals that will harm the functioning or connectivity of the Network will not be supported.

C. Bus shelters need to be designed to comply with their setting. Shelters in a conservation area will differ from those in or close to a modern housing estate.

D. Development proposals that will lead to investment in a defined shared transport active travel route will be especially encouraged.

E Development proposals to provide new bridleways to connect with other parts of the Parish through CIL, S106 contributions or whatever community contributions may follow, will be supported.

Introduction/ purpose

Oving parish consists of the village of Oving and the hamlets of Drayton, Merston, Shopwyke, and Colworth. There are also the recent large developments at Shopwyke Lakes to the north and south of Shopwyke Road.

Communication among these population centres and with Chichester consists of mostly and often narrow unclassified roads. There are no cycle or pedestrian paths, paved or otherwise, to speak of, and public transport except for the 700 that runs along the A259 and the 500 that runs through Shopwyke is minimal.

Improved connectivity within the parish and with nearby settlements including Chichester, Tangmere, Barnham and Bognor Regis is the top priority of the neighbourhood plan.

Background

Critical connections

Chichester city centre. A27 to the North and West is a significant barrier

Chichester bus station

Railway stations at Chichester and Barnham

Places of employment

Leisure, eg Everyone Active at Westgate, Goodwood etc

St Richard's hospital

Nearest major food retail: Portfield (Sainsbury, M&S, Lidl, Aldi and Iceland);

Tangmere (Coop)

Other cycle paths, eg South coast cycle path and Centurion / Salterns Way.

Schools: The March C of E Primary School at Westhampnett, Boxgrove C of E Primary School, Portfield Primary School and Tangmere Primary Academy

If a cycle route into Chichester can be created, access to the city's secondary and primary schools can be safe.

Medical and dental surgeries in Tangmere

Post Office at Tangmere.

Current status of facilities for people movement

Over 98% of journeys are currently undertaken by car.

The only usable cycle path/ footpaths connect Oving village with Tangmere and Shopwyke with Chichester and Westhampnett.

There are a number of official footpaths for walking, but none provide a connection to core activity areas within or outside the parish. Most are impassable during winter or wet weather. There is a route for walking between Oving village and Shopwyke but it doesn't connect with route to Chichester.

There is an infrequent bus service through Drayton, Oving Village and Woodhorn with as yet mostly uncovered stops. There is a frequent 700 service from the south west of the parish to Chichester along the A259.

There are two cycle paths (National cycle route 2) via the A259 and one via Maudlin that can be used to access Chichester but with many unsafe interruptions and significant extra distance. WSCC cycle routes include minor single track roads used as rat runs and unsafe for cycling.

Supporting text

The overall policy is to provide easy, convenient and safe connectivity between key areas. This is to be read in conjunction with the map. This will be achieved by:

1. A network of dual purpose foot/cycle paths of all weather capability.

For these to be used they have to connect safely with the Critical Connections. This will entail working with CDC and other parish councils to ensure joined up connectivity.

This will also involve working with landowners and may call for compulsory purchase if needed.

The parish will work with WSCC and CDC as they prepare their update to the 2016 to 2026 Sussex Walking and Cycling strategy.

2. Bus stops and routes will be sited at strategic locations including junctions of footpaths where feasible.

Bus shelters will be designed to be in compliance with their environment eg conservation area, protected setting, major new urban type development. Stops will be covered.

The parish would work with bus companies, other transport providers and other parishes, eg Tangmere, to provide a more frequent service. There may be a case for commissioning private minibus operators in conjunction with other parishes.

3. The parish will support the installation of electric charging points and appropriate car parking for electric cars, as well as basic bicycle charging/maintenance facilities.

The policy will require development proposals to ensure that schemes do not harm the functioning or connectivity of the network but sustain and where possible, enhance it.

The policy will also seek contributions for public realm improvements and traffic mitigation measures.

The Policies Map will enable applicants to determine if their proposals should take this policy into account. Where proposals include provision for landscaping, new means of

access or new layouts, there may be an opportunity to relate the land better to the network and/or improve the attractiveness of rural routes. At the very least, the policy requires that proposals that will undermine the existing value of the network will be refused permission.

Local Planning Policy Context

Policy OV9 accords with Chichester Local Plan 2014-2029 policies 8, 39 and 52 in encouraging new development proposals to enhance the functionality of the Active and Sustainable Travel Network and not supporting proposals which harm its functionality. This accordance also extends to the emerging Chichester Local Plan 2021-2039 policies T1, T2, T3 and P4.

AECOM Oving Design Guidelines and Codes Final Report January 2022, (page 23 Access and Movement)

Design and Heritage

OV10 High Quality Design

A. All development proposals should adhere to the provisions of the Oving Design Code as relevant to their nature, scale and location.

B. All major development schemes with a residential component should submit a 'Building for a Healthy Life' design assessment to demonstrate how the design proposals will achieve those objectives.

Introduction/ purpose

Oving parish has no settlement boundary. Under the Chichester Site Allocation Development Plan there have been recent large allocations in the north west of the parish which will when fully developed lead to a doubling of the population of the parish.

More allocations have been identified in the emerging plan.

In January 2020 an Oving Housing Needs survey identified the need for 22 units of affordable housing.

The purpose of the Oving Neighbourhood Plan is to set the planning requirements including design codes for new strategic allocations, for the provision of affordable housing and other development in the parish.

Background

In the emerging local plan, Policy AL8 allocates 600 dwellings on a site south of Shopwhyke Road.

Pending determination of mitigation measures for the A27 these numbers could remain provisional during the life of the neighbourhood plan.

Supporting text

The part of Shopwhyke between Longacres Way and the original hamlet of Shopwhyke with hedgerows and woodland verges provides a segue between the urban conurbation of Chichester city and the rural area of Shopwhyke and Oving.

The tree corridor provides a sense of arrival at the original hamlet at the junctions of Coach Road and Drayton Lane and is the location of three listed Grade II buildings Shopwhyke Hall (listed Grade II*), Shopwhyke Grange and Shopwhyke House Lodge.

Planning Policy Context

There are major strategic allocations within and beyond the Oving Parish boundary as set out below:

- Policy 16 Shopwhyke Strategic Development Location
- Policy CC4 Shopwhyke Strategic Development Location
- Policy 18 Tangmere Strategic Development Location
- Policy 19 Tangmere Strategic Employment Location

The settlement of Oving also lies to the east of the Preferred Approach Local Plan strategic allocations AL2 and AL8. The settlement and hamlets are separated from AL2 and AL8 by low lying flat landscape and the proposed Strategic Wildlife Corridor which may lie either

side of Drayton Lane, including the water bodies around Drayton House and associated green infrastructure which will reinforce this separation

The scale and mix of uses proposed at AL8 will have an impact on existing services and facilities in Oving village and the hamlets. The Neighbourhood Plan has focussed on expressing the identity of the existing village and hamlets and this factor may influence future master planning of AL8 indirectly should these proposals come forward in the future.

The Neighbourhood Plan acknowledges AL8 may help to bolster the shortfall of existing community facilities and services in the parish, such as the provision of a local shop (see OV2), and by providing improved active travel links between the Parish and the City Centre (see OV9).

There is a significant employment proposal ALXX and this and the other Employment uses are separated from the new residential areas by the Railway line. It is proposed that a footpath and cycle path should continue from the Oving Road traffic light junction with the A27 along the eastern edge of the highway utilising the existing bridge and the footpath connection north of the A259/A27 roundabout. There is the same width of highway along this route as there is with the new cycle/footpath south of the traffic lights.

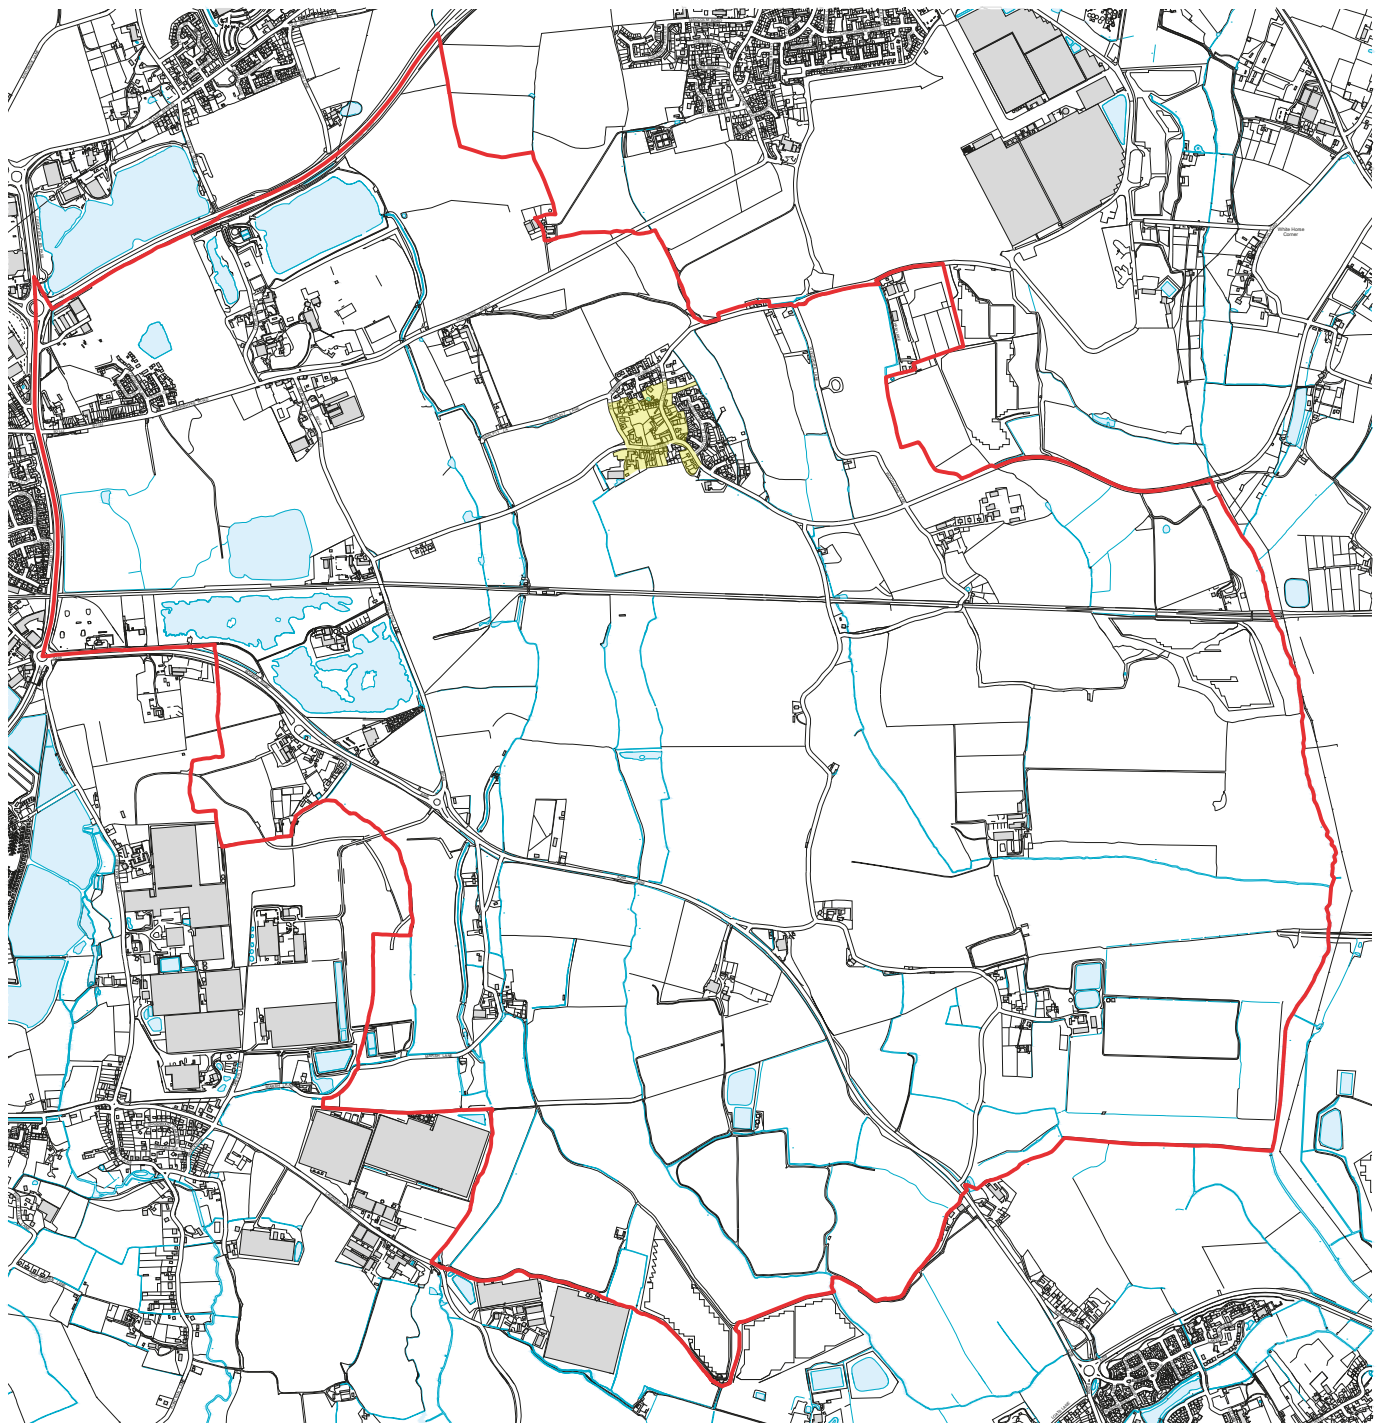

Local Planning Policy Context

Policy OV10 accords with Chichester Local Plan 2014-2029 policies 40 and 47 in respect of supporting high quality design that also recognises the character and heritage of the surrounding area. This accordance also extends to the emerging Chichester Local Plan 2021-2039 policies P1, P2 and P8.

OV11 Oving Conservation Area

A. Development proposals should preserve and enhance the special architectural and historic significance of the designated Oving Conservation Area and its setting.

B. All proposals must have full regard to the significant features identified as positive characteristics of the Conservation Area and its immediate setting as defined in the Oving Conservation Area Appraisal and the Oving Design Code (Chapter 2 and figure 13)

OV11 Oving Conservation Area

Background

A policy for the Chichester Conservation Area was determined by Chichester District Council in 2012. Little has changed since then apart from two small estates of affordable housing in Gribble Lane.

Supporting text

This policy directs applicants bringing forward proposals within the Oving Conservation Area or its setting to the design principles and guidance contained in the Oving Conservation Area Character Appraisal and Management Proposals (CACAMP).

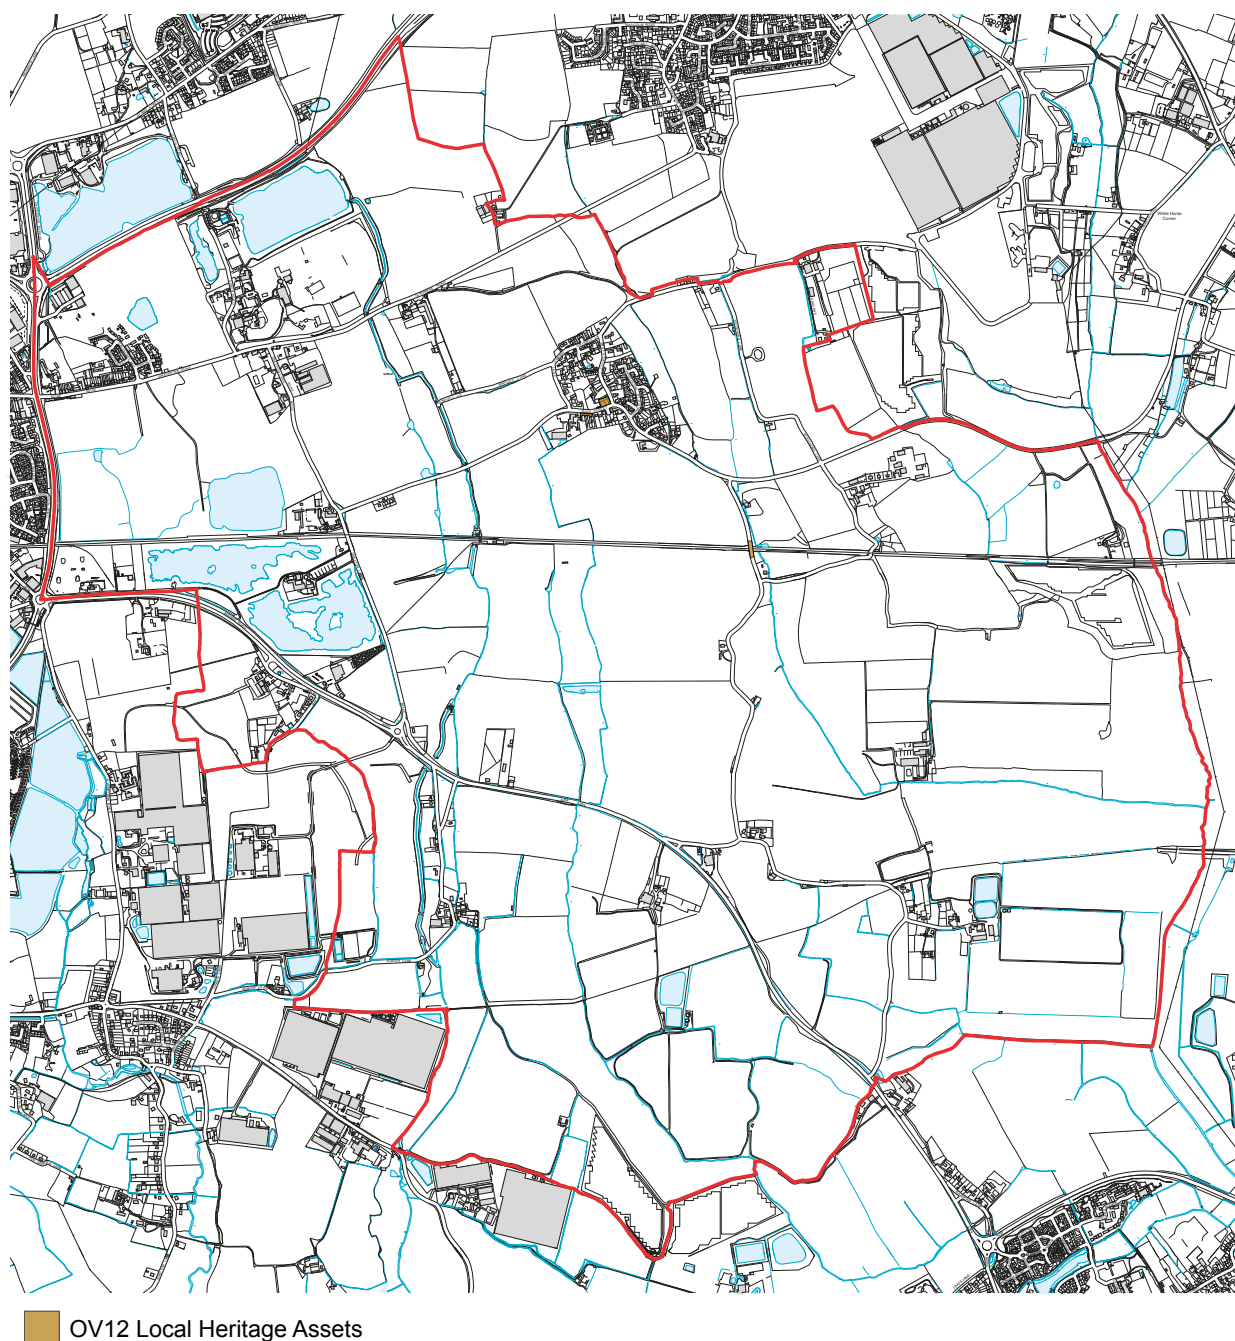

Local Planning Policy Context

Policy OV11 accords with Chichester Local Plan 2014-2029 policy 47 and emerging Chichester Local Plan 2021-2039 policies P9 and P11 in seeking new development to respond positively to the special architectural and historic significance of the designated Oving Conservation Area and its setting.

OV12 Local Heritage Assets

A. The Neighbourhood Plan identifies 18 Local Heritage Assets, as shown on the Policies Map and in the Appendix schedule.

B. In weighing up proposals that affect a Local Heritage Asset, a balanced judgment will be required having regard to the scale of any harm or loss and the significance of the heritage asset as identified in the schedule.

Local Planning Policy Context

Policy OV12 accords with Chichester Local Plan 2014-2029 policy 47 and emerging Chichester Local Plan 2021-2039 policies P2, P7, P9 and P12 in designating a number of identified Local Heritage Assets (Non-Designated Heritage Assets) so that the impact of development proposals on Local Heritage Assets can be considered in their determination.

Supporting text

In identifying candidates for this protection reference was made to Historic England's criteria for assessing value of assets in terms of architectural, archaeological and historic interest. See Evidence.

See Appendix OV12 Heritage Assets

OV13 Tall Buildings and the skyline in Oving

A. Tall building proposals must ensure they do not undermine the landscape character or heritage of the Parish. Any proposal for a building or structure over three storeys (9 metres) that breaks the existing skyline and/or is significantly taller than the surrounding built form will be considered against the following criteria:

- (i). location, setting and context - applicants should demonstrate through visual assessment or appraisal with supporting accurate visual representations, how the proposals fit within the existing low lying landscape character of the Parish;**
- (ii). Impact on historic environment - applicants should demonstrate and quantify the potential harm of proposals to the significance of heritage assets or other sensitive receptors, assessed on a site-by-site basis but including impact on key landmarks, settings and viewpoints, as well as from the rural lanes and other public spaces in the village and hamlets;**
- (iii) architectural quality – applicants should demonstrate through accurate visual representations how the proposals will deliver a high quality addition to the Oving skyline and clearly demonstrate there is no adverse impact. Final ground levels will be included within any application relating to the nearest existing properties in order to be able to relate proposals accurately.**

Supporting text

The parish is generally free from taller and bulky buildings over three storeys with the notable exception of the Chichester Food Park which while within an area of medium to high landscape capacity, sits in stark contrast to the low lying flat landscape to the north of the A259 which provides the setting to Oving and the hamlets. While there has been little move to build taller buildings, any proposals for taller buildings must be carefully considered.

There are a large number of designated heritage assets within the Parish and a number of important views. Accordingly, the potential impact that a proposal for a tall building have on the significance of those assets will be a critical factor in the acceptability of a proposal. For this reason, it is very unlikely that there would be many instances or scope for introducing new, tall buildings in the parish.

Local Planning Policy Context

Policy OV13 accords with Chichester Local Plan 2014-2029 policies 33, 40 and 47 in requiring proposals to consider how their height is appropriate to the surrounding area, including how it impacts on heritage assets. This accordence also extends to the emerging Chichester Local Plan 2021-2039 policies P1, P2, P9, P10 and P12.

OV14 Affordable Housing and community-led housing development

Proposals to deliver up to a total of 22 affordable homes, First and Starter Homes, over the plan period comprising schemes of each fewer than 10 homes will be supported, provided:

- i. They meet the prevailing definition of Rural Exception Sites or Community-led Housing Developments;**
- ii. They are intended for occupation in perpetuity by households with a parish connection;**
- iii. They are located on land that lies within or adjoining Oving village, or another suitable site within the parish;**
- iv. Where it can be demonstrated to be necessary to deliver a viable scheme, up to 25% of the total number of homes may be sold on the open market; and**
- v. The scheme comprises a mix of homes of 1 or 2 beds type suitable for younger households and 1 to 3 bed bungalows suitable for downsizer accommodation, and of a tenure mix of affordable rent or shared ownership.**

Supporting text

The policy establishes the goal of delivering affordable homes to meet local needs. In May 2019, Oving Parish Council commissioned Chichester District Council's Housing Delivery Team to assess the housing needs of the Parish. The Survey Report published in January 2020 identified a need for 22 affordable homes to benefit the Parish, both for younger households and for downsizers and of a housing type and mix as expressed in clause C (i). The Housing Needs Survey provides the evidence to justify a minor departure from the type and mix expressed in the CDC Housing and Economic Needs Assessment.

The whole of Oving Parish is defined as a 'designated rural area' under Section 157(1) of the Housing Act 1985. In designated rural areas local planning authorities may choose to set lower affordable housing thresholds and seek affordable housing contributions from developments above that threshold in line with Planning Practice Guidance Paragraph:

023 Reference ID: 23b-023-20190901. The parish is therefore exempt from the usual 10 dwelling threshold for securing affordable housing contributions and the policy reflects the lower threshold applied by Chichester DC in Clause B of Policy 34 of the adopted Local Plan and Policy S6 of the emerging plan.

The Parish Council will require affordable housing to be provided on-site, unless there are exceptional circumstances that mean off-site provision, or a financial contribution of broadly equivalent value can be robustly justified. This approach is intended to ensure the objective of meeting local housing need for those with a proven parish connection to Oving is not undermined.

Local Planning Policy Context

Policy OV14 accords with Chichester Local Plan 2014-2029 policy 34 and emerging Chichester Local Plan 2021-2039 policy H4 in seeking to deliver affordable housing in line with the local needs identified in the Housing Needs Survey. The policy also reflects Oving's status as a 'designated rural area'.

Village Shop and Community Hub

The following is a report the Steering Group commissioned one of its members write more than two years before the Oving Cowshed was set up and the Shopwyke Lakes development had been built out to include a Community hub and Bike shop.

SQ October 28, 2024

Background

Many respondents to consultation about the Neighbourhood Plan have suggested a desire for a local shop. I was asked to investigate the award winning Fittleworth Stores as I had contacts there and make some recommendations as a result.

I met with Mick Foote, chair of the shop management committee, on June 9, 2021. In advance he shared with me their original business plan and other reports including one from the Plunkett Foundation (“a national charity that supports rural communities across the UK to tackle the issues they face through community business”). <https://plunkett.co.uk/>

Fittleworth

Prior to the meeting I did some research into Fittleworth and discovered that it had a good deal in common with Oving parish before the current and proposed developments at Shopwyke. Population similar; nice country village; parish includes other hamlets such as Bedham and Stopham. Nearby supermarkets – Tesco in Pulborough about seven minutes drive, with Sainsburys a minute further on and a large Co-op the same distance in Petworth. There is also Charlie’s Farm Shop on the A29 at Bury. There are, of course, differences: there is a primary school in Fittleworth adjacent to the village hall and where the shop is sited. From Oving you can cycle across the airfield to the Tangmere Co-op in under ten minutes or even walk there in half an hour.

Staffing

Discussing their shop with Mick Foote a number of requirements became apparent: Firstly, two or three volunteers who are committed, available, and financially aware, to act as project sponsors to get the place created and established. This will include securing a suitable site, getting grants and other finance, and establishing a management structure. They must be willing to stay on after opening to see the place running well.

In addition, a large number of volunteers prepared to commit to regularly working unpaid in the shop. Training is provided.

Site

Must be visible on well used road with good parking, within walking distance of a significant proportion of the parish/village. At Fittleworth the café with windows looking out over kids playground is a great attraction. It also attracts passing trade, walkers, cyclists, delivery drivers, as well as locals, parents/grandparents picking up from school etc. Helps greatly in making the place a community hub.

Product range

Post Office. Brings people in – very popular. Earns modest fee but is run by people serving behind counter and there anyway so little extra cost. Post Office means shop/café takings can be banked immediately on site, no need to go into town to find a bank. Post Office can provide alarms and safes. Newspaper sales attract older customers.

Basics (e.g. milk) have to be sold at reasonable (i.e. low margin) prices so as to not give the impression the place is expensive. They sell all the basics plus products from local producers both food and craft. Bread tends to be from local bakers and much cheese is sourced locally too.

Finance

The building needs to be “free” (i.e. no rent or mortgage). At Fittleworth the land was provided by the Parish Council. The sponsors raised almost £300,000 to build and equip the building and provide working capital. They did so by grants, donations and sales of shares in the company (which have no resale value but can attract tax relief under SEEIS).

The store has been granted relief of business rates by the District Council as a sole rural shop serving the area. This could be more difficult to achieve in Oving village and highly unlikely in the new Shopwyke developments.

I was told that Fittleworth Stores in the summer of 2021 was trading very successfully, well ahead of the most optimistic business plan forecast. The management committee was looking to expand. During lockdowns they arranged home deliveries and placed additional stock in the café area, moving tables and chairs outside under a marquee.

They are now (January 2022) on site with an extension costing some £90,000 to bring the café back into the building.

Conclusions and recommendations

Fittleworth is a good example of a community facility that is very popular. However, the parish of Oving is changing so dramatically with the developments at Shopwyke and potentially Drayton that it is difficult to make any predictions.

It is quite possible that a convenience store on a commercial basis will eventually be opened at either Shopwyke Lakes or AL3 and this should be supported.

It is suggested that the garden centre at Shopwyke Nurseries should be supported in developments to enable it to keep pace with the garden centre market.

For a shop to be developed in Oving village the key requirements are:

- Enthusiastic and determined project sponsors to push the project along, raise money etc
- Suitable site available at no cost. Ability to raise money to cover build cost.
- CDC to agree to grant relief from business rates.
- Site in convenient location for majority of village residents but also on main road and with good access and parking and able to act as a community hub ideally with a café of some sort
- Group of volunteers to commit to work in the shop unpaid
- Agreement to open Post Office, if not then arrangement with courier firm/ Amazon drop box etc.
- Differentiate the offer from Co-op. One Stop etc. Local produce, crafts etc as well as basics.
- If these conditions can be met, then the project should be supported.

Clive Sayer

Member of Oving Neighbourhood Plan Steering Group

Appendix OV3 Community Facilities

Oving Jubilee Hall

A modern (built 2002) multipurpose village hall with wheelchair access and facilities used by many community groups and organisations. The main hall can accommodate up to 150 seated guests (e.g. for weddings and community social events) and has a large stage with changing facilities. A separate meeting room is equipped with built-in video conferencing support. The hall has a modern, well equipped kitchen with facilities for food preparation, cooking and refrigeration, plus servery.

Oving Jubilee Hall serves as the essential community hub for Oving village and the wider parish.

Gribble Inn pub

The Gribble Inn has been thriving in Oving village since 1980 when the 16th century thatched cottage, previously owned by Mrs Rose Gribble, was converted to a pub. There is a separate 'brewery tap' barn that is available for private hire for up to fifty people. The pub also has a renowned micro-brewery.

Flip out centre

Flip Out Chichester is the biggest adventure trampoline centre in West Sussex combined with various family attractions such as soft play areas and assault courses. Flip Out is part of a nationwide franchise.

High quality tourist accommodation

Flintstone Cottages, around one mile east of Oving village, offers self-catering accommodation in out-buildings of the Victorian flint knapped Sussex farmhouse.

Community Garden and Telephone Kiosk Book swap.

Oving Community Garden is a relatively new project involving all ages in the community from the youngest to the eldest. The garden has raised beds, a community garden shed, an orchard, a seating area with fire pit or BBQ, a compost area and water storage.

Volunteers have turned the disused telephone box in Oving into a community book swap facility

St Andrew's Church and Burial Ground

The very attractive galletted flint 13th Century Parish Church of St. Andrew's sits at the very heart of the village. Eucharist Services are held every Sunday. The burial ground is the peaceful resting place for many well loved and respectfully remembered parish residents.

Diamond Jubilee Park

Oving village recreation ground is an important green space facility for all parish residents and is available for sporting use and community outdoor recreation. It is the site of Oving Community Garden, a BMX cycle track and a children's play area.

St Giles Church, Merston

The small and charming St Giles church is generally identified as thirteenth century. The church was closed in 2010 due to safety concerns but following extensive renovation was reopened in 2017 and is now open to visitors at limited times in the summer. It is owned by the Churches Conservation Trust and remains a consecrated Grade 1 listed building.

Shopwyke Lakes/ New Fields

- Bikeshop/Café
- Play ground
- Playground
- Playground

Appendix OV5 Local Green Spaces

- Diamond Jubilee Park in Oving Village
- Cemetery off Church Lane, Oving.
- Narrow pasture land either side of Marsh Lane, Merston from Manor Farm in the south to the A259 in the north.
- Land further south in Merston to east of grade 1 listed Church of St Giles.
- Route of former canal in Merston and Colworth

- Duck pond, bridge and grassy bank in Merston where people stop and enjoy the setting.
- Areas of green space in subject Shopwyke Lakes development and New Fields as shown on planning application drawing referenced below.
- Old Oving Road, subject to the freedom of access for any traffic associated with the business of the owners be permitted on a 24/7 basis.

https://publicaccess.chichester.gov.uk/online-applications/files/E1D0E95EAEBD3441C460D65A59FE03FF/pdf/19_01983_REM-COLOURED_MASTERPLAN__A2_-2702775.pdf

Appendix OV12 Heritage Assets

- Mill House, Oving (value: historical, former mill house)
- The remnants of the Chichester to Arundel Canal route (value: historical)
- Merston duck pond (value: historical)
- Early Victorian cottages, 1 -4 Merston Cottages, Marsh lane, Merston (value: historical/architectural)
- Gravestones in the graveyard of St Andrews Church, Oving including the monument to Wilson Keers, Domestic Physician to the Royal Highnesses the Duke and Duchess of Kent, Queen Victoria's parents. Many other gravestones of historic interest (value: historical)
- Gravestones in the graveyard of St Giles Church, Merston (value: historical)
- Memorial Burial Ground, Church Lane includes Commonwealth War Graves (value: historical)
- Humpback railway bridge at Woodhorn/Colworth. Appears to be Victorian and still fairly original. (value: historical)
- Late Bronze Age ditch at Manor Farm, Merston (value: archaeological)
- Iron Age farmstead at Copse Farm, Oving (that part that falls within Oving)
- The Mission Room/Chapel, Colworth. Originally a store, converted into mission room in 1883. Used as a schoolroom in WWII (value: historical)
- Early Victorian cottages at 23 – 27 High Street, Oving. Excellent examples of the type with special features including Halsted metal windows. (value: historical/ architectural)
- Converted barns on corner of High Street and Church Lane, Oving. Recognised in Conservation Area Character Appraisal, retaining their rural architectural character (value: architectural)
- Converted barns in Merston including Tapners Barn, The Granary, The Old Dairy and Stable Cottages (value: historical/ architectural)
- Single storey brick structures with clay tile pitched roofs at Madam Green Farm. Recognised in Conservation Area Character Appraisal as 'notable and possibly as worthy of statutory listing.' (value: architectural)
- Red telephone box (now used as community library) and post box at southern end of Highfield Lane, Oving. A feature of the village and in its original position (value: historical)
- Rushmans Cottage off Gribble Lane (attached to the listed Rushmans but not included in the listing according to the Conservation Area Character Appraisal though protected as part of the 'curtilage' of the listed building)
- Post box in wall at Merston House. Traditional small in-wall post box, unusually framed with canted bricks (value: historical)

February 22, 2022

Sample letter to landowner about the designation of local green space

Summer Berry Company
Leythorne
Vinnetrow Road
Runcton
Chichester
PO20 1QB
March 10, 2022

Dear Summer Berry Company,

This is to let you know we are in the process of preparing a Neighbourhood Plan for Oving parish and that as part of the plan we are designating some land we believe to be in your ownership as local green space.

In designating land as local green space we are following the guidance of the National Planning Policy Framework which specifies that the green space should be

- (a) in reasonably close proximity to the community it serves;
- (b) demonstrably special to a local community and holds a particular local significance, for example because of its beauty, historic significance, recreational value, tranquillity or richness of its wildlife;
- (c) local in character and not an extensive tract of land.

The land in question is in and around Merston and Colworth as indicated in green and described on the enclosed analysis sheets.

The status of local green space from a planning point of view is equivalent to green belt on which there are restrictions on development.

We shall be consulting the community on a formal basis on all the policies of the Neighbourhood Plan including Local Green Spaces in the first half of 2022. This will give you and other landowners the opportunity to comment on proposed designations. We shall make a point of informing you when the consultation process begins.

If there are any comments you would like to make now, including whether the proposed designations have your support, we should be pleased to receive them.

Yours sincerely

Rod Hague
Chair, Oving Parish Council

Full Assessment and Summary of Evidence

Site name	Merston 5
Site location	St Giles graveyard and two adjacent parcels of land to the east. OS Ref: SU 89366 02609, SU 89398 02590, SU 89419 02663.
Landowner	Church Commissioners
Description of Green Space	Church graveyard, a parcel of grazing land and a further small parcel of land. Partially within Floodzone 2 and 3
Map	
Assessment against NPPF LGS criteria	
In reasonably close proximity to the community, it serves	A short distance from the main group of dwellings.
Local character and not an extensive tract of land	Yes. Land associated with the original C12th village church.
Demonstrably special to the local community and holds a particular significance, for example because of its beauty, historic value, recreational value (including as a playing field), sense of tranquility, richness of wildlife	Graveyard visited by locals and people from further abroad. The land east of the church and graveyard is identified as the location for the original medieval village. Historic and tranquil spot rich in wildlife.

Testing the Waters Report

Objectives

Conduct informal consultation on the draft plan
Provide an opportunity for residents to contribute to/ buy into the plan
Make improvements to the plan
Provide a trial run for the Reg 14 process

Duration

October 24 to November 9, 2022

Promotion

Distribution of leaflet to all residents giving the objectives of the plan and inviting to Open Days on October 29 (Oving Village Hall) and November 2 (Flip Out, Shopwyke). Posted on noticeboards.

Banners posted at high visibility locations in the parish
Information on the parish website, mail chimp and Facebook

Open Days

Exhibition of A1 posters on display stands providing an introduction to the role of a neighbourhood plan and summaries of the planning policies with maps showing where the policies would apply. Attendance: Oving village hall: 69; Flip Out 17.

Feedback

There were 40 residents who on line or using hard copy provided feedback. They were asked to say about each policy what they liked about it and what they disliked. Sponsors were obtained for a prize draw to incentivise feedback. At the Open Days there was further input from discussion with SG members and recorded on post-it notes.

The policies that attracted most comment were Housing followed by Getting About. Issues raised under Housing included:

Be innovative, not just traditional, in design and materials
No three storeys except in blocks of flats, with care
No gated or virtually gated communities
Creeping urbanisation
Bungalows for downsizers
No large scale developments
Wider range of affordable housing in terms of size and affordability
Use blocks of flats to achieve higher density

Getting About

Roads, already gridlocked, until A27 sorted, delay any new development
'Terrifying slip road' from Shopwyke Lakes to A27.

Lack of strategic network improvements

Quiet lanes for Marsh Lane and Colworth Lane

Lack of transport system joining up footpaths and cycle ways to provide connectivity between Oving and Shopwyke.

Follow up

The Steering Group is analysing the feedback to identify comment that may deserve response and perhaps also inclusion in the plan, and comment already covered in the policies eg support for solar panels. In general there was considerable endorsement of the individual policies, the plan's overall approach and the quality of the Open Day presentations.

SQ November 17, 2022

Analysis of feedback and proposed response by Steering Group at its meeting on January 13, 2023.

Footpath needed between Littlemead and the Taylor Wimpey development. Needs clearer highlighting on network policy map. RH

Tall building policy. Agreed not to specify measures for heights to eaves or ridges. Better to include a narrative that any industrial building outside an HDA that was subject to separate policies should be assessed in terms of impact on adjoining landscape and development.

Building Heights to be two story maximum, lower in highest sensitivity areas within the Landscape Sensitivity Areas Report. Reasoning and explanatory notes based on Historic England's advice below at

<https://historicengland.org.uk/images-books/publications/tall-buildings-advice-note-4/heag037-tall-buildings-v2/>

Restricting HGVs to A and B roads. For future development, this restriction should be set within an S106 or planning condition with access to the development site from the A or B network via the least restricted route (ie away from Oving High Street, Marsh Lane and Colworth Lane). Seek TRO on non A and B routes to support non motor based transport.

Protecting trees in landscape boundaries. RH to appoint consultant to recommend individual trees for TPOs.

Concerns relating to bungalows, affordable housing, building materials and solar energy. It

was noted that all these were covered in the AECOM Oving Guidelines and Codes Report of January 2022. It was recommended that a link be provided to this report for ease of reference.

Provide protection for mature trees, hedges and wooded verges. This concern was broadly covered in the AECOM report. Code.15 Trees. Page 57.

Manned work hubs, providing facilities for small business. This concern could easily be inserted in Policy OV1.

Clean energy policy. It was agreed not to develop such a policy as it would be subject to NPPF requirements which themselves would be subject to change. Also the subject was largely covered passim in the AECOM report eg Code 27 Minimising energy use Page70.
